Judge Alan Kemper, Director  
State Department of Public Welfare  
State Office Building  
Atlanta, Georgia

Dear Judge Kemper:

As required by statute and custom, I respectfully submit to you the one hundred and thirteenth Annual Report of the Milledgeville State Hospital for fiscal year ending June 30, 1956.

Despite the fact that some of our self-appointed critics and well-meaning but misguided friends refer to the hospital as being custodial in nature only, living testimony in the form of numerous ex-patients who have been restored to their loved ones and their rightful places in the community refutes such claims. Records also bear out the fact that this hospital has for many years provided recreational and occupational activities for the patients; and that it has been among the leaders in state institutions in the use of insulin, metrazol, and electric shock therapy, tranquilizing drugs, and in fact all recognized types of therapy. Georgia has only one mental institution and we receive at the Milledgeville State Hospital any citizen who becomes mentally disturbed and is legally committed to our care, regardless of the cause. This being true, we naturally become a refuge for many who are paying the penalty of advancing years, but who are as truly in need of sympathetic and understanding care as the most acutely disturbed young or middle-aged person. Many of these elderly patients are hospital residents until they are released by death and are, therefore, reflected in the statistical records as "custodial cases" Nevertheless, this is a humane type of institution and we who operate it are more interested in relieving human suffering and doing our duty by the citizens of Georgia than we are in presenting "good" statistical records. At the same time, we are ever zealous of the rights of our elderly patients and when, through the use of tranquilizing drugs or improved general health due to a regular regime and medical attention, they become more amenable to home care, the relatives are requested to take them on a trial visit. As a rule, having been relieved for a time of the stress and responsibility which has been upon them, they are willing and eager to comply with our request. Aside from these individuals, who compose slightly more than one-quarter of our annual admissions, we believe our rate of recoveries and discharges will compare favorably with that of any other institution of this type in the nation, even in states where there are separate facilities for epileptics, psychotic mental defectives, and so-called chronic cases.

During most of the seven and one-half years that I have served as Superintendent of the Milledgeville State Hospital I have been

fortunate in that you, as Director of the State Department of Public Welfare, have maintained close personal contact with the hospital. Your comprehension of the problems which arise and your guidance in their solution, and your understanding of our aims and goals, are an unfailing source of encouragement. We are deeply grateful to you and your excellent staff of co-workers for your splendid cooperation in our efforts to bring about better care for the patients and improved working conditions for the personnel. In my opinion these objectives can best be attained by the hospital remaining under the supervision of the State Department of Public Welfare. The State Department of Public Health undoubtedly has an interest and responsibility in the mental health of our citizens, but it occurs to me that it can do the most good in the preventive field. We are already working harmoniously with that department, through county health officers and public health nurses, in preparing the relatives and the public to receive in a normal manner the patients who are ready to be discharged from the hospital. Individuals and groups from the Health Department are always welcome visitors, because we want to learn what they are doing for the mentally ill, to acquaint them with the facilities and limitations of the hospital, and to discuss our mutual problems. One of our strongest allies in the rehabilitation of patients is the Division of Vocational Rehabilitation of the State Department of Education. By coordinating the efforts of these three departments -- the State Department of Health in preventive psychiatry, the State Department of Welfare in the curative branch, and the State Department of Education in the preventive and rehabilitation areas -- the State of Georgia will have an excellent organization for combating mental illness.

The public in recent years has become acutely interested in mental health, which is a good omen. We are overwhelmed by the beneficence and unselfishness of civic clubs, church organizations, personal groups, musical and literary associations, children's and young people's clubs, and individuals in every walk of life, who give unstintingly of their substance and time in bringing entertainment, comfort, and a spirit of neighborliness to their less fortunate fellow beings. Their good deeds are manifest not only during the Christmas Season, but throughout the year. This is charity in its sublimest form.

We regret that our limited staff prevents our giving more time to the orientation and education of the groups who are interested in mental health in general, and in particular the operation of their state hospital. We arrange for lectures and clinics for medical and college students, nursing groups, welfare and social workers, mental health associations, and other adult groups. We do discourage visits to the Milledgeville State Hospital by students in grammar and high school, even though we commend their interest in their state institutions. Psychiatry, more than any other branch of

medicine, is in a state of flux, because of its theoretical approach. Those of us who have devoted years of our lives to its study are often perplexed by its rapidly changing tides, and the subject is certainly too complex for students below college age. Their interest can best be served by acquiring a good foundation in mental hygiene and mental health, and instructions along these lines we believe come within the jurisdiction of the Departments of Public Health and Education.

To The Honorable Marvin Griffin, Governor of the State of Georgia, his official staff, and to the members of the General Assembly, we express our sincere gratitude for their cooperation and support throughout the year.

I am grateful to our employees, in all departments, for their untiring efforts to bring about improvements and higher standards in the hospital, and for their loyalty and devotion to duty.

Inasmuch as all departments have submitted to me detailed reports, which are made a part of my report, I shall comment only briefly on their activities.

## GENERAL STATISTICS OF MOVEMENT OF POPULATION

The daily average population for year ended June 30, 1956, was 11,738, in comparison with 11,582 in 1955. We received 3,383 new patients, 2,399 were discharged, and 934 died, resulting in a net increase of 143 patients. Of the 2,399 discharged, 927 were recorded as restored mentally or without psychosis, and 1,296 as improved. At the close of the fiscal year 2,214 patients were on furlough or trial visit, making a total of 14,058 on the books of the hospital.

An Act of the last General Assembly provides that the superintendent of the hospital shall discharge any patient who is released as restored mentally and submit a discharge order to the Judge of Court of Ordinary in the county of patient's residence. It then becomes the duty of the judge to record on the books in his office, within thirty days, the fact that the patient's sanity and legal rights have been restored. The law did not become effective until the last quarter of this fiscal year and brought about no noticeable change in our discharge rate.

## CLASSIFICATION OF NEW ADMISSIONS

As has been our custom for many years, classification clinics were held each day except Sundays and holidays. Of the 3,383 patients presented this year, 875 came in the senile and arteriosclerotic grouping and 232 in the involutional psychotic grouping. Six hundred and fifty-seven (657) were classed as schizophrenic reaction and four hundred and seventy-eight (478) as affective reaction. Thirty-three (33) were classed as having psychoses due to alcohol intoxication and one hundred and ninety-five (195) as alcoholic addiction without psychosis. Another twenty-eight (28) were in the classification of antisocial reaction without psychosis, and alcoholism was a predominant symptom in a majority of these cases. Within thirty days after admission most of the alcoholics were free of any psychosis they may have had and were discharged from the hospital. The recent Act of Legislature prevents their being returned, unless there is another commitment procedure. We received two hundred and seventy-nine (279) psychotic mental defectives, most of them being over 18 years of age. Children (those under 18) are received only by special permission from the superintendent, which is granted only in cases that are regarded as psychotic or a threat to the lives of others.

## TREATMENT OF PATIENTS

This being a psychiatric institution, our prime objective is to restore to mental health those who have been committed to our care. In contriving to accomplish this goal we endeavor, insofar as is possible, to correct defects of a physical nature. Indeed, when this objective is achieved, some patients spontaneously recover from their mental disorders.

We point with pride to the Jones Hospital, where medical and surgical care is given, the Rivers Building, where tuberculous patients are treated, the Tharpe Dental Clinic, our X-ray departments and clinical laboratories, and our pharmacy, all working together as a team to promote the physical well-being of the patients and employees. Detailed reports from these departments reflect the vast amount of work they are doing.

The medical director and assistant medical director of the Jones Hospital and one senior physician have just completed nine month educational leaves -- the first two specializing in internal medicine and surgery and the latter in psychiatry.

Our hospital staff and consultants provide not only first class medical and surgical care, but also excellent and eagerly sought after training for young physicians. We always have more applicants for our residencies in internal medicine and surgery than we can accommodate.

Our School of Nursing and nursing department, of course, serve the institution from a psychiatric and a physical angle. Many of our staff nurses are recruited from those who affiliate with our Nursing School during their training period. We plan to increase the number of affiliate nurses during the early part of the next fiscal year. The attendant nurses and psychiatric aides are given a better insight into the importance of their role in the over-all care of patients by a training course under the supervision of a psychiatric nurse, who is assisted by members of our medical staff and psychology department.

The chief clinical psychologist returned from an educational leave last July, filled with renewed zeal and enthusiasm. Another clinical psychologist is presently on educational leave. More of the long-time residents of the hospital are being reached by the psychology department organizing garden clubs, current event clubs, staging birthday parties on the wards, and presenting other forms of entertainment to those who have been too indifferent or too disturbed to participate in the outside activities.

The occupational therapy and recreation departments are likewise expanding to the wards, with the help of the psychology department, student nurses, and ward attendants. In addition to the benefits directly derived from keeping the patients occupied, the program has also stimulated the attendants and heightened their interest in improving conditions on their wards. A wholesome rivalry has sprung up among them, each group vying with the other in efforts to make its surroundings more attractive and in improving the morale and comforts of its patients.

Dr. Yarbrough has for many years given supervision to the occupational therapy activities in the white male department, most of it being centered in the Boland Building and at the "Log Cabin", where patients engage in woodwork and growing roses, chrysanthemums, and other flowers of show type caliber. Equipment is being purchased to open a shop for woodwork in the Howell Building. Veterans' groups are interested in providing extras for the recently renovated building where veterans are housed, and the outfitting of an occupational therapy unit there would be most worthwhile and an excellent project.

As usual, the social service department is doing splendid work, in spite of the shortage of personnel. This department is to be commended for its willingness to offer assistance whenever and wherever called upon.

The statistical and narrative reports of the business department, including the farms and dairies, engineering, culinary, personnel, laundry, sewing rooms, and other divisions, are attached. We are grateful to these departments for their part in the progress of the hospital.

## RECOMMENDATIONS

It is the understanding of the business manager and superintendent that the State Hospital Authority is already empowered to issue revenue anticipation certificates in the amount of \$8,000,000. It is our recommendation that this authority be exercised for construction of buildings to remedy existing bad housing conditions in some places and to relieve overcrowding. We recommend the following construction as soon as possible:

Medical and Surgical Department for Colored Division.

Recreation Hall for Colored Division.

New dormitory type building for Colony 2.

Completion of improvements begun at Colony 1.

Housing for doctors and dentists and additional quarters to accommodate more medical students from the Medical College of Georgia.

Increased and improved laundry facilities.

More dormitory type buildings for white female division in particular and to relieve overcrowding in general.

1000-bed dormitory building to replace Dupree Building.

Other recommendations are:

Increased nursing facilities for the increased number of patients.

An 8-hour day for all personnel when finances will permit.

Increased salaries of professional personnel in order that trained persons may be obtained.

Respectfully submitted,

T. G. Peacock, M.D.  
Superintendent

July 2, 1956

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

Report showing Movement of Population for the fiscal year ending June 30, 1956 is submitted as follows:

Respectfully submitted,

(Mrs.) Mary H. Cook  
Registrar

July 1, 1956

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is a summary of the Jones Building activities for the fiscal year ending June 30, 1956.

During the year the Jones Building continued its function as a general medical and surgical unit of the Hospital, caring for the medical and surgical needs of the institutional patients and to a lesser extent for the medical and surgical needs of the employees and their dependents. Wards 3 and 6, with a bed capacity of approximately 55 beds each, continued to care for the most acutely ill female and male patients respectively. Breakdown of this care is as follows:

#### Care of Acutely Ill Patients

Patient Days		
Service	Jones 3	Jones 6
Medical	6,638	8,729
Surgical, Gen.	2,248	3,502
Surgical, Eye	148	
Surgical, Ortho.	2,246	1,620
Surgical, Gyn.	526	
Surgical, G-U	278	1,028
Surgical, Oral	96	
Obstetrical	443	
New Born	771	
Pediatric	247	
Totals	13,641	14,879
Grand Total		28,520 Patient Days
Average Census	37.4	41

Of these figures approximately 26% were non inmate patients, i.e., employees and their dependents.

These figures do not include approximately ten patients who are normally housed on Jones 3 as help patients.

The remainder of the wards in the Jones Building, with the exception of Jones 2 which is the male admission service and is not included in this report, served as convalescent wards for

those patients who had continued less acute need of medical or surgical attention. They are broken down as follows:

Ward	Bed Capacity	Use
Jones 1	64	Largely for care of female diabetics requiring more careful control than feasible elsewhere in the institution.
Jones 4	37	Largely chronic pediatric problems.
Jones 5	34	Convalescent male medical and surgical.
Jones 7	77	Convalescent female medical and surgical.

During the year, these wards have averaged 95% of capacity occupancy. A number of things are noteworthy from the year's progress.

This was the second year of our association with the Medical College of Georgia on a teaching basis. Six to eight third-year students were with us as part of their training in internal medicine throughout the school year. It is felt that their presence helps to insure our best efforts on behalf of the patient's needs. This program is felt to be very valuable both by the Medical College officials and by the Jones Building staff. This was the third year of our association with the Department of Medicine, Medical College of Georgia with the residency program. It is felt that the resident in internal medicine from the Medical College of Georgia makes a definite and worthwhile contribution to the over-all efficiency of the Jones Building.

The Jones Building staff has acted in the capacity of consultants for the colored male and female hospital services, regular visits being made to these services by our staff for assistance in care for patients on those services. One member of our staff has also been responsible for the medical care of the inmates of the Boy's Training School.

Including the medical resident from Augusta and the Radiologist some 12 physicians have been carried on the Jones Building staff. However, during the year, two of our staff have been away a greater portion of the year on academic leave. Dr. Gibson and I were at the Graduate School of Medicine, University of Pennsylvania for eight months during the year. Dr. Gibson was taking additional training in general surgery; I was studying internal medicine. At least two of our staff members are leaving us shortly after the first of the fiscal year.

Adequate consulting service has been available to the Jones Building staff in all specialties, and consultant visits have averaged approximately one daily. During this year additional consultant services in Internal Medicine and Neurosurgery were added.

A number of physical improvements were carried out in the Jones Building during the year, and the year is considered by the writer to have been generally satisfactory. Two auxiliary services housed in the Jones Building are submitting separate reports as their activities are utilized by the entire institution. These are the radiology department and the division of clinical laboratories.

The Outpatient Clinic functioned in caring for both inmates and employee patients not requiring hospitalization. The table of their report is as follows:

Total Number of Employee Visits .....	2849
Total Number of Outsider Visits .....	2572
Total Number of Inmate Visits .....	1017
New Employee Physicals .....	115
Bladder Irrigations .....	5
Diathermy Treatments .....	235
Toe Nail Removed .....	6
Warts Hyfreccated .....	128
Unna Boots .....	79
Biopsies .....	66
Cauterizations .....	8
Obstetrical Cases .....	693
Cancer Clinic .....	186
Dermatology Clinic .....	443
Plastic Surgery Clinic .....	12
Pediatrics Clinic .....	24
Total Number of Patients Visits in Outpatient Clinic .....	8438

This report is submitted by me in Dr. Gibson's absence — his academic leave not expiring until due date of this report.

Respectfully submitted,

Zeb L. Burrell, Jr., M.D.  
Assistant Medical Director

August 15, 1956

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Doctor Peacock:

The following pages contain the report of the Medical Department for the fiscal year beginning July 1, 1955 and ending June 30, 1956.

During the year three thousand, three hundred and eighty-three (3,383) patients were admitted. Of these, two thousand, six hundred and eighty-one (2,681) were first admissions and seven hundred and two (702) were re-admissions to this institution or from some other mental hospital. Fifty (50) patients were admitted by order of the court and forty-four (44) were transferred from Georgia State Prison at Reidsville and one thousand, nine hundred and fifty-one (1,951) returned from furlough.

A total of three thousand, nine hundred and twenty-five (3,925) patients was furloughed ( of this number one hundred and fifty-three (153) were trial visits ) and three hundred and thirty-two (332) were discharged as not insane, making a total of four thousand, two hundred and fifty-seven (4,257) released from the hospital. Of the number furloughed six hundred and eighteen (618) were recorded as restored; two thousand, eight hundred and thirteen (2,813) as improved and four hundred and ninety-four (494) as unimproved.

Nine hundred and thirty-four (934) patients died during the year. Cerebral Hemorrhage was the leading cause of death, one hundred and twenty-one (121) patients being reported as having died with this disease. Pneumonia ranked second with ninety-seven (97) and Chronic Myocarditis third with seventy-six (76).

There was an increase of one hundred and forty-three (143) in the population for the year.

We continue to make extensive use of electric shock therapy with good results. Three thousand, nine hundred and thirty-four (3,934) patients were treated and thirty thousand, seven hundred and twenty-six (30,726) treatments were given. Eight hundred and forty-nine (849) patients were reported as having been restored; two thousand, four hundred and twenty-three (2,423) were improved and six hundred and sixty-two (662) as unimproved.

Insulin therapy was used on two hundred and thirty-nine (239) cases, receiving a total number of one thousand and seventeen (1,017) treatments.

We have used to good advantage the tranquilizing drugs. Three thousand, two hundred and eighty-two (3,282) patients were treated and we are well pleased with the results from their use. Of this number two hundred and thirteen (213) were reported as having been restored; two thousand, four hundred and seventy-four (2,474) were improved and five hundred and ninety-five (595) as unimproved.

Several physicians have been added to our staff in the past year and we are glad to have them. We hope that our medical staff will continue to increase in order that we may be able to give patients more individual psychiatric care.

I wish to express my appreciation to you, Dr. Peacock, and members of the staff for their continued cooperation.

Respectfully submitted,

R. W. Bradford, M.D.  
Assistant Superintendent

## SURGERY AND TREATMENTS

Abdomino perineal resection of distal sigmoid colon and rectum .....	2
Adenoidectomy .....	18
Amputation of finger .....	5
Amputation of leg .....	14
Amputation of toes .....	9
Appendectomy .....	111
Bilateral oophorectomy and removal of endocervical cyst .....	1
Bilateral orchidectomy .....	1
Biopsy of breast .....	4
Biopsy of cervix .....	19
Biopsy of cervix and removal of endocervical polyp .....	1
Biopsy of gastrocnemius muscle .....	3
Biopsy of liver .....	3
Biopsy of penis .....	3
Biopsy of ramus of mandible .....	1
Biopsy of rectal mass .....	7
Biopsy of rib and lymph node anterior chest wall .....	1
Biopsy of supraspinatus muscle .....	2
Bunionectomy .....	1
Cesarean section .....	1
Cholecystectomy .....	3
Cholecystectomy and choledochotomy .....	2
Cholecystectomy, choledochotomy, and choledochography .....	1
Cholecystectomy, choledochography, exploration of common duct .....	1
Cholecystostomy .....	1
Circumcision .....	48
Complete removal of penis, scrotum, and urethra .....	1
Correction of contracture and full thickness skin graft to popliteal area and split thickness graft to left popliteal area .....	1
Correction of contracture and skin graft to popliteal area .....	2
Curettage of osteomyelitis .....	2
Cystoscopy .....	54
Cystoscopy and biopsy of bladder wall .....	3
Cystoscopy and removal of papillary urethral growth .....	1
Cystoscopy and retrograde pyelogram .....	14
Cystoscopy, retrograde pyelogram, and urethral meatotomy .....	1
Dilation and curettage, biopsy of cervix, and excision of Bartholin gland cyst .....	1
Dilation and curettage and cauterization of cervix .....	1
Debridement and closure of stitch abscess .....	1
Debridement and closure of stump of finger .....	2
Debridement and secondary closure of amputation .....	1
Debridement and skin graft to denuded area on sacrum .....	1
Debridement of finger .....	1
Dilation of cervix and instillation of radium needles .....	3
Dilation and curettage .....	15
Dilation and curettage, biopsy of cervix .....	11
Enucleation of eye .....	1
Evisceration of eye .....	2
Excision biopsy of axillary node .....	1
Excision biopsy of cervical node .....	3
Excision biopsy of inguinal lymph node .....	1
Excision biopsy of mass in axilla .....	1
Excision biopsy of mass in breast .....	2
Excision biopsy of mucous gland retention cyst .....	2
Excision biopsy of moles .....	7
Excision biopsy of skin lesion .....	4
Excision biopsy of supraclavicular node and biopsy of mass in breast .....	1
Excision of Bartholin gland cyst and biopsy of cervix .....	2
Excision of basal cell carcinoma .....	1
Excision of chalazion .....	3
Excision of cystic mass on vulva .....	1
Excision of exostosis .....	1
Excision of fibroma .....	1
Excision of fistulus tract, removal of necrotic bone graft and plastic re- pair of chin with pedicle graft .....	1

Excision of ganglion .....	1
Excision of hemangioma .....	1
Excision of lesion and full thickness graft to denuded area, finger .....	1
Excision of lesion and plastic repair of lower lip .....	1
Excision of lesion from buccal mucosa .....	1
Excision of lesion from foot .....	1
Excision of lesion from penis and circumcision .....	1
Excision of lesion from scrotum .....	2
Excision of lipoma .....	6
Excision of lymph node .....	3
Excision of malignant lesion from lower lip and radical neck dissection, tracheotomy .....	1
Excision of mass from arm .....	2
Excision of mass from scalp .....	1
Excision of nevus .....	2
Excision of occlusion cyst .....	2
Excision of olecranon bursa .....	2
Excision of olecranon process .....	1
Excision of palmar fascia and plastic repair .....	1
Excision of papilloma .....	1
Excision of pararectal fistulae .....	2
Excision of pedunculated mass on back .....	2
Excision of pilonidal cyst .....	2
Excision of polyp from vaginal vault .....	1
Excision of rectal polyp and cauterization of area .....	1
Excision of sebaceous cyst .....	17
Excision of skin lesion .....	15
Excision of supraclavicular node .....	1
Exploration and excision of fistulus tracts from region of ilium and curettage of iliac crest .....	1
Exploration of ulna nerve .....	1
Exploration arthrotomy and removal of organized hematoma and cartilage chip from knee .....	1
Exploratory laparotomy .....	7
Exploratory laparotomy, appendectomy and biopsy of cecal mass .....	1
Exploration laparotomy, aspiration of blood and fluid from peritoneal cavity and transverse tube colostomy .....	1
Exploratory laparotomy, biopsy of iliac node .....	1
Exploratory laparotomy, cholecystojejunostomy and biopsy of liver .....	1
Exploratory laparotomy, choledochojejunostomy, jejunojejunostomy and biopsy of pancreas .....	1
Exploratory laparotomy and drainage of appendiceal abscess .....	1
Exploratory laparotomy, gastrojejunostomy and biopsy of liver .....	1
Exploratory laparotomy, oophorectomy and appendectomy .....	1
Exploratory laparotomy, releasing of adhesions, choledocholithotomy, duodenocholedochotomy and biopsy .....	1
Exploratory laparotomy, releasing of adhesions, and drainage of gallbladder area .....	1
Exploratory laparotomy, releasing of adhesions, jejunostomy, transverse colostomy, and threading of tubing down small intestine .....	1
Exploratory laparotomy, releasing of adhesions, and resection of portion of ileum .....	1
Exploratory laparotomy, releasing of multiple adhesions, resection of portion of ileum, and biopsy of pelvic mass .....	1
Exploratory laparotomy, releasing of multiple obstruction secondary to adhesions of small intestine and deflation of small intestine .....	1
Exploratory laparotomy, releasing of obstruction and multiple adhesions .....	2
Exploratory laparotomy, releasing of obstruction and multiple adhesions and removal of diverticulum from jejunum .....	1
Exploratory laparotomy, releasing of volvulus, resection of sigmoid colon and temporary colostomy .....	1
Exploratory laparotomy and repair of ruptured liver .....	2
Exploratory laparotomy, uterine suspension and appendectomy .....	1
External fixation of mandible and anterior maxilla with Roger-Anderson pins .....	1
External fixation of multiple fractures of mandible with Roger-Anderson pins .....	3
External urethrotomy, suprapubic cystostomy and removal of foreign bodies from urethra .....	1

Full thickness skin graft to denuded area on thumb .....	1
Gastrostomy and tracheotomy .....	1
Hemithyroidectomy, right .....	2
Hemorrhoidectomy .....	4
Hemorrhoidectomy and excision of fissure in ano .....	1
Hemorrhoidectomy and sigmoidoscopy .....	7
Hemorrhoidectomy and sphincterotomy .....	1
Hemiorrhaphy .....	41
Hemiorrhaphy and excision of lesion and skin graft .....	1
Incision and drainage of abscess .....	27
Incision and drainage of hematoma .....	1
Incision and drainage of lymph node .....	1
Incision and drainage of pilonidal cyst .....	2
Incision and drainage of thrombotic hemorrhoid .....	4
Intertrochanteric bone plate to femur .....	1
Kirschner wire to elbow .....	1
Kirschner wire to thumb and skeletal traction to wrist .....	2
LeFort .....	3
Ligation of right femoral vein and artery and repair of auriculoventricular fistula .....	1
Ligation of saphenous vein, bilateral .....	1
Meatotomy .....	2
Multiple ligation and stripping of saphenous vein .....	11
Nasoplasty .....	1
Nasoplasty and submucous resection .....	1
Nephrectomy .....	1
Nephrostomy and pyelolithotomy .....	1
Oophorectomy .....	1
Open reduction and insertion of prosthetic femoral head .....	6
Open reduction and internal fixation of clavicle with steel wire .....	2
Open reduction and internal fixation of femur with Austin-Moore pins .....	3
Open reduction and internal fixation of femur with Rush pin .....	4
Open reduction and internal fixation of femur with Rush pin and silver wire .....	1
Open reduction and internal fixation of femur with Smith-Peterson nail .....	10
Open reduction and internal fixation of femur with Smith-Peterson nail and intertrochanteric bone plate .....	42
Open reduction and internal fixation of fibula with Rush pin .....	1
Open reduction and internal fixation of fibula with Rush pin and malleolus with SMO bone screw .....	1
Open reduction and internal fixation of humerus with Rush pin .....	3
Open reduction and internal fixation of humerus with Rush pin and olecranon with SMO bone screw .....	1
Open reduction and internal fixation of humerus with SMO bone screw .....	1
Open reduction and internal fixation of medial malleolus with SMO bone screws .....	1
Open reduction and internal fixation of olecranon with steel wire .....	1
Open reduction and internal fixation of radius with Rush pin .....	3
Open reduction and internal fixation of tibia with Rush pin .....	4
Open reduction and internal fixation of tibia with SMO bone screws .....	3
Open reduction and internal fixation of tri-malleolar fracture with SMO bone screws .....	1
Open reduction and internal fixation of ulna with Rush pin .....	1
Open reduction and internal fixation of ulna and radius with Rush pin .....	1
Open reduction of supracondylar fracture of femur, debridement of fracture site and internal fixation with Rush pins and Kirschner wire .....	1
Panhysterectomy .....	12
Panhysterectomy, left oophorectomy and bilateral salpingectomy .....	1
Panhysterectomy and left salpingectomy .....	2
Panhysterectomy, left salpingo-oophorectomy and appendectomy .....	2
Panhysterectomy and releasing of multiple adhesions .....	1
Panhysterectomy and right oophorectomy .....	1
Panhysterectomy and right salpingo-oophorectomy .....	1
Panhysterectomy and suspension of sigmoid colon .....	1
Panhysterosalpingo-oophorectomy .....	7
Panhysterosalpingo-oophorectomy and partial colectomy .....	1
Perineal prostatectomy .....	2

Pharyngoplasty .....	1
Phrenic crush .....	1
Proctoscopy .....	1
Prostatic biopsy .....	3
Radical mastectomy .....	4
Radical mastoidectomy .....	2
Radical vulvectomy with bilateral inguinal lymph node dissection .....	1
Reapproximation of pedicle graft to arm .....	1
Releasing of constricting bands from penis .....	2
Remanipulation of mandible and external fixation with additional Roger-Anderson pins .....	1
Removal of cataract .....	9
Removal of catheter from bladder and revision of cystostomy .....	1
Removal of cervical stump, repair of cystocele, rectocele and urethrocele and perineorrhaphy .....	3
Removal of endocervical polyp .....	2
Removal of Kirschner wire from mandible .....	1
Removal of lesion from nose and split thickness skin graft to denuded area .....	1
Removal of melanoma from sclera .....	1
Removal of nasal polyps .....	1
Removal of pterygium .....	4
Removal of Rush pin and curettage of tibia .....	1
Removal of Rush pin from femur .....	1
Removal of Rush pin from fibula .....	1
Removal of Rush pin, insertion of Steinman pin to femur, aspiration of fluid from knee .....	1
Removal of Rush pin from fibia .....	1
Removal of Rush pin from tibia, bone graft from iliac crest to tibia, ap- proximation of tibia and fibula with SMO bone screws .....	1
Removal of scars by excision and sand papering .....	2
Removal of Smith-Peterson nail .....	3
Removal of tattooing from arms .....	2
Removal of thumb nail .....	1
Removal of toe nail .....	4
Removal of ulna head and exploration of radiocarpal joint .....	1
Removal of wire from finger .....	1
Repair of dehiscence of abdominal wound .....	6
Repair of ectropion and full thickness skin graft to eyelid .....	1
Repair of hernia with fascia graft .....	7
Repair of hydrocele .....	5
Repair of laceration .....	24
Repair of laceration of eyelid and lacrimal duct .....	1
Repair of laceration and tendons .....	7
Repair of oromaxillary fistula and removal of nasal polyps .....	1
Repair of rectocele .....	1
Repair of secondary incisional hernia .....	1
Repair of spontaneous rupture of saphenous vein .....	1
Repair of suture line on face .....	1
Repair of umbilical hernia .....	3
Repair of urethrocele .....	1
Repair of urethral diverticulum .....	2
Repair of ventral hernia .....	3
Revision of radical mastoidectomy .....	2
Revision of scar tissue and previous skin graft and insertion of Kirschner wire to mandible .....	1
Revision of thyroid scar .....	1
Salpingectomy, right .....	1
Secondary closure of chest wound .....	1
Separation of middle and ring finger and skin graft to denuded areas .....	1
Sigmoid colostomy .....	1
Sigmoidoscopy .....	31
Sigmoidoscopy and excision of rectal fissure .....	2
Sigmoidoscopy and Whitehead .....	2
Sigmoidoscopy, excision of portion of abscessed ureter and reanastomosis of left ureter to sigmoid rectal bladder .....	1
Simple mastectomy .....	2
Skin graft to denuded area .....	6
Split thickness skin graft .....	4
Steinman pin to knee .....	1

Steinman pin and skeletal traction to calcaneus and tibia .....	1
Subtotal gastrectomy, gastrojejunostomy and excision of lesser omentum ....	1
Subtotal hysterectomy, bilateral salpingo-oophorectomy .....	1
Suprapubic cystolithotomy .....	1
Suprapubic cystostomy .....	5
Suprapubic cystostomy and application of radium needless to bladder wall...	1
Suprapubic cystostomy and prostatic biopsy .....	2
Suprapubic prostatectomy .....	2
Thoracostomy .....	1
Thyroidectomy .....	2
Tonsillectomy .....	42
Tracheotomy .....	4
Transurethral cystolithotomy .....	1
Transurethral resection .....	4
Transurethral resection of multiple bladder tumors .....	1
Transurethral resection of vesicle neck .....	1
Transverse colostomy .....	1
Tubal sterilization .....	93
Ureterolithotomy .....	3
Vaginal hysterectomy, perineorrhaphy, repair of cystocele, rectocele, and urethrocele, and culpectomy .....	15
Vas section .....	156
Vas section and cardiac massage .....	1
Wedge excision of lesion of lower lip .....	2
Wortheim operation .....	1
Whitehead .....	2
Winograd .....	9

Electric shock treatments .....	30726
Intramuscular treatments .....	3797
Intravenous treatments .....	1013
Patients treated with Duracillin .....	332
Patients treated with Insulin .....	239

## OCCUPATIONAL THERAPY DEPARTMENT MILLEDGEVILLE STATE HOSPITAL

July 1, 1956

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is the Annual Report of the Occupational Therapy Department for the fiscal year ending June 30, 1956.

This report finds the Occupational Therapy Department quite improved with the addition of three Occupational Therapy shops in the Rivers Building - one white female, one white male and one colored female. They also have their Builder editors and recreation indoors and outdoors. These patients seem to be much happier, and they desire a beauty shop. We have found everybody to be very cooperative in helping us get occupational therapy started in this building.

Two white female aides and one colored female aide have been placed in this building. Furniture has been bought and placed in each of these shops. This furniture was carefully selected in an effort to make the shops as attractive and comfortable as possible. They have been furnished with equipment for various types of work which the patients enjoy doing. We hope to have a Ceramics Department for these patients, which will be very helpful to this type of person as they are unable to do heavy work.

A paper is being printed weekly for the colored department and many patients are interested in writing for the paper. They do all their editing and reporting. This has created a lot of interest in the colored department.

We are buying equipment for the Howell Building Occupational Therapy Shop. We have a lot of patients who are badly in need of occupational therapy in this building. The patients will engage in woodworking and leather work, building and refinishing furniture, and other crafts.

The Boland Building Men's Department has expanded so much that we need more space. The shop is not large enough to take care of the number of patients who are in need of occupational therapy.

The Occupational Therapy Shop in the Washington Building is badly in need of more space and more equipment could be used in that shop.

Additional personnel is needed to reach the Cabaniss Building and the Whittle Building with occupational therapy and much more occupational therapy is needed on the wards when we have sufficient personnel. To enable the department to reach the patients needing occupational therapy, we require six additional female aides and six additional male aides.

The Occupational Therapy Department had a very nice exhibit at the fairs in Macon and Atlanta last year, where the work of the patients was displayed. They had first prizes in quilts and embroidery which were displayed on television and the patients enjoyed seeing the work. This year we hope to have more space for displaying their work and a larger quantity of articles to display.

There is attached hereto a list of paid invoices, amounting to \$13,113.78, for the year 1955-1956. The total of our receipts from sales was \$15,834.04 and a net profit of \$2,720.26 was made. Inventory of materials on hand is valued at \$3,726.25. There is also attached hereto a summary of monthly reports on the patients in the Occupational Therapy Department.

We are very much pleased with the progress of this department this year and there's much to be done and many more improvements to be made next year.

We appreciate very much the cooperation of Dr. Peacock, Dr. Bradford, Dr. New, Dr. Leaphart, and Mrs. Bonner and we are certainly glad to have Dr. Bailey back with us as Clinical Director in the colored Department. He has shown great interest in occupational therapy.

We wish to express our appreciation for the wonderful work and interest the ward girls and attendants have taken in the occupational therapy done on the wards. These people should be commended for the good work they're doing with psychiatric patients.

Mrs. Spivey and Mrs. Pennington have been a great help to occupational therapy. The student nurses contribute a lot to the department.

Respectfully submitted,

(Mrs.) Maude L. Boone

Supervisor of Occupational Therapy Aides

July 1, 1956

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

This is the Annual Report of the Recreation Department for the fiscal year ending June 30, 1956.

This past year has seen an increase in the entertainment program of the Recreation Department.

Programs for the patients were presented by Atlanta Symphony Orchestra, Third Army Variety Show, and a Talent Show was given by the patients. There have been several church groups to put on various programs in addition to the above. All of these programs were well received by the patients and all of the groups want to return.

We have continued to improve and expand the movie program. The 35mm movie is now being shown in the Bostick Building, which was occupied this year by the Colored Male Department. This makes a total of ten 35mm movies per week.

This past year also saw the establishment of a Colored Recreation Center. One of the pavilions was turned over to this department and is used by the Colored Department for the majority of events. The patients come to the Center to play cards, games, ball, and dance. This has enabled the Colored Department to expand its program.

In addition to the above, we have had our annual barbecues for the white and colored departments, as well as picnics and wiener roasts. Also, the various churches in Milledgeville held their annual Christmas parties for the patients.

The regular program at the Auditorium has shown an increase in the number of patients attending. Included in this program are movies, dances, Sunday School and Chapel, special musical programs for Christmas and Easter, basketball games, card parties and other forms of entertainment.

Respectfully submitted,

Bruce Prosser  
Recreation Director

Karl H. Rist  
Roentgenologist

July 30, 1956

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is the Annual Report of the Psychology Department for the fiscal year ending June 30, 1956.

In September, Mr. Robert Wildman was granted educational leave to complete his course work for the PhD degree at Western Reserve University. He is expected to return on August 1, 1956. This report includes his work from July 1, 1956 until his departure as well as that of the other three departmental members.

I would like to take this opportunity to thank you, Dr. Bradford, Dr. New, Mrs. Bonner and the many others who have so generously offered their assistance during the year.

Our research was responsible for two publications during the year.

Quay, Herbert, "The Performance of Hospitalized Psychiatric Patients on the Ego-Strength Scale of the MMPI.", Jour. Clin. Psychol., (October, 1955).

Rowell, John T., "An Approach to the Treatment of Massive Mental Hospital Populations", Mental Hygiene, (October, 1955).

In addition, one major and two minor research projects were completed but have not been offered for publication to date. The major research project is one of the largest undertakings of its kind in the history of the hospital and is designed to offer additional knowledge as to the nature of the schizophrenic process. Most of this work was accomplished on non-duty hours.

The routine work of the department is shown below:

I. Patients contacted	1955-56
A. Patients evaluated with	
Psychological Test	919
Rorschach	55
Wechsler-Bellevue	403
M.M.P.I.	510
H.T.P.	767

Bender-Gestalt .....	762
Kent E.G.Y. ....	325
Other .....	<u>296</u>
Total tests used .....	3,118

## B. Psychotherapy:

Patients seen in individual psychotherapy .....	15
Patients seen in group psychotherapy .....	182
Patients given activation, music and informal therapy .....	<u>2,076</u>

Total in Psychotherapy .. 2,273

Total patients contacted .. 3,192

II. Reports written ..... 1,049

III. Teaching staff, nurses and attendants (hours) ..... 81

IV. Research (Approximate hours used) ..... 257

The following is the results of our formal group psychotherapy for this year:

## FORMAL THERAPY

1955-56

## I. Patients in Individual, Group or Combined

## Psychotherapy:

## A. Patients continued from previous

year .....	35
New cases taken into program .....	<u>162</u>
Total .....	197

## B. Patients furloughed ..... 109

Improved .....	93
Unimproved .....	9
Too early to tell .....	7
Patients completed but still in hospital .....	25
Improved .....	20
Unimproved .....	5

Patients dropped but still	
in hospital .....	29
Improved .....	13
Unimproved .....	16
Worse .....	0
Too early to tell .....	0
Patients continued under	
treatment .....	34
Improved .....	17
Unimproved .....	9
Too early to tell .....	8

C. Summary of changes shown:

Improved .....	143	( 72%)
Unimproved .....	39	( 20%)
Worse .....	0	( 0%)
Too early to tell .....	15	( 8%)
Total .....	197	(100%)

One of the original goals of our activational program was to create a therapeutic atmosphere in which more concentrated psychotherapy could be accomplished. We feel that this is an accomplished fact on the White Female Service and that some progress is evident on the other services.

These activities were not designed for entertainment but directed toward therapeutic goals of group participation and have resulted in arresting the regressive process for most patients in those settings where used. In addition, hundreds have improved and many sufficiently for furlough. Unfortunately, this program is still too diluted for maximum effectiveness.

Members of the Department gave 77 hours of instruction to student nurses and attendants. A number of speaking engagements were undertaken both locally and in adjoining cities. In addition, staff members participated in three local and regional professional conferences.

Since the arrival of the first psychologist over five years ago, the Department has seen 525 patients for either individual or group psychotherapy. Many of these patients had been in the hospital for periods of five years or longer prior to this treatment. As of June 30, 1956, we are able to report a five year survey showing the following results of this phase of our work:

#### INDIVIDUAL AND GROUP PSYCHOTHERAPY

(Five Year Survey)

## A. Patients seen

White male .....	210	
White female .....	<u>315</u>	
Total .....		525

## B. Results

Now outside .....	331	( 63%)
Still here .....	<u>194</u>	( 37%)
Total .....	525	(100%)

Assuming that one-half of these discharges were attributable to group psychotherapy, this has resulted in a saving to the State of more than one-quarter million dollars per year in hospitalization costs.

In view of these results, it seems economically sound for the State to increase the treatment resources of the hospital so that every patient in need of psychotherapy is reached and returned to society as soon as possible.

## RECOMMENDATIONS:

- (1) An increase in personnel. We are now reaching only 15% of the total hospital population.
- (2) An adjustment in salary which will allow us to better compete with surrounding states for psychologists. At present there is a nation-wide shortage.
- (3) An improvement in housing.
- (4) A research program for the hospital.

Respectfully submitted,

John T. Rowell,  
Chief Clinical Psychologist

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is the Annual Report of the Affiliated School of Nursing and Nursing Service for the year ending June 30, 1956.

There has been one clinical instructor added to the personnel of the educational department of nursing during the past year.

Some changes have been made in the affiliate program. The students are now receiving two week's experience in the Freeman Building in the activational therapy and continuous therapy program. This experience is proving very beneficial and some students express a desire to stay longer in this building. The students are also assigned to recreational therapy for one week.

The course outline is as follows:

Basic Psychiatry .....	31 hours
Psychiatric Nursing .....	54 hours
Review of Psychology .....	6 hours
Formal Clinical Teaching .....	16 hours
Recreational Therapy .....	7 hours
Staff Conferences .....	10 hours
Orientation to Hospital .....	4 hours
Total Class Hours	128 hours
Informal Clinical Instruction (Approximately) .....	75 hours
Grand Total Hours	203 hours

The affiliation program and facilities have been expanded to accept students from another school. In July 1955, Georgia Southwestern College, Americus, Georgia began an affiliation. This makes a total of seven schools from Georgia affiliating here. These are as follows:

Georgia Baptist Hospital—Atlanta, Georgia  
Piedmont Hospital—Atlanta, Georgia  
Grady Memorial Hospital—Atlanta, Georgia  
Columbus City Hospital—Columbus, Georgia  
Macon City Hospital—Macon, Georgia

Warren A. Candler Hospital—Savannah, Georgia

Georgia Southwestern College—Americus, Georgia

During the year, 202 students completed the psychiatric affiliation program. The National Achievement Test in psychiatric nursing was given to each student.

In April, 1956, Mrs. Dorothy Ann Buffington, R. N., Educational Supervisor of the State Board of Examiners of Nurses for Georgia and the director and educational director of the affiliating schools met with the faculty to review the affiliation program. The annual survey of the facilities and the program was made also by the Educational Supervisor and a representative of the State Board of Examiners of Nurses for Georgia. The report of this survey has not been received.

The Educational Building has been completed. The offices of the Director of Psychiatric Nursing Education and the Clinical Instructors, as well as the library and classroom, are located in this new facility.

The faculty committee has been active during the past year, which has led to a better understanding between the educational department and the nursing service department.

The course for psychiatric aides has been revised. This course is designed to provide better care for patients through increased understanding on the part of the aides.

The time allotment for this course has increased from 100 hours to 106 hours, to be completed within one year's time.

In November 1955, 92 white and 68 colored attendants received certificates as psychiatric aides. We are encouraged over the attendant program, and much enthusiasm has been manifested.

The ward procedure book has been revised and 150 new copies have been placed on the wards.

The Assistant Director of Nursing was privileged to attend the Georgia State Nurses Association held in Augusta in November.

The Director of Nursing and Director of Psychiatric Nursing Education attended a meeting of the State Board of Examiners of Nurses for Georgia held in Atlanta in the Spring and also attended a State Faculty meeting and State Accreditation Conference in November of 1955.

Plans are under way with the University of Georgia Nursing Education Division to provide in-service courses which will give

credit toward a degree in nursing education.

In May, the Brantley Building (Nurses' Home), which has been completely renovated, was ready for occupancy and the temporary quarters in the Cabaniss Building were vacated.

It is very gratifying to see the transformation that has taken place in the Nurses' Home. Everyone is delighted with its beauty, comforts and conveniences, and I wish to express our appreciation to each one instrumental in helping to make this dream come true.

The Nurse's Alumnae of the Milledgeville State Hospital has purchased a handsome T. V. set as a donation for the living room of the Nurses' Home. This set is the first donation of this kind for nurses. The Alumnae also has plans underway to have a portrait painted of Mrs. Alice Cross Walker, now deceased, who was Superintendent of Nurses at the Milledgeville State Hospital when the school of nursing was organized. This portrait will be hung in the lobby of the Nurses' Home. We are justly proud of our Nurse's Alumnae Association and this generous contribution to our home.

In November 1955, the colored male patients housed in the Dupree Building and six small wooden buildings were transferred to the new Bostick Building. This relieved much of the overcrowded condition in the colored male department.

The medical and surgical wards have had a very busy year and have rendered excellent services.

The number of employees and outsiders admitted to the hospital for treatment in the past year are as follows:

White Female Employees .....	308
White Male Employees .....	265
White Female Outsiders .....	312
White Male Outsiders .....	93
Colored Female Employees .....	53
Colored Male Employees .....	30
Colored Female Outsiders .....	70
Colored Male Outsiders .....	6

The number of employees retired from nursing service in the past year are as follows:

White Women .....	0
White Men .....	4
Colored Women .....	2
Colored Men .....	1

New positions allocated for nursing service in the past year were as follows:

White Female Service .....	23
White Male Service .....	47
Colored Female Service .....	4
Colored Male Service .....	0

The following is a report of employees on duty in the Nursing Service Department:

Director of Nursing .....	1
Assistant to Director of Nursing .....	3
Director of Psychiatric Nursing Education .....	1
Psychiatric Clinical Instructors .....	6
Building Supervisors, R. N. ....	15
Surgical Supervisors, R. N. ....	3
Surgical Ward Supervisors, R. N. ....	2
Surgical Nurses, R. N. ....	3
Graduate Charge Nurses, R. N. ....	14
Staff Nurses, R. N. ....	14
Building Supervisors, Attendant, Female .....	6
Supervisors, Attendant, Male .....	2
Assistant Supervisors, Attendant, Male .....	5
Building Supervisors, Attendant, Male .....	7
Surgical Aide .....	2
Charge Attendant .....	358
Attendant .....	755
O. T. Aide (Needlecraft) .....	26
O. T. Aide (Woodwork) .....	4
Beautician .....	8
Matron, Nurses' Home .....	5
X-Ray Technician .....	6
Bus Driver .....	7
Maid (T. B. Service) .....	6
Clerical Worker .....	12
Students (Psychiatric Affiliates) .....	68

We are proud of the accomplishments of the nurses and attendants during the past year. I feel, that as a whole, good nursing service has been rendered. The devotion to duty and loyalty to the institution has been outstanding.

The staff members and I are deeply grateful for the consideration given and funds made available for nurses to attend conventions and important meetings of educational value.

I wish to thank you and your medical staff for services rendered the nurses and attendants, and for the assistance in

teaching in the psychiatric nursing and attendant programs.

I am deeply grateful to you for your support and confidence.

Respectfully submitted,

(Mrs.) Myra S. Bonner, R. N.  
Director of Nursing

## PATIENTS' LIBRARY

MILLEDGEVILLE STATE HOSPITAL

July 1, 1956

Dr. Thomas G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is the Annual Report of the Patients' Library for the fiscal year ending June 30, 1956.

Together with the purchase of a few books, donations from United Church Women and civic organizations, the Library has 10,415 books; whereas of June, 1955, there were 8,551.

We have had an abundant supply of magazines. These have been enjoyed by all.

The expense incurred during the past year consists of books purchased from Georgia News Company - \$140.54, Gaylord Brothers - \$33.75, Frontier Press Company - \$29.00, Readers Digest Association - \$4.88, and supplies from Fowler-Flemister Company - \$4.80 - making a total of \$212.97

We feel the need of a bookmobile to make the library more accessible to all.

We wish to express our appreciation to you and the entire staff for the interest manifested in our library.

Respectfully submitted,

(Mrs.) Frankie Simpson

Librarian

## ANNUAL REPORT

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

Report of the Social Service Department for fiscal year from July 1, 1955, through June 30, 1956, is herewith submitted.

The plan of obtaining case histories of patients upon admission remains the same; that is, whenever possible to make contact, relatives are interviewed at the time of admission of patient. When this is not possible, the next of kin or a representative is requested to come for personal interview. If none of the family can come, a questionnaire is mailed to next of kin or to the local office of the Department of Public Welfare.

During the fiscal year, the following outlines the means by which histories were obtained:

Case Histories made from interviews .....	1,939
Case Histories summarized from questionnaires .....	1,575

It should be stated that all case histories of negro patients are obtained by questionnaire, and these are included in the 1,575 reported above.

All medical references that can be obtained both by interview and by questionnaire are communicated with for collateral information. These references are attending Physicians, hospitals, governmental agencies, et cetera

In event of conflicting information in a history, special investigation is made by the Chief Medical Social Worker. She also makes such personal investigation where information has not been otherwise obtainable, or when there are conflicting statements in the history and patient is being considered for diagnosis or furlough.

The Chief Medical Social Worker has cooperated with the Alcoholics Anonymous here by furnishing this Chapter a daily list of alcoholics who have been released.

The Chief Medical Social Worker is on call as public and/or

family relations counselor in cases of personal problems. These are termed "service cases" and are included in that classification which is summarized as follows:

There were 1,446 service cases during the year, in which assistance was rendered in the matter of social security benefits, other claims, family relationships, insurance, matters of estate, compensations, pensions, restoration of civil rights, et cetera, and requested conferences with patients, both in Hospital and on furlough.

The Chief Medical Social Worker also personally handled:

Service cases representing furloughed patients, et cetera .....	1,446
Placements of patients (Job placement and others) .....	61
Transfers to other institutions .....	52
Out of town supervisory visits .....	102
Special investigations on instruction of Superintendent .....	14
Arrangements for glasses .....	140

Special Services handled by Chief Medical Social Worker:

Cases requiring help under State Medical Aid for admission to University Hospital, Augusta, for special treatment.

Assistance to Clinics in Atlanta and Augusta in the matter of rehabilitation programs for alcohol addicts.

Arrangements made for transfer of out of State patients.

Supervision of the patients on job placement is maintained by Chief Medical Social Worker with some assistance from other agencies.

Excellent cooperation continues between the Vocational Rehabilitation Division and the Milledgeville State Hospital. The present plan is for all cases to be referred by the Medical Staff to the Social Service Department for referral to the counselor who calls weekly, and/or upon request, to assist in rehabilitation services. Six cases were so placed during the fiscal year.

Beginning in January, 1953, we inaugurated a "Pilot Project" in connection with the State Department of Public Health. The counties numbered nine at end of last fiscal year. This year two

counties have been added, Elbert and Harris, so that now the following counties are participating in the project: Jones, Tattall, Dodge, Wilkinson, Johnson, Toombs, DeKalb, Muscogee, Baldwin, Harris and Elbert. It is felt that this project is a very worth-while undertaking.

Pilot Project contacts, including clinical abstracts,  
and service cases ..... 763

During the year, twenty-four babies were born to patients in this Hospital, for whom suitable placement plans were made or are in process of completion. Some were placed with relatives; others in foster homes. In some of these placements, we have had the cooperation of the County Department of Public Welfare and/or Child Welfare Consultants.

The interest of the churches has considerably broadened. The local churches, Presbyterian, Episcopal, Methodist, Baptist, Christian, Jewish, Catholic, and Church of God, with financial aid from their State organizations, have established the custom of giving lovely parties at Christmas. Also, they send gifts and money at Christmas for patients who are never otherwise remembered. The Episcopal, Presbyterian and Catholic Churches give picnics in summer for patients of their Faith. In these activities, they are assisted by the Chief Medical Social Worker:

Other benevolent activities include contributions of gifts and money by individuals, business firms, civil and fraternal organizations at Christmas for the less fortunate patients above mentioned. There were 916 such donors last Christmas, the number of gifts being too great to attempt an estimate. In addition, \$4,368.90 in cash was contributed to the Hospital by 448 donors for the Hospital Christmas Fund, which was distributed by a committee of the Hospital staff. An increase in interest is shown by the growing number of gifts and cash contributions received each year.

The local churches also, throughout the year upon requests of this Department, responded with clothing for those patients who need such assistance on being furloughed, and sometimes with cash to aid such patients returning to employment who need funds to "tide over" until they become self-sustaining. In this connection, the following should be mentioned:

The United Church Women of Georgia and St. Lydia's Chapter of St. Philip's Cathedral, Atlanta, have established a "revolving fund" for use of patients without resources who are returning to employment, or other placement situations. The response from

this group of women has been very gratifying and the fund has provided patients with living expenses until they became self-sustaining. Also, several individuals have contributed to this fund.

The United Church Women have also volunteered to help the patients in many other ways. They have assisted by obtaining several television sets for the Hospital. They have sent baby carriages, strollers, toys, fruits and candies for the infants and children here, and have sent magazines, books and church publications to the Patients' Library. They send friendship cards throughout the year to patients who have no one to remember them.

The Church Women have sent musical recordings for the Recreation Department, material for handcraft, bulbs of all kinds. They have presented various entertainments for the patients during the past year including a Christmas Program; Valentine Program; several variety programs which included dancing, puppet shows, readings, group singing, et cetera; The Atlanta Symphony Orchestra; the Third Army Band; and the Shrine Chanters.

In addition to the many activities of the United Church Women above enumerated, it is their plan to establish a volunteer program similar to "The Gray Ladies", if and when such a plan can be worked out.

The Jaycees, the Mental Health Association of Georgia, the United Church Women, and the families of several patients have contributed televisions to the wards. We now have a total of 107 televisions in the hospital, and a total of \$1,397.00 was collected for this cause.

The Garden Clubs over the State have contributed generous supplies of bulbs and plants.

Nurseries and individuals have also made fine contributions of quality bulbs.

The American Association of University Women has made large contributions of books of modern fiction, historical novels, biographies, current magazines and other reading matter for the Patient's Library.

This Department is the Hospital's liaison with various organizations, such as the Garden Clubs of Georgia, American Association of University Women chapters, United Church Women of Georgia, et cetera.

During the past year, the Junior Woman's Club, Milledgeville, Georgia, has had as their No. 1 Project the Children of the Hospital. At least twice a month, this group has sponsored

entertainments and other training and educational activities.

The Social Service Department has worked with the Veterans Administration in obtaining serial numbers for the Contact Representative and in cases where assistance was needed from this department.

As a result of the new amendment to the Social Security Act which permits a "freeze" of patient's benefits while they are patients here, the Social Service Department has sent out 290 abstracts. It is expected that the service to the Social Security Administration will further expand as a result of a recent amendment to the Social Security Act which permits benefits to be paid to women at the age of sixty-two and lowers the age for disability payments.

The United Church Women are planning to adopt day rooms on the wards. It is their intention to completely furnish these day rooms with suitable furniture, radios, televisions, games, et cetera. To date, Mr. and Mrs. L. L. Austin, Atlanta, Georgia, have completely furnished a day room on Freeman 3 with modern and attractive furniture of heavy cast aluminum with excellent quality upholstering and wrought-iron tables. It is of exquisite taste. The patients are enjoying it very much, and it is our intention to use this as a model.

Respectfully submitted,

(Mrs.) Claire S. Callaway  
Chief Medical Social Worker

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is a report from the Dental Department for the year 1955-1956.

The year's dental program has been successfully carried out through the conscientious efforts of the staff to meet all the dental needs of the patients at the hospital.

Of importance was the addition of a new wall-type X-ray machine and an autoclave which has been very beneficial to the clinic.

The Dental Director continues to cooperate with the psychiatric and training course by lecturing and showing slides to the attendants enrolled in this course. This helps to promote the dental hygiene program at the institution.

The Central District Association honored Dr. George Green for his forty-five years of outstanding service in the Dental Department by presenting a bronze plaque to Dr. Peacock. This plaque is to be placed in the entrance to the Dental Clinic.

At the present time there are five dentists, three oral hygienists, and three laboratory men—one of whom is a patient.

The Dental Department has carried out 39,828 operations and treatments and 9,490 laboratory operations during the year.

Respectfully submitted,

J. B. Herndon, D. D. S.  
Director of Dental Services

Judge Alan Kemper, Director  
 State Department of Public Welfare  
 State Office Building  
 Atlanta 3, Georgia

Dear Judge Kemper:

In accordance with custom and law, the following annual report is submitted on the part of the Administrative Department for transmission by you to the Governor and Members of the General Assembly.

In furtherance of the progressive program of improvement and modernization of the Milledgeville State Hospital, Governor S. Marvin Griffin, the General Assembly, the Social Security Board, and the Welfare Department approved and allocated funds for the following projects during the fiscal year 1955-56:

1. THREE HUNDRED, TWENTY-FIVE THOUSAND DOLLARS (\$325,000.00) FOR WATER PLANT IMPROVEMENTS.

This will provide for the renovation and enlargement of the present water plant and the construction of an additional water line from the pumping and filtration plant on the Oconee River to the State Hospital reservoir. As of this date, the pumping capacity of 2,500,000 gallons is utilized fully by the Hospital and at times the Institution has experienced water shortages.

2. RENOVATION OF T. O. POWELL BUILDING.

Funds in the amount of One Million, Five Hundred Thousand Dollars (\$1,500,000.00) were allocated for the renovation of the T. O. Powell Building, commonly referred to as the Center Building, which is the oldest building on the Hospital grounds. When this renovation is completed, this building will be completely fireproof and modern in every respect. In renovating the Powell Building, it was necessary to provide a new location for the telephone exchange. Funds were included in the contract to renovate the Powell Building to remodel the institution post office and one-half of this building is being used to house the telephone exchange. This one-half of the building is air-conditioned and dust proofed, which is necessary for the efficient operation of the dial system.

3. EQUIPMENT VETERANS' HOME.

Fifty Thousand Dollars (\$50,000.00) were provided for

equipping the Cabaniss Building, which has been designated as the Veterans' Home. This building was dedicated on November 1, 1955. The Governor and other State House officials, along with representatives from the various Veterans organizations throughout the State, attended the dedication.

#### 4. REPAIRS TO STEAM BOILERS.

Funds in the amount of One Hundred Thirty Thousand, Seven Hundred Sixty-one Dollars (\$130,761.00) were allocated for repairs to the steam boilers at the central heating plant. These funds are being used to repair existing boiler settings and re-tube the boilers.

#### 5. ELECTRICAL SYSTEM.

Twenty Eight Thousand, Eight Hundred Sixty-nine Dollars (\$28,869.00) were allocated to make necessary improvements and enlargements of the electrical system.

#### 6. NEW LAUNDRY.

Three Hundred Fifty Thousand Dollars (\$350,000.00) were provided for constructing and equipping a new laundry which will be used in conjunction with the existing laundry. This is needed because of the steady increase in patient population and inability of present laundry to supply demands made on it.

#### 7. SERVICE STATION.

Due to the increase in the number of motor vehicles, heavy construction and farm equipment, funds in the amount of Ten Thousand Dollars (\$10,000.00) were allocated for the construction of a service station to properly service, grease and maintain expensive automotive, heavy construction and farm equipment, and like items of equipment.

The over-all cost of maintaining a patient (including donated commodities and farm products valued at market price) increased during the year to \$2.40 per patient day - an increase of 12¢ per day. Net cost to the State for maintaining a patient was \$2.04, or an increase of 5½¢ per day over the last fiscal year.

This cost compares with Saint Elizabeth's Hospital, Washington, D. C., of \$5.63; Eastern State Hospital, Tennessee, of \$1.81; East Mississippi State Hospital of \$1.95; Alabama State Hospital of \$1.73; Huntington State Hospital, West Virginia, of \$1.87; Florida State Hospital of \$2.26; Bangor State Hospital, Maine, of

\$2.91; Eastern State Hospital, Oklahoma, of \$1.90; Pontiac State Hospital, Michigan, of \$3.94; New Jersey State Hospital of \$1.26; Napa State Hospital, California, of \$3.66; Rusk State Hospital, Texas, of \$2.88; and South Carolina of \$2.18.

You will find outlined below a statement showing funds allocated for the ten year period ending June 30, 1956:

YEAR ENDED		MAINTENANCE	OUTLAY	TOTAL
6-30-47	**	\$ 3,265,048.28	\$ 580,141.22	\$ 3,845,189.50
6-30-48		3,052,574.35	899,082.25	3,951,656.60
6-30-49		3,656,817.69	880,826.83	4,537,644.52
6-30-50		4,788,343.22	706,303.06	5,494,646.28
6-30-51		5,259,800.80	879,750.00	6,139,550.80
6-30-52		6,380,849.44	2,135,025.00	8,515,874.44
6-30-53		7,926,413.17	1,825,803.84	9,752,217.01
6-30-54		7,517,070.07	271,159.88	7,788,229.95
6-30-55		8,593,548.52	261,367.41	8,854,915.93
6-30-56		10,297,130.00	672,936.57	10,970,066.57
**	State Hospital Authority		\$525,000.00	

During the 1956 Session of the General Assembly of Georgia, a law was passed requiring prospective employees to have a complete physical examination prior to their employment. Plans for the enforcement of this law are being worked out by the Merit System and Hospital personnel and will be released in the near future.

Your attention is invited to more detailed information contained in reports from various divisions of the Administrative Department which are incorporated as a part of this annual report.

With knowledge that many of the following recommendations are impossible of fulfillment at the present time but can be consummated in the future; that they are worth-while projects for the consideration of Governor Griffin, the General Assembly, Social Security Board and the Welfare Department; that, if they are carried out in the proper manner, the taxpayers of Georgia can justly be proud that they have adequately provided for the citizens of Georgia who cannot provide for themselves - in obedience to that biblical question "Am I my brother's keeper?", and also in accordance with Saint Paul who wrote "And now abideth faith, hope, charity, these three; but the greatest of these is charity"; the following recommendations are submitted for your consideration:

#### 1. BUILDING PROGRAM.

That in accordance with the Act of the General Assembly of Georgia of 1951, page 22, sufficient revenue anticipation certificates, up to a maximum of Eight Million Dollars (\$8,000,000.00), authorized by said Act, be

issued in order to relieve overcrowded conditions in patient housing and dispose of the remaining fire traps and substandard housing for patients. We concur in the recommendation of the Superintendent in reference to the building program. Attention is called specifically to the following substandard buildings and facilities now housing patients or being used by the Institution:

- A. 28th Ward - Colored Male - housing 76 patients.
- B. 38th Ward - Colored Male - housing 70 patients.
- C. M Ward - White Male Senile - housing 62 patients.
- D. 10th Ward - White Male (Farm and garden) - housing 226 patients.
- E. 14th Ward - White Male (Yard crew) - housing 89 patients.
- F. Colony No. 2 (State Farm) - Colored Male (Farm) - housing 110 patients.
- G. Dupree - Colored Female Dormitory - housing 525 patients.
- H. Old Colored Building Kitchen  
Now being used to cook for Dupree Building.  
Kitchen one of the oldest buildings left at Institution.
- I. Last, but not least in the list of new construction needed, is the necessity for a sewage disposal system. At the present time raw, untreated sewage is dumped in the creek and river and, perhaps, poses a serious threat to the health of the inhabitants of this Institution and citizens in surrounding areas.

Candor compels the undersigned to call to your attention that new buildings and facilities will necessitate additional personnel and additional allocation of funds for maintenance (which may be covered by enactment of recommendation No. 4).

## 2. ESTABLISHMENT OF HONOR PRISON CAMP AT HOSPITAL.

Preliminary plans were drawn in the previous administration and fee paid to architects, Gregson and Ellis, for a building for the proposed camp to be set up for carefully screened honor prisoners to be used in jobs now performed inefficiently by patient labor.

That a minimum of 500 honor prisoners be housed at the Institution to be used in the cannery, bakery, warehouse, abattoir, farms, dairies, kitchens, fruit and vegetable growing and processing, and in other fields where patients labor is unsuitable and unreliable. Such prison labor not

to replace any hired labor in any facility (nominal additional maintenance funds will be required in the beginning but the value of the products produced by such inmates of an honor camp will offset the cost of maintaining them at the Institution and reduce items normally purchased).

### 3. ADDITIONAL PERSONNEL FOR ENGINEERING DEPARTMENT.

At a time when the Hospital has been undergoing its greatest expansion, the Engineering Department had the smallest increase of personnel of any Department. In the period 1949 - 1956 only 30 employees or a mere 27.3% increase as compared to an increase of personnel in Colored Female Medical Department of 102.6% or 117 employees; compared to 185.3% increase in technical medical personnel or 76 employees; compared to 144.5% increase in medical staff or 39 employees; compared to 64.8% increase in White Female Medical Department or 225 employees; and similar increases in other Departments.

During this period of expansion and improvement, approximately Eight Million Dollars (\$8,000,000.00) have been expended for construction of one-3 story building housing 704 patients; four, 1,000-bed each, single story buildings for housing patients; one of the largest warehousing units of any institution in the United States; the most modern abattoir in the Southeast; a new dental clinic; new broiler and egg project buildings; and new personnel dwellings.

In addition approximately One Million, Five Hundred Thousand Dollars (\$1,500,000.00) were expended for major repairs, renovation and modernization of the Brantley Building (Nurses' Home) and the Cabaniss and Whittle (Twin) Buildings.

Of a 782 increase in personnel during the period 1949 - 1956 - 619 additions were approved for the Medical Department and only 163 for the Administrative Department, which includes engineering, farming, warehousing, sewing, laundry, police, steam plant, water plant, et cetera. No criticism of the Medical Department is intended by this reference as the undersigned was convinced that the Medical Department had more urgent need of additional personnel than the Administrative Department at that time.

### 4. MAINTENANCE FUNDS - \$3.00 MINIMUM.

That the General Assembly set up a goal of providing

funds for maintenance operations at the Milledgeville State Hospital of a minimum of \$3.00 per patient day instead of the present \$2.04 allocated or used at the present time.

#### 5. PURCHASE OF ADDITIONAL LAND - SALE OF HOSPITAL LAND.

That the Hospital, or proper State Authority, be authorized to purchase additional lands to produce feed, forage, and other crops to be used by human and animal population.

That an increase of at least three per cent per year in patient population can be anticipated on the basis of past records, which increase amounts to approximately 400 additional patients to be cared for each year.

That there may be valid and compelling reasons for sale of valuable lands owned by the Hospital on the outskirts of the City of Milledgeville in order that the city may develop and continue to grow. Funds from the sales of these lands to be used to purchase less expensive lands for general farming, dairying, and livestock purposes.

#### 6. BEEF PRODUCTION, MILK PRODUCTION, ET CETERA.

That the Milledgeville State Hospital be authorized to set up a pilot herd of beef cattle in order to determine the cost of producing beef at the Institution, in comparison with that purchased outside.

That milk production, when funds are made available, be increased to a minimum of 2,000 gallons per day instead of the approximately 1,100 gallons per day.

That consideration be given to raising turkeys; increasing the production at the broiler and laying plants; and the possibility of establishing breeding flocks to supply eggs for hatching - to supply both broiler and laying projects.

#### 7. PLANTING OF ORCHARDS AND VINEYARD.

The most expensive items of food at the Hospital are jams, jellies, pie peaches, dessert peaches, pears, and other like items generally produced and packed without the confines of the State of Georgia - the major part in California.

For the last two fiscal years a total of \$491,308.41 were spent for such items.

The Hospital has in its employ a Horticulturist and sufficient labor force to man such a project, which can provide useful occupational therapy for patients at the Institution and a lucrative trade or profession for prisoners after their release, if they are instructed in the mechanics of planting, cultivating, harvesting, canning, quick freezing or processing products of orchards and vineyards.

Present canning facilities located in the new warehouse are the largest and most modern of any like institution and can handle an enormous amount of such processing.

8. EQUALIZATION OF SALARIES OF EMPLOYEES OF MILLEDGEVILLE STATE HOSPITAL WITH SALARIES OF OTHER STATE PERSONNEL WITH LIKE DUTIES AND LIKE JOB DESCRIPTION.

For example - Chief Institutional Engineer at the Milledgeville State Hospital with pay scale of grade 28, top compensation \$650.00.

Present Engineer is a graduate of West Point and must of necessity have a working knowledge of all branches of engineering - civil, mechanical, electrical, et cetera - since he is presently provided with only one assistant engineer. Compare his salary to pay scale of Office Engineers in other State Agencies with pay grade 33, top compensation \$935.00; in comparison with Senior Physician (Psychiatry - Displaced Person) on Hospital payroll, presently in grade 29, top compensation \$700.00.

For example - Food Processing Supervisor at Battey State Hospital with approximately the same duties as Chef at the Milledgeville State Hospital, but considerably less responsibility, is in pay grade 26, top compensation \$565.00, compared to Chef at the Milledgeville State Hospital who is in grade 24, top compensation \$485.00.

9. THAT THE MILLEDGEVILLE STATE HOSPITAL REMAIN UNDER SUPERVISION AND CONTROL OF THE WELFARE DEPARTMENT INSTEAD OF BEING TRANSFERRED TO THE SUPERVISION OF THE HEALTH DEPARTMENT.

Without odious comparison, your attention is respectfully called to the fact that the Milledgeville State Hospital feeds, clothes, shelters and furnishes medical treatment to 794 tubercular insane patients at a cost of \$2.94 per patient day as compared to cost of treatment of sane person at Battey Tubercular Hospital of \$5.84 per day.

(Frankness compels us to state that the inherent economy of size is responsible in a large measure for this differential in cost.)

#### 10. ROADS.

That the Director request the Governor to ask the Highway Department to make a comprehensive survey of the grounds of the Milledgeville State Hospital and consider additional paved roads and sidewalks, in order that lands for planting shrubbery to beautify the grounds can begin at the proper point. An estimate of Fifty Thousand Dollars (\$50,000.00) to One Hundred Thousand Dollars (\$100,000.00) will be needed for this project.

#### 11. LIABILITY AND PROPERTY DAMAGE INSURANCE.

That some legal means be provided by the General Assembly whereby the Hospital may pay premiums on liability and property damage insurance carried by employees of the Hospital, whose principal duty includes the operation of State owned vehicles and motorized equipment.

#### 12. RECREATION AND OCCUPATION THERAPY - VETERANS.

That the old kitchen, formerly used by patients of the Twin Buildings but unused since the renovation of the Twin Buildings, be offered to various Veterans organizations in the State of Georgia to be developed as a recreation and occupational therapy unit for the use of Veterans housed in the Veterans' Building. The renovation and utilization of such building to be at the expense of such Veterans groups. The Hospital to furnish no funds and title of property to remain with the Hospital.

#### 13. ADDITIONAL TECHNICAL AND PROFESSIONAL PERSONNEL.

That qualified personnel be employed to do tree surgery work; that a Chemist or other qualified personnel be employed to make routine checks on the quality of foods, textiles and other merchandise or equipment purchased for use by the Milledgeville State Hospital.

With the sincere appreciation and thanks of the Administrative Department to Dr. T. G. Peacock, Superintendent; Dr. R. W. Bradford, Assistant Superintendent; and all other Department Heads and employees of the Medical Department for their unselfish cooperation in dealing with problems in the Administrative Department; with thanks to the State Department of Education -

Food Distribution Section, and the Georgia State Agency for War Surplus Commodities for furnishing \$774,847.99 in food supplies and thousands of dollars' worth of equipment and material needed; with thanks and appreciation to State Auditor, Mr. B. E. Thrasher, and Mr. C. A. Doolittle, Director of the Division of Business Administration, State Department of Public Welfare, who render services to the State and to the Hospital - sometimes beyond the call of duty - even though we cannot understand governmental accounting, we recognize their value as public servants; and to all other individuals who contributed to the progress of this Institution, we extend the appreciation of the Administrative Department.

Sincerely yours,

Joe Boone

Institutional Business Administrator

Mr. Joe Boone  
 Institutional Business Administrator  
 Milledgeville State Hospital  
 Milledgeville, Georgia

Dear Mr. Boone:

The following is the Annual Report of the Farm and Dairy Division for the year ending June 30, 1956.

During the fiscal year the Farm and Dairy Division produced \$1,956,614.24 worth of farm and dairy products at a net cost of \$1,250,012.81, showing a net profit of \$706,601.43. The Farm and Dairy Division covers all the production units engaged in growing and processing farm products and is broken down into various units as follows: Abattoir, Cold Storage, Farm, Cannery, Broiler Project and Egg Project. Our over-all operation for this year showed a profit of \$289,503.38 as compared to last year's figure of \$100,208.71.

The Egg Project is presently producing approximately 1,521 dozen eggs per day and during the fiscal year we saved the State \$118,535.23, which was the net profit for this project. During the year we graded the land on which the Egg Project and Broiler Project are located. Buildings at these projects were so situated that when it rained water would seep into the buildings. By grading and removing quite a bit of dirt, we were able to remedy this situation. The fences, which were constructed around the Broiler Project, have served a very good purpose in keeping unauthorized persons off the property. We grew out two (2) additional houses of cockerels—11,000 birds—which were given to the State. The vents constructed on the buildings at the Broiler and Egg Projects were very effective during the hot summer days this year in that they provided better ventilation for the birds. We have continued our Forestry Program during the past year, and we feel that much progress has been made and that our timber resources are in a much better condition than they were last year. Practically all of our timber land has been thinned and this timber has been sold to pulpwood companies for approximately \$25,000.00. We have constructed additional roads and firebreaks for better protection of our growing trees.

During the fiscal year, we have processed and canned 75,755 No. 10 cans of fruits and vegetables valued at \$102,779.00, as compared to 56,186 No. 10 cans, valued at \$69,345.00, which were processed last year.

We have constructed three (3) additional farm ponds, making a total of six (6) ponds. These ponds will be used for irrigation purposes. Coastal bermuda grass has been planted on the dams

and sprigs from this grass will be used for developing additional pastures.

We have practically completed the new brick dormitory for patients at Colony Farm No. 1. Funds have been provided by the State Welfare Director, Judge Alan Kemper, for the construction of another dormitory. We have completed the construction of a modern greenhouse at the Hospital which will be used by the Horticulturist in his work with flowers and in growing plants for the farms. Construction was begun on two (2) dwellings which will be used by Hospital personnel. These buildings are being constructed by prison labor at quite a saving to the State.

During the fiscal year prisoners were used in the bakery for the first time, and we were informed by Mr. A. C. McDade, Chef, that these prisoners have done a remarkable job for him and he has requested additional prisoners. We have also placed prisoners with Mr. Irvin B. Vann, Chief of Sanitation, to assist him in his department. Prison labor was used to irrigate lands cultivated by Institution personnel.

Additional hog pens have been constructed and we now have approximately 2,000 feeder hogs which are being grown out on Hospital garbage. During the year we slaughtered 1,417 hogs from our herd of feeder hogs. Grounds around the new abattoir were graded.

Two (2) silage pits were completed, and a third one started, this year. The dairy at Colony Farm No. 1 was moved to Colony Farm No. 2. A new dairy will begin operation at Colony Farm No. 1 when our artificially bred heifers come into production. The two (2) dairies at Colony Farm No. 2 are being operated under the supervision of Mr. John O'Steen, Dairy Supervisor. The reports for these dairies indicate that we are milking 486 cows at the present time and have 172 dry cows. We have 100 open heifers and 171 heifers ranging in age from three months to ten months. We have 70 steer calves on pasture which we will feed out and slaughter. The results of the Bangs and Tuberculin tests during the past year indicate that all our cows are free of tuberculosis. We have 84 cows that reacted from the Bangs test but were adult vaccinated. 35 reactors have been slaughtered since July 1, 1955. 560 cows were artificially bred by Mr. O'Steen. 65% of these settled on first service, 30% settled on second and third service and 5% were hard breeders. The practice of raising dairy calves in individual pens was begun at Colony Farm No. 1. At the time of this report, we have approximately 40 artificially sired dairy calves on this farm. We believe our dairy program will compare favorably with that of any State Institution. Adult cows in our herd are on the Dairy Herd Improvement Association Program and

the individuals which are below average in production are being eliminated from the herds. Calves from these low producing cows will be slaughtered instead of being put back into the herd for replacements.

At the close of this fiscal year we had a large quantity of corn, oats and other dairy type feeds which were produced on the farms, and it will not be necessary to requisition any dairy feed for several months. This should mean a considerable saving since our quarterly purchases of dairy feed average approximately \$30,000.00. We have produced thirty tons of alfalfa hay on the acreage we seeded last year. This is more than enough to compensate for all seed, fertilizer, et cetera, used in seeding this alfalfa.

During the year enough corn was produced on the farms to provide dairy feed, meal, grits, et cetera, used at the Hospital, and enough corn was produced to take care of the needs at the Egg Project.

For your further information, we refer you to the financial reports of the Farm and Dairy Division which are a part of this report.

Respectfully submitted,

John A. Smith, Superintendent  
Farm and Dairy Division

Mr. Joe Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

I herewith submit my annual report for the Personnel Division at the Milledgeville State Hospital for the period from July 1, 1955, through June 30, 1956.

January 1, 1956, the Pay Plan covering positions under the Merit System was amended by deleting the first step of each compensation grade and adding the next integrated step to the end of each of the present grades. The salary of no employee was increased as a result of this adjustment except those employees whose salary was below the new minimum salary of the new compensation grade for the class. All employees who had reached the top of their salary range prior to the adjustment received a salary increase on April 1, 1956.

For the year covered in this report, we had 299 separations as follows: 9 retired, 15 deaths, 56 dismissed, 216 resigned and 3 transferred to other state agencies. We had 420 appointments. This is a turnover in personnel of approximately 15%.

We had a total number of employees as of July 1, 1955, of 1926 and at close of business June 30, 1956, we had 1991 employees. During this fiscal year we processed personnel actions effecting 200 transfers, 135 promotions, 57 demotions, 63 leaves of absence and 52 returns from leave of absence. New positions created for the Hospital during this period amounted to 99.

A total of 202 Student Nurses affiliated at this Hospital during this fiscal year and have not been included in the appointments and separations of regular employees.

Respectfully submitted,

W. A. Stone  
Personnel Officer

Mr. Joe Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

During the year many cut flowers, including chrysanthemums, dahlias, gladioli, snapdragons, and roses were grown in the greenhouse for use on the wards. Pansies, petunias and other types of bedding plants were also grown and sweet potato plants, eggplants, tomato plants and cabbage plants were grown for use on the farms.

Two thousand azaleas have been planted as lining out stock for future planting. Also, two thousand large azaleas have been planted, or are being held for planting, in the landscape program.

Oak trees have been planted at the Boone, Boland and Lawrence Buildings.

Approximately three hundred hybrid tea and floribunda roses have been planted around the buildings. Four beds have been planted at each building. Plans are made for further plantings of roses.

Flower beds have been constructed and planted at each building. Garden Clubs have been formed among the patients to care for the flowers, as well as to do the planting. The Horticulturist has directed the planting and maintaining of flower borders, and instructions have been given in maintaining flower borders so that the patients can keep the flower borders growing properly. The Psychologists and Psychiatrists have cooperated with the Horticulturist in these activities.

Fifteen acres have been planted in small fruits. There are five acres in strawberries, five acres in blackberries and boysenberries, and five acres in muscadine and scuppernong grapes. These plants will begin production during the fiscal year of 1957.

Respectfully submitted,

E. T. Newsome  
Horticulturist

Mr. Joseph W. Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

During the past fiscal year, as in previous years since the end of World War II, the Engineering Department, primarily a maintenance organization, has been largely concerned with new construction in connection with the Hospital building program and smaller installations.

#### NEW CONSTRUCTION

*Laundry:* On account of delay in the delivery of critical materials and the necessity for keeping the laundry in operation each day, the repairs to the laundry have proceeded rather slowly.

Two new sections have been added and floor space has been greatly increased by enclosing the south and north courts.

All sections damaged by fire have been remodeled. They will be three (3) feet higher, have a 4 inch concrete roof slab, a double line of continuous roof windows and a twenty (20) year built up roof. This type of construction has considerably reduced the excessive heat that goes with all laundry operations.

*Tuberculosis Laboratory of Bacteriology and Chemistry:* Work was commenced on this building sometime before the beginning of the fiscal year 1954 and has been carried on as men could be spared from other jobs. This building contains approximately 3,064 square feet of floor space and 503 square feet of developed basement area.

This building is now completed except for the installation of:

1. Plumbing, lighting and laboratory fixtures.
2. Installation of packaged air conditioning and heating.
3. Connecting steam and gas lines, which have been brought up to the building.
4. Installation of ceramic tile in the bathrooms.

*Brantley Building:* Renovation was completed by the contractor and the Engineering Department made connections for the sprinkler system, steam, steam return, water, gas, and sewer lines, as well as the electrical connection to the building.

*Primary Electrical Distribution System:* A contract has been drawn up for the renovation of a portion of the primary electrical distribution system. This work is to start at the metering pole

and follow the line to where the line turns and goes in to the Freeman Building; also, the line from the Arnall Building to the Laundry. At the Laundry a set of switches will be installed that will tie both the lines. These switches will be left open and used only in an emergency.

The contract calls for the wire, which has been taken down on the lines stated above, to be placed in service from the Laundry to the Ingram Building.

Under the terms of the contract, the old fire alarm signaling cable will be dismantled by the contractor. The contractor is also required to replace poles, switches, crossarms, guying of poles, and install oil cutouts to bring the load carrying capacity of the primary distribution system up to the requirements of the Hospital.

*Colony Dormitory:* Work has progressed on a new dormitory at the Colony and the building is nearing completion. The drainage system, floors, installation of electrical, heating and plumbing fixtures are yet to be completed. Mr. Sam Humphrey is supervising the work while the Engineering Department is responsible for plans and the requisitioning of materials.

In addition to the above major projects, the Engineering Department has been responsible for maintenance of all equipment and buildings. This maintenance includes all plumbing, steam fitting, electrical and construction maintenance.

Respectfully submitted,

Roger W. Stembridge  
Chief Institutional Engineer

## MILLEDGEVILLE STATE HOSPITAL ANNUAL REPORT

August 23, 1956

Dr. T. G. Peacock, Superintendent  
Mr. Joe Boone, Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Sirs:

Submitted herewith are financial reports of the Milledgeville State Hospital for the fiscal year ended June 30, 1956.

For the year ended June 30, 1956, there was allotted to the Milledgeville State Hospital through the Department of Public Welfare from State Appropriation funds \$10,297,130.00 for regular maintenance, \$310,436.57 for outlay improvements by Institutional forces and \$362,500.00 for Outlay by contractual construction, making a total allotment of \$10,970,066.57. This allotment was supplemented by \$88,303.85 income from sales, rents, pay patients and other sources and \$774,847.99 in donated commodities making a total income receipt of \$11,833,218.41.

In addition to the above income receipts, the Productive Units furnished for immediate consumption and inventories, food and forage commodities valued at \$2,167,130.58. Detail cost of operation statements of each Productive Unit reflects a net saving to the State as follows:

Abattoir - Packing house, Meat Products .....	\$ 144,366.00
Farm - Vegetables, Meal, Grits, Forage .....	270,302.87
Dairy - Dairy Products .....	119,591.65
Broiler Project - Broilers and Fryers .....	23,179.42
Egg Project - Eggs and Hens .....	118,535.23
Cannery - Canned Fruits and Vegetables .....	30,626.26
Bakery - Bread, Rolls, Cakes .....	47,663.32
	\$ 754,264.75

Inventories at June 30, 1956 amounted to \$1,051,404.05, an increase of \$271,251.74 over June 30, 1955.

The daily average population for this fiscal period was 11,738, an increase of 156 over the fiscal period June 30, 1955. Per capita per diem cost to the State is as follows:

Total Expenditures .....	\$10,411,237.95	\$886.97	\$2.43
Less Outlay .....	<u>112,819.79</u>	<u>9.61</u>	<u>.03</u>
Net Maintenance .....	\$10,298,418.16	\$877.36	\$2.40
Less: Net Savings Productive Units .....	<u>754,264.75</u>	<u>64.26</u>	<u>.17</u>
Net Cost Maintenance Expenditures \$	9,544,154.41	\$813.10	\$2.23
Less: Donated Commodities .....	<u>774,847.99</u>	<u>66.01</u>	<u>.18</u>
Net Cost to State .....	\$ 8,769,305.42	\$747.09	\$2.05

These figures reflecting a per diem cost of \$2.23 represents cost on a consumptive basis, whereas, the State fiscal records maintained on a cash basis show a per diem cost of \$2.28, the difference being the increase in inventories and decrease in accounts payable during the year.

Respectfully submitted,

MILLEDGEVILLE STATE HOSPITAL

T. C. Brantley,  
Accounts Executive II

July 1, 1957

Judge Alan Kemper, Director  
State Department of Public Welfare  
State Office Building  
Atlanta 3, Georgia

Dear Judge Kemper:

In accordance with custom and as required by statute, I respectfully submit the report of the Milledgeville State Hospital for fiscal year ended June 30, 1957, which is the one hundred and fourteenth Annual Report.

Although the hospital is dangerously overcrowded and lacking in adequate personnel, we are making strides in rehabilitating those who are amenable to treatment and giving good care to those who have been unable to benefit materially by the old or new lines of therapy but who must seek refuge here.

It is unfortunate that elderly persons who have become mildly demented and youngsters who are not well endowed mentally, either because of heredity or trauma, should become a part of our hospital population. They require considerably more attention than the average psychotic patient and, as a rule, no benefits are derived except to relieve the families of their care. In some instances the home care of these individuals does place too much physical or mental stress upon the families, but entirely too much emphasis is being placed upon psychic damage to children and others who come in contact with them. Our observation has been that people who accept and shoulder their responsibilities are less susceptible to guilt complexes and other psychic trauma than those, who on the slightest pretext, shunt their burden onto a state institution or some other social agency.

One of the pressing needs of the State of Georgia is for good, moderately priced nursing homes where elderly people can live in comfort and dignity with those of similar physical and mental limitations and not feel that they are objects of charity. Good nursing homes cannot be operated cheaply and, almost of necessity, must have some form of endowment if the charges are to be within the reach of the average family. Churches are beginning to awaken to their responsibility to the aged. Bethany Home at Vidalia, and more recently a branch at Millen, is a noteworthy example of a church owned home for the aged, not only of its denomination, but others who have sought shelter there. It typifies the spirit of the "Good Samaritan" and could well be emulated by other denominations.

Many of the children in our hospital are seemingly without prospects for training, and yet it is astounding to note the progress made by some when other patients become attached to them and give them loving and sympathetic care and devote time and attention to habit training. Our employees are touched by these helpless children and go beyond the call of duty, even to the extent of spending their funds on them, but the press of other duties prevent their giving the time required for developing all potentialities present. Organized groups are providing excellent training and guidance to promising victims of cerebral palsy, and I am sure that oftentimes the results exceed their fondest hopes and ambitions. A most worthwhile project would be for some group to sponsor a home or homes for children who are more severely impaired mentally. The cost would not be so great as that first mentioned, as highly trained personnel would not be required, but rather those who have the biblical "Charity out of a pure heart, and of a clear conscience, and of faith unfeigned", who are understanding and sympathetic, and who are willing to give of their time and talents without spectacular results. Ideally, the nucleus of such a group would be the mothers and other relatives of severely afflicted children. The benefits would then be twofold—the children would be afforded the best of attention, and the families would have the satisfaction of having assumed their responsibilities and sharing an experience with others who are faced with the same problems, thereby strengthening each other.

A third and more difficult group which impedes our efforts to give prompt and intensive treatment to psychotics is the alcoholics. During this fiscal year there were 359 admissions — approximately 10% of the total — due solely to alcoholic indulgence. Even if we had enough personnel to attempt to reclaim the alcoholics, we could not detain them long enough to do so. They are not legally insane and most of them remain here thirty days or less, and other than being sober on leaving they are no better off than when they were admitted. This is an injustice to those who urgently need and are entitled to psychiatric care. I do not know the answer to the problem of the alcoholic and it does not come within my jurisdiction, but I do feel that the Milledgeville State Hospital should be relieved of the burden so that our efforts may be expended along more fruitful lines.

The hospital is approximately 40% overcrowded, although our net increase for the fiscal year was only 8. We lost 300 beds in converting the East Wing of the Powell Building into offices and officers' quarters while the center section is undergoing remodeling. As soon as we are permitted to occupy the renovated section, the contractors will begin work on the East and West Wings simultaneously, resulting in an additional loss of 300 beds. The West Wing is occupied, for the most part, by children who are custodial cases and since we do not have vacancies to accommodate them, the relatives have been requested to remove them from the hospital. It is anticipated that many

protests will be made to you, the Governor, and members of the House and Senate. The reception of voluntary patients was discontinued early in 1955. So far we have received all committed patients, except those under 18 years of age. The reception of minors is limited to those who are actually psychotic and those whose behavior strongly indicates that they are dangerous to others, and all judges of court of ordinary have been notified that prior arrangements must be made with the superintendent before sending a minor to the hospital. Unless more buildings are provided, with the essential personnel for operation, or unless immediate steps are taken to relieve the hospital of the senile, the mentally retarded, and alcoholic patients, overcrowding is going to compel us to admit patients as vacancies occur only. I am not an alarmist, but the Milledgeville State Hospital has reached the saturation point and I fear that drastic action will soon have to be taken if the situation does not improve.

The public's interest in mental health and in the State's only hospital for the mentally ill is soaring and it is regrettable that limited personnel does not always permit us to comply with the numerous requests for information, instructions, lectures, and participation in panel discussions. Your superintendent and other hospital officials have appeared on numerous programs and have endeavored to disseminate information via the press, radio, television, and special clinics and lectures for medical and college students, public health nurses, welfare workers, and related groups. I hope that those who may feel they have not had a wholehearted response to their inquiries will understand the situation which confronts us.

The efficient operation of the hospital is an arduous undertaking and we are grateful to all divisions of the State Department of Public Welfare for their unfailing cooperation and their forbearance when we err. Your penetrating insight into the divergent angles and complexities of administering the affairs of an institution of such magnitude is exceptional, and the knowledge that we can rely on you for advice and counsel is comforting.

Our thanks go to the Honorable Marvin Griffin, Governor of Georgia, his official staff, and to the members of the General Assembly for their heightened interest in mental health and the hospital and the increase in the per capita, per diem appropriation from \$2.05 to \$2.34.

I take this occasion to personally and publicly commend and thank the personnel in the business and medical divisions of the Milledgeville State Hospital for its teamwork and diligence through-out the year.

We are most grateful to the numerous individuals and organized groups who have provided additional comforts for the patients in the

form of day rooms attractively equipped with well-chosen furniture, televisions, radios, books and magazines, for gifts at Christmas, and entertainment during that season and throughout the year. The list of donors is entirely too lengthy to permit individual recognition in this report and we want each one to consider this to be personal expression of thanks.

Narrative and statistical reports of the division heads in the medical and business departments are incorporated in my report. They give detailed accounts of the activities in each section of the hospital and require little or no additional comment from me.

## GENERAL STATISTICS OF MOVEMENT OF POPULATION

The daily average population was 11,828, as compared with 11,738 last year. The net increase was only 8, compared with 143 for the previous year. We admitted 3,519 new patients and 1,785 returned from furlough. Of the 2,634 patients discharged, 1,155 were recorded as restored or without psychosis, and 1,312 as improved in varying degrees.

## TREATMENT OF PATIENTS

The resident and consultant staff of the general hospital and surgical department, in collaboration with the nursing staff, clinical laboratories and x-ray department, provides superior attention to the physical needs of our patients. We are woefully lacking in physicians to give them adequate psychiatric guidance. Three of our psychiatrists are board certified and others, through their experience here and elsewhere, have acquired considerable knowledge of the subject and are doing excellent work; but it is impossible for any psychiatrist to do justice to 800 or more patients. The medical staff should be increased by at least thirty-five members and I would like to have two or three additional board certified or eligible psychiatrists for teaching student nurses and psychiatric aids and giving lectures to other members of the medical staff.

The hospital suffered a staggering blow in the untimely passing of Dr. E. C. Leaphart, who was the director of the Rivers Building (tuberculosis service). Dr. Leaphart was a well qualified physician and surgeon who possessed unusual executive ability. He was succeeded by Dr. F. A. Mercun, a member of the Rivers Building staff.

Dr. R. W. Bradford is doing double duty as assistant superintendent and clinical director in the white male service. Through years of service he has acquired an all-embracing knowledge of the opera-

tions of the hospital and its personnel, which admirably fits him for the position of assistant superintendent. I hope to relieve him of the added responsibility of acting as clinical director, when a qualified person can be found to replace him.

We are fortunate in having Dr. L. A. Bailey as clinical director in the colored department, where many improvements have been effected under his leadership. Dr. Bailey's first love is surgery, but prior experience on the staff of the Milledgeville State Hospital enabled him to quickly grasp the psychiatric aspect of his position.

Tranquilizing drugs have undoubtedly resulted in a shorter period of hospitalization for many patients and brought about a decrease in the population, but they do not take the place of psychotherapy in the long pull. There is a grave danger of certain individuals becoming too dependent upon them, and the general public should be educated to the fact that everyone is subject to a certain amount of stress and that the vicissitudes of life cannot be overcome by resorting to any type of drug.

Our affiliate nursing program is paying dividends in additional personnel, as many of the student nurses become interested in psychiatric nursing and join our staff after graduation. The classes for psychiatric aids have been mutually beneficial to the participants and to the hospital.

The personnel of the dental and psychology department is at a low ebb, which might be remedied if we were in a position to offer dentists and psychologist better housing. The rapid turnover of personnel in these departments is detrimental to the welfare of the hospital.

The social service department is functioning in an efficient manner, despite the shortage of personnel and the multitude of tasks assigned to it.

The occupational therapy and recreation departments are reaching more patients and offering a wider variety of activities. The director of the recreation department is on educational leave, working towards his master's degree. Prize-winning displays of needlework, woodwork, and other handicrafts, at local, State, and sectional fairs have resulted in favorable publicity for the hospital. Dr. Yarbrough continues to promote occupational therapy activities in the Boland Building, at the "Log Cabin", and Yarbrough Park. Under his proficient guidance many beautiful roses, chrysanthemums, and other flowers in season are grown and they brighten the offices and wards. Dr. Combs, clinical director of the white female service, also generously lends assistance to diversifying and improving the activities and facilities of the occupational therapy department. It was indeed a pleasure to welcome Dr. Combs' return to our staff.

## RECOMMENDATIONS

Some of the recommendations in the last report have been initiated or completed. The following construction is urgently needed and recommended:

Medical and surgical department for colored division.

Recreation Hall for colored division.

New dormitory type building for Colony 2.

Completion of improvements begun at Colony 1.

Additional housing for doctors, dentists, and medical students.

Increased and improved laundry facilities.

Additional dormitory type buildings, with adequate dietary facilities, for white female division in particular and to relieve overcrowding in general.

1000— bed dormitory building to replace Dupree Building.

Other recommendations are:

Increased nursing facilities for increased population.

An 8-hour day for all personnel when finances permit.

Additional employees for dietary department, so that patients will not be required to work in kitchens and dining halls.

Increased salaries for professional personnel in order that additional well qualified persons may be obtained for the staff.

Respectfully submitted,

T. G. Peacock, M. D.  
Superintendent

July 1, 1957

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

Report showing Movement of Population for the fiscal year ending June 30, 1957 is submitted as follows:

Respectfully submitted,

(Mrs.) Mary H. Cook  
Registrar

July 1, 1957

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is the Annual Report of the Jones Building for the year ending June 30, 1957.

The function of the Jones Building as the general medical and surgical unit of the hospital has been essentially unchanged during the past year. The most acutely ill patients, both inmates and employees and their dependents have been cared for on ward three (3) and six (6). This care is broken down as to type case in the following table:

Service	Acutely Ill Patients			
	Jones 3		Jones 6	
	Cases	Pt. Days	Cases	Pt. Days
Medical	604	8,199	856	6,937
Surgical, Gen.	86	2,080	371	3,164
Surgical, Eye	4	60		
Surgical, Ortho.	123	2,007	122	2,155
Surgical, Gyn.	69	651		
Surgical, G. U.	47	411	102	1,299
Obstetric	76	459		
Newborn	51	753		
Pediatric	17	91		
Totals	1,078	14,830	1,451	13,555
Grand Total (Patient Days)				28,385
Employees treated	587		299	
Dependents			96	
Total non-inmates treated				982

The remainder of the wards in the Jones Building, with the exception of the male admission service now housed on Jones 2, served as convalescent wards for the care of those patients needing continued but less acute or intense medical or surgical care.

The convalescent wards have the following bed capacity and use:

	Capacity	Av. Occupancy	Use
Jones 1	68	64	Female diabetics (usually severe or with complications)
Jones 4	37	34	Chronic Pediatric problems
Jones 5	36	31	Male medical and surgical convalescent
Jones 7	77	73	Female medical and surgical convalescent

The association of the Jones Building with the Medical College of Georgia as a teaching unit remained largely unchanged during the third year of this relation. Under the stimulus of the Medical School several research projects were undertaken during the past year, two of these resulting in the publication of papers in national medical journals. We estimate approximately ten to fifteen percent of our staff hours go into research or teaching activities, and we believe this to be in line with good medical practice for an Institution of our size. Our research activities received limited financial support from the Research Department of several pharmaceutical houses, so that the only cost to the State of those projects was in the staff time.

The Jones Building staff continued to be responsible for the medical and surgical care of the inmates of the Boys' Training School, and assisted on a part time basis in the care of patients in the colored department.

Adequate consulting service have continued to be available to our staff at all times, consulting visits averaging about twenty-five per month.

The operating room, the clinical laboratory and the x-ray department have submitted their tabulated reports. The Outpatient Clinic has continued to provide for outpatient care for employees and dependents, and outpatients consultation on inmate patients. Their tabulated report follows:

#### OUT PATIENT CLINIC

Annual Report 1956-1957

#### MEDICAL CLINIC

Total number of employee visits .....	3,463
Total number of outsider visits .....	3,032
Total number of inmate visits .....	1,004
Unna Boots .....	118
Obstetrical Cases (No. of patient visits) .....	825

Biopsies.....	21
Cauterizations .....	4
New Employee physicals .....	86
<b>CANCER CLINIC</b>	
Total number of patient visits .....	90
<b>DERMATOLOGY CLINIC</b>	
Total number of patient visits .....	395
<b>PLASTIC SURGERY CLINIC</b>	
Total number of patient visits (Plastic Surgery) .....	21
Warts Hyfrecated (number of patients) .....	47
Diathermy treatments given .....	319
Unna gloves .....	4
Toe nails removed .....	1
Pictures Taken .....	27
Total number of patient visits in Outpatient Clinic .....	6,362

The writer considers the year to have been one of progress, and wishes to thank all concerned for making this possible. The most pressing needs for the physical plant would seem to be the addition of another elevator, and the creation of a central supply service. It is felt that the latter would reduce somewhat the equipment expense, at the same time providing more complete coverage with what we have available. The most pressing personnel need would seem to be replacement of the radiologist whose resignation became effective at the end of the year. An adequately trained and experienced assistant in the surgical service would lessen the considerable responsibility which Dr. Gibson has carried alone for several years.

We wish to thank the Hospital Administration and other department heads for their co-operation in the past year.

Respectfully submitted,  
 Zeb L. Burrell, Jr., M.D.  
 Assistant Medical Director

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following pages contain the report of the Medical Department for the fiscal year beginning July 1, 1956 and ending June 30, 1957.

During the year three thousand, five hundred and nineteen (3,519) patients were admitted. Of these, two thousand, five hundred and seventy-nine (2,579) were first admissions and nine hundred and forty (940) were readmissions to this institution or from some other mental hospital. Forty-eight (48) patients were admitted by order of the court and fifty-five (55) were transferred from Georgia State prison at Reidsville and one thousand, seven hundred and eighty-five (1,785) returned from furlough.

A total of three thousand, nine hundred and thirty-six (3,936) patients were furloughed (of this number seven hundred and forty-nine (749) were trial visits) and three hundred and ninety-six (396) were discharged as not insane, making a total of four thousand, three hundred and thirty-two (4,332) released from the hospital. Of the number furloughed four hundred and eighty-one (481) were recorded as restored; three thousand, one hundred and fifty (3,150) as improved and three hundred and five (305) as unimproved.

Nine hundred and sixty-four (964) patients died during the year. Arteriosclerosis was the leading cause of death, one hundred and forty-three (143) patients being reported as having died with this disease. Pneumonia ranked second with one hundred and thirty-four (134) and Cerebral Hemorrhage third with one hundred and two (102).

There was an increase of eight (8) in the population for the year.

We still use electric shock therapy to a great advantage. Four thousand, one hundred and nine (4,109) patients were treated and twenty-six thousand, two hundred and eleven (26,211) treatments were given. Three hundred and fifty (350) patients were reported as having been restored; three thousand and eighty-two (3,082) were improved and six hundred and seventy-seven (677) as unimproved.

The extensive use of tranquilizing drugs has reduced our electric shock therapy treatments considerably. With these drugs six thousand, one hundred and eighty-one (6,181) patients were treated. Of this number two hundred and eighty-nine (289) were reported as having been restored; four thousand, three hundred and sixty-two (4,362) were improved and one thousand, five hundred and thirty (1,530) as unimproved.

Several physicians have been added to our staff in the past year and we are glad to have them. We commend our medical staff and hope it will continue to increase in order that we may be able to give patients more individual psychiatric care.

I wish to express my appreciation to you, Dr. Peacock, and members of the staff for their continued cooperation.

Respectfully submitted,

R. W. Bradford, M. D.  
Assistant Superintendent

## SURGERY AND TREATMENTS

Amputation and plastic repair, distal phalanx of finger .....	4
Amputation of toe .....	1
Amputation of leg .....	13
Amputation of penis, simple .....	1
Appendectomy .....	13
Aspiration of cyst in breast and biopsy (Vimm-Silvermann) .....	1
Bilateral oophorectomy .....	2
Bilateral subtemporal decompression and tracheotomy .....	1
Biopsy and cauterization of cervix .....	1
Biopsy of cervix .....	5
Biopsy of lateral wall of cervix and sigmoidoscopy .....	1
Biopsy of lesion, eyelid .....	1
Biopsy of lesion, forehead .....	1
Biopsy of lesion, penis .....	1
Biopsy of lesion, tongue .....	3
Biopsy of rectal polypoid lesion .....	1
Bunionectomy .....	1
Cartilage graft from rib cage to frontal sinus defect .....	1
Cesarean section .....	1
Colectomy and fulguration of rectal polyps .....	1
Cholecystectomy .....	9
Cholecystectomy and choledochotomy .....	2
Cholecystectomy, choledochotomy, choledocholithotomy and transduodenal sphincterectomy .....	1
Cholecystectomy, choledochotomy, duodenostomy, and cardiac massage .....	1
Cholecystectomy and repair of ventral hernia .....	2
Circumcision .....	40
Closed reduction and Kirschner wire traction to fracture of metacarpal .....	2
Closed reduction and Kirschner wire traction to fracture of radius .....	1
Closure of colostomy and repair of ventral hernia .....	1
Closure of eyelids .....	1
Construction of tube graft .....	1
Cystoscopy .....	44
Cystoscopy and biopsy of bladder mucosa .....	1
Cystoscopy and retrograde pyelogram .....	7
Cystoscopy and retrograde pyelogram, exploratory laparotomy, biopsy from fundus of uterus and releasing of adhesions .....	1
Cystoscopy and transurethral cystolithotomy .....	1
Cystoscopy and ureteral catheterization .....	1
Dilation and curettage .....	10
Dilation and curettage, biopsy and cauterization of cervix .....	1
Dilation and curettage, biopsy of cervix .....	11
Dilation and curettage, excision of Bartholin gland cysts .....	1
Dilation and curettage, and episiotomy .....	1
Dilation and curettage, and removal of placental tissue .....	1
Debridement of denuded area and amputation of thumb .....	1
Debridement of distal phalanx and flap closure finger .....	1
Debridement of finger .....	1
Debridement of multiple abrasions .....	1
Debridement and repair of gunshot wound, hand internal fixation of metacarpal with Kirschner wire and repair of flexor tendons .....	1
Embolectomy, femoral .....	1
Embolectomy, popliteal and femoral .....	1
En bloc hemiglossectomy with removal of mandible, radical neck dissection and tracheotomy .....	1
Enucleation of eye .....	2
Esophagoscopy .....	1
Esophagoscopy and esophageal biopsy .....	1
Esophagoscopy and esophageal dilation .....	1
Evacuation of hematoma, perineum .....	1
Evacuation of hematoma and secondary closure of incision .....	1
Excision of arthritic spur, heel .....	1
Excision biopsy of lesion from buccal mucosa .....	1
Excision biopsy of mass in breast .....	8

Excision biopsy of mole	4
Excision biopsy of node	6
Excision biopsy of node and sternal puncture	1
Excision biopsy of skin lesion	4
Excision of Bartholin gland cyst	1
Excision of basal cell cancer	1
Excision of chalazion	1
Excision of cyst	20
Excision of fistula in ano and hemorrhoidectomy	1
Excision of lesion from lower lip	1
Excision of lexion from lower and radical neck dissection	1
Excision of lesion and full thickness skin graft to denuded area	2
Excision of keloids	5
Excision of lipoma	1
Excision of olecranon bursa	1
Excision of rectal fistula	1
Excision of rectal fistula and revision of colostomy	1
Excision of skin lesions	23
Exploration and repair of joint capsule, finger	1
Exploratory bitemporal and bifrontal burr holes	1
Exploratory bilateral temporal burr holes and ventriculogram	1
Exploratory laparotomy	1
Exploratory laparotomy and appendectomy	1
Exploratory laparotomy, appendectomy, removal of Meckel's diverticulum	1
Exploratory laparotomy, biopsy of omental and subcutaneous nodes	1
Exploratory laparotomy and cholecystectomy	1
Exploratory laparotomy, cholecystectomy, choledochography and right oophorectomy	1
Exploratory laparotomy, cholecystojejunostomy, entero- enterostomy, and biopsy of liver	1
Exploratory laparotomy, closure of hernia ring and resection of segment of small intestine	1
Exploratory laparotomy, excision biopsy of node from gastrocolic omentum and transverse colostomy	1
Exploratory laparotomy and drainage of appendiceal abscess	1
Exploratory laparotomy, drainage of retroperitoneal abscess and gastrojejunostomy	1
Exploratory laparotomy and gastrojejunostomy	1
Exploratory laparotomy and releasing of adhesions	1
Exploratory laparotomy, releasing of adhesions and resection of segment of small intestine	1
Exploratory laparotomy, releasing of multiple adhesions and cholecystectomy	1
Exploratory laparotomy, releasing of multiple adhesions, colostomy, resection of portion of gangrenous omentum, choledochography repair of rupture of sigmoid colon and devine colostomy	1
Exploratory laparotomy, removal of mass from mesentery of small intestine, resection of approximately $\frac{3}{4}$ of small intestine, appendectomy and jejunocolostomy	1
Exploratory laparotomy, releasing of obstruction and adhesions, suprapubic cystostomy and transverse colostomy	1
Exploratory laparotomy, repair of cholecystogastric fistula, cholecystojejunostomy and jejunostomy	1
Exploratory laparotomy and resection of portion of small intestine	1
Exploratory laparotomy, transverse colostomy and jejunostomy	1
Exploratory laparotomy, transverse colostomy and mesenteric graft to sigmoid defect	1
Extraction of teeth	1
Fulguration of rectal polyps and biopsy of polyps	1
Full thickness skin graft to denuded area, leg	1
Gastrojejunostomy	1
Gastrostomy ( Massive hemorrhage controlled with Sengstaken-Blackmore esophageal tube )	1
Hemorrhoidectomy	17
Hemorrhoidectomy and sigmoidoscopy	8
Hemorrhoidectomy, sigmoidoscopy, excision of rectal fissure and sphincterotomy	1
Hemorrhoidectomy and sphincterectomy	1
Herniorrhaphy	21

Herniorrhaphy and appendectomy	2
Herniorrhaphy and orchiopexy	2
Herniorrhaphy and vas section	1
Herniorrhaphy, vas section and suspension of sigmoid colon	1
Hymenotomy	1
Incision and drainage, biopsy of cervical node	1
Incision and drainage of abscess	14
Incision and drainage of Bartholin gland abscess	2
Incision and drainage of hematoma	1
Incision and drainage of peritonsillar abscess	1
Incision and drainage of serous cyst	1
Insertion of prosthetic femoral head	7
Interval appendectomy	1
Iridectomy and removal of cataract	1
Janeway gastrostomy	1
Jejunostomy, suprapubic cystostomy, releasing of multiple adhesions and obstructions secondary to transudate	1
Kirschner wire and skeletal traction to metacarpals	3
Kirschner wire through olecranon and skeletal traction to humerus	1
Le Fort	1
Lumbar sympathectomy	3
Lumbosacral laminectomy	1
Meatotomy	1
Multiple ligation and stripping of saphenous vein, bilateral	2
Nephrolithotomy, pyelotomy, pyelolithotomy	1
Open reduction and internal fixation of ankle with SMO bone screws	1
Open reduction and internal fixation of elbow with SMO bone screws	1
Open reduction and internal fixation of femur with Austin-Moore pin	2
Open reduction and internal fixation of femur with Smith-Petersen nails	9
Open reduction and internal fixation of femur with Smith-Petersen nail and intertrochanteric bone plate	32
Open reduction and internal fixation of humerus with Rush pins	2
Open reduction and internal fixation of patella with steel wire	1
Open reduction and internal fixation of patella with steel wire and repair of joint capsule	1
Open reduction and internal fixation of radius with Rush pins	1
Open reduction and internal fixation of tibia with Rush pins	4
Open reduction and internal fixation of tibia with Rush pin and bone graft from iliac crest	1
Open reduction and internal fixation of tibia with tibial bolt	1
Open reduction of humerus, debridement and eboration of old fracture site, intermedullary iliac graft, chip bone and bone plate to fracture site	1
Open reduction of ring finger and repair of joint capsule	1
Panhysterectomy	3
Panhysterectomy and appendectomy	11
Panhysterectomy, appendectomy and repair of cystocele and rectocele	1
Panhysterectomy, left salpingo-oophorectomy and appendectomy	1
Panhysterectomy, left salpingo-oophorectomy, appendectomy and repair of umbilical hernia	1
Panhysterectomy and right salpingo-oophorectomy	1
Panhysterectomy, removal of ovarian cyst and appendectomy	1
Panhysterosalpingectomy	2
Panhysterosalpingo-oophorectomy and appendectomy	2
Percutaneous antegrade pyelogram	1
Plastic repair of defect of lower lip	1
Plastic repair of tongue	1
Prostatic biopsy	1
Pyelostomy	1
Radical mastectomy	2
Radical mastectomy and split thickness skin graft to denuded area	3
Radical mastoidectomy	1
Reduction and internal fixation of right ankle with SMO bone screws	1
Reduction of fractured nose	1
Release of cauda and urethraplasty	1
Releasing of testicle ( 2nd stage orchiopexy )	1
Removal of blood clots and tissue from cervical os	1
Removal of bone fragments of capitulum from elbow joint	1
Removal of bone plate from tibia	1

Removal of bursa from foot	1
Removal of callous, thumb	1
Removal of cataract	4
Removal of cataract and complete iridectomy	1
Removal of fingernail	1
Removal of foreign body from hand	1
Removal of foreign body from wrist	1
Removal of ganglion, wrist	1
Removal of head of radius	1
Removal of ovarian tumor	1
Removal of portion of finger nail	2
Removal of products of conception from cervical os	2
Removal of Rush pin from tibia	1
Removal of Smith- Petersen nail	1
Removal of Smith-Petersen nail and intertrochanteric bone plate	1
Removal of Smith- Petersen nail and intertrochanteric bone plate and curettage and sinus tract	1
Removal of supraclavicular node	1
Removal of thumb nail	1
Removal of toe nail	2
Repair of cystocele and urethrocele	1
Repair of hernia and hydrocele and circumcision	2
Repair of hydrocele and exploratory herniorrhaphy	1
Repair of incisional hernia	2
Repair of hernia and resection of gangrenous appendage from sigmoid colon	1
Repair of laceration and amputation of distal phalanx of finger	2
Repair of laceration ( Self inflicted ) involving jugular vein	1
Repair of laceration index and middle fingers	1
Repair of lacerations and tendons, wrist	2
Repair of lacerations of tongue and chin, internal fixation of mandible with stainless steel wire, tracheotomy and extraction of teeth	1
Repair of multiple self inflicted lacerations, throat and arm	1
Repair of multiple self inflicted lacerations, neck and hand	1
Repair of multiple laceration with loss of thumb and repair of median nerve	1
Repair of secondary hernia	1
Repair of sliding hernia	2
Repair of umbilical hernia	2
Repair of urethral diverticulum	1
Revision of skin graft, finger	1
Revision of tube graft, neck	1
Salpingo-oophorectomy, left and salpingectomy right	1
Secondary closure of operative wound	3
Secondary closure of skin, chest wall	1
Sequestrectomy, excision of fistulus tract, removal of Smith-Petersen nail and intertrochanteric bone plate	1
Sigmoidoscopy	43
Sigmoidoscopy and electrodesiccation of rectal polyps	1
Sigmoidoscopy, excision of rectal fissure and biopsy of rectal mucosa	1
Sigmoidoscopy, removal of rectal polyps, excision of thrombotic hemorrhoids, caterization of rectal fissure	1
Simple mastoidectomy	2
Splenectomy	1
Steinmann pin and skeletal traction to femur	2
Submucous resection	3
Subtotal gastrectomy	7
Subtotal thyroidectomy	6
Suprapubic cystostomy	6
Syme amputation of foot	1
Temporal and frontal burr holes and removal of hematoma	1
Thoracostomy	1
Tonsillectomy	7
Tonsillectomy and adenoidectomy	5
Tracheotomy	5
Transurethral resection	4
Tubal sterilization and appendectomy	78
Tubal sterilization and repair of ventral hernia	2

Ureterolithotomy, biopsy of right ureter, appendectomy and repair of ventral hernia .....	1
Vaginal hysterectomy, colpectomy, repair of cystocele and urethrocele .....	1
Vaginal hysterectomy, repair of cystocele, rectocele, urethrocele and perineorrhaphy .....	1
Vaginal hysterectomy, perineorrhaphy, colpectomy, repair of cystocele, rectocele and urethrocele .....	3
Vaginal hysterectomy, right salpingo-oophorectomy, perineorrhaphy, colpectomy, repair of cystocele, rectocele and urethrocele .....	1
Vas section .....	127
Ventriculogram .....	1
Ventriculogram, craniotomy and removal of brain tumor .....	2
Vesicle neck resection .....	1
Whitehead .....	3
Wide excision of post auricular malignant tumor including parotid gland .....	1
Winograd .....	8

Electric shock treatments .....	26211
Intramuscular treatments .....	3933
Intravenous treatments .....	1229
Patients treated with Duracillin .....	343
Patients treated with Insulin .....	145

T. G. Peacock, M. D., Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Doctor Peacock:

The following annual report aims to briefly illustrate and summarize the course of events and essential problems, which were and are besetting the work in the Tuberculosis Service of our institution.

During the past fiscal year our department experienced the tragic and unexpected loss of its Medical Director, Dr. E. C. Leaphart. By his passing away, we not only lost a very capable and understanding department head, but also a good man, a fine gentleman.

It is easy to imagine that the time following was a difficult one, especially in the first period of transition and adjustment. However, we believe to be correct in saying that we "weathered the storm", and that the regular operations of the department were performed on the same level of adequacy and quality as before. This is largely to be attributed to the fact that the remaining staff members were used to take care of the individual problems of their services, which they did in the best way they were able to.

One additional difficulty encountered in the first part of the last fiscal year was a change-over in staff members with all its inherent problems and tasks, like getting acquainted with the mode of operations in the service and individual patients' problems. Two doctors left our department, and two new ones were added to our Staff.

In connection with the above mentioned perennial problem of frequent changes on the staff, I would like to stress a few points as they apply to the particular character of the Tuberculosis Service.

No doubt, you will agree that our department is lacking a sufficient number of physicians necessary to take adequate and desirable medical care of approximately 750 patients, a large percentage of which needs active medical treatment. This, of course, includes many and various time consuming techniques. The present undersized staff is not only expected (rightly so) to give to their patients the benefits of the latest treatment methods for Tuberculosis, Psychosis, and other medical problems as they arise, but also to handle the large amount of routine paper work, mail, keeping of medical records, supervising and insuring the proper execution of orders given to attendants, et cetera. We hope to meet with agreement when we say that there is a big difference between actively treating and being responsible for the welfare of circa 250 patients—as it happens on each of our three services—or just giving them custodial care. If one takes this under

just consideration, we can be quite pleased with the low mortality and good over-all results we are achieving in the Tuberculosis Department. Past experience has shown us that every time a staff member leaves suddenly, such an event affects us unfavorably, no matter how hard the rest is striving to fill the gap. If we are to protect ourselves of such sudden shortages, which may eventually affect the quality of the medical care given to the patients, an additional physician would have to be employed, who would take over one part of the colored service, which provides us with the biggest work load on account of its nature. He would there obtain the knowledge for this particular job and get acquainted with the problems of a place like ours. He could easily step in and take over efficiently, should some other staff member suddenly decide to resign, or the like. You might remember that this was discussed between us when I took over the directorship.

There are many other problems and suggestions for improvement which were presented to you in a number of previous annual reports. Some of the suggested improvements were realized, or almost so, and some of the old problems are still facing us. Allow me, please, to enumerate the most important ones.

- (a) Nursing care, while being the best possible under the circumstances, leaves much to be desired. I should like to stress the old request that registered nurse be put in charge on each ward. We could then hopefully expect that the quality of the over-all nurses' care in our department would markedly improve. The need for boosting the number of able-bodied attendants is considered self-evident, especially if one takes under consideration the fact that many patients who used to help are leaving the hospital on account of their improved mental condition.
- (b) Our department and its patients need the services of a clinical psychologist. This would likely increase the furlough and discharge rate.
- (c) In order to provide all our patients with adequate dental care, we need a dentist assigned to and responsible for the dental work in our department. It would be advisable to provide space and equipment for such work on the premises of our Service.
- (d) In a not too distant future, we expect to have the new laboratory ready for use. This laboratory, when modernly equipped promises to become a diagnostic tool of major importance, not only for the Tuberculosis Service, but also for the rest of the institution.

It is our belief that these expectations will come true only if the laboratory is run by a person experienced in bacteriology and animal testing, who will be able to give guidance and advice to the laboratory technicians and devote his time exclusively to the problems of the laboratory.

- (e) Occupational therapy has proved to be of remarkable benefit to our patients. As it appears, the combination of tranquilizing drugs and occupational therapy has shown gratifying results in a significant number of our patients.
- (f) Unfortunately, this year's tuberculosis survey had a rather late start. The reason was that for a prolonged period of time we were unable to obtain the necessary help-personnel. We do hope to be able to finish it by the end of this calendar year, provided we get needed cooperation from responsible authorities.

In conclusion, I would like to say that it is our sincere and firm determination to keep up the proven good work and try to improve the standards whenever that is feasible.

Attached are the statistical data regarding the activities in the X-Ray, Laboratory, Operating Room and treatment with tranquilizing drugs.

Respectfully submitted,  
F. A. Mercun, M. D.,  
Medical Director T. B. Services

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

This report has been organized with the aim of evaluating the treatment and progress of this hospital for the past several years. It is hoped that through the interpretation of the material, ways will be devised to extend progress in coming years.

It is fortunate that the increase in the "inpatient" population of this section on the last day of the year was only 41 patients greater than at the same period a year ago. What has been responsible for this gratifying situation in the face of our greatly overcrowded wards and shortage of personnel? Does it indicate a sudden new level of efficiency in therapy? Are extrinsic factors responsible? Is the admission rate lower? Are furloughs increasing and thereby holding the "inpatient" census lower? These are the questions that this report has attempted to investigate.

In Table I the number of cases in treatment during the year has been arranged so that column two (2) indicates the number of cases in continuous treatment at the beginning of the year; column three (3) those on furlough but potentially returnable cases; column four (4) cases admitted for the year; column five (5) those admitted and found to be without psychoses (not considered as cases treated); column six (6) total cases treated (sum of column 2, 3, and 4, less column 5); column seven (7) net increase by year in treated cases; and, column eight (8) the total voluntary admissions which are also included in total admissions and tabulated here merely for evaluating the net increase in census during the years when voluntary admissions were high.

Table I

Year	Census 1st day	On Furlough	Admissions for Year	Not Psychotic	Cases Treated	Net Increase Treated	Voluntary Admissions
1957	4,035	976	1,190	101	6,100	173	0
1956	3,999	836	1,179	87	5,927	46	5
1955	3,986	839	1,130	74	5,881	145	129
1954	3,882	752	1,107	5	5,736	256	118
1953	3,737	711	1,043	11	5,480	328	122
1952	3,598	720	837	3	5,152	170	33
1951	3,555	641	804	18	4,982	115	
1950	3,436	608	833	10	4,867		

Actually, only 11 more cases were admitted in 1957 than in 1956 but there was a total of 173 more cases treated in 1957 than in 1956. This differential is in part due to the increase in the number of cases

on furlough that must be considered as treatment cases. In 1957, there were 140 more patients on furlough on the last day of the year than at the same time in 1956, and in 1956 there were 3 less on furlough than in 1955. It is also to be observed that there was an appreciable increase in the "not psychotic" group in 1957 and these cases were discharged as soon as their status was determined, thereby relieving the hospital of these as treatment cases.

There were 1233 more cases treated in 1957 than in 1950, an average increase of 175 cases per year for the past 7 years. The high net increase in cases treated in 1953 and 1954 corresponds to the years when voluntary admissions were high. While a study of these voluntary cases is not yet complete, it appears that many of them would not have been admitted if they had been processes for court commitments. In a preliminary study of these cases, it is found that of those originally voluntarily admitted only 6 were finally committed in 1952, 8 in 1953, 5 in 1954, and 1 in 1955.

Table I indicates an increasing number of cases admitted which are found "not psychotic". While on the surface this seems to reduce the responsibilities of the hospital, these cases require as much or more time and expense for evaluation, laboratory examinations, x-rays, and nursing care as those with psychoses, and if these cases could be eliminated at the county level, the funds and time spent in evaluation could be directed to those who are in need of the service of this hospital. In this respect, screening at the "prehospital" level could be a real source of economy for the Milledgeville State Hospital.

In Table II the "over-all" census of the hospital on the final day of the year and the ratio of furloughed to "inpatients" has been considered. In column two (2) the resident census on the final day of the year is listed; column three (3) indicates the patients still eligible for treatment but on furlough; column four (4) the total potential cases on file (in continuous treatment plus the furloughed); column five (5) the net increase of cases on file; and, column six (6) the ratio of furloughed to "inpatients" expressed as percent.

Table II

Year	"Inpatients" last day year	On furlough	Total on file	Net increase on file	Ratio furlough to "inpatients" (per cent)
1957	3,965	1,087	5,052	41	27.6
1956	4,035	976	5,011	176	24.2
1955	3,999	836	4,835	10	20.9
1954	3,986	839	4,825	191	21.0
1953	3,882	752	4,634	182	19.4
1952	3,737	711	4,448	130	19.0
1951	3,598	720	4,318		

Although the census on the last day of 1957 was 70 less than at the same day one year ago, there were 111 more patients on furlough on the last day of 1957 than in 1956. The average increase in the furloughed cases on the last day of the year for the past 7 years was 52 and the average increase in furloughs on the final days of the last 2 years was 120. These figures are indicative of a rather substantial increase in the furloughed rate at a given interval of time. When the ratio of "inpatients" to furloughed patients is expressed as a percent, there is evidence that the past 2 years has brought a 7 percent increase in the furlough ratio. While on the surface an increase in the relative furlough rate is a favorable indication of effective treatment, actually the best statistical test of the success of treatment is not the furlough but the discharge of cases. This will be discussed later when the discharges are considered. In evaluating the furloughed cases it is essential to keep in mind that these are potentially returnable cases and if an influx of returnable cases should occur they would impose a difficult and embarrassing administrative problem with the present available facilities.

Table III is concerned with the cases of first admission and readmission. The data are arranged in a self-explanatory manner.

Table III

Year	Admissions	Readmissions	Total	Ratio of readmissions to total admissions in percent
1957	833	357	1,190	30.0
1956	907	272	1,179	23.1
1955	865	265	1,130	23.4
1954	834	273	1,107	24.6
1953	801	242	1,043	23.1

Although first admissions in 1957 are less than in 1956, the 1957 readmission rate is markedly greater than 1956. It is also seen in this table that the ratio of first admissions to readmissions in former years was 100:23. In 1957 this ratio was 100:30. The factors responsible for this recent change in trends are not fully determined. There is evidence that more patients are being furloughed and this may in part be due to the feeling of security in the newer tranquilizing drugs. It would seem that whatever has brought about the increased furlough rate loses its effectiveness and many cases are not able to continue a sustained extramural adjustment. As a consequence these cases require recommitment.

Table IV is presented to indicate the trend of admission of the aged patients. This table is based on the cases who were 60 years or older at the time of admission in 1957.

Table IV

Year	Admissions	Readmissions	Total	Over 60 yrs. on admission expressed in percent of total admissions
1957	277	73	350	32.1
1956	240	53	293	26.8
1955	266	56	322	30.5
1954	227	58	285	25.8
1953	233	74	307	29.7

These data indicate that the aged patient admission has increased in the past 5 years. Added to this is the extended life expectancy of the patients in the continuous treatment services, giving an over-all increase in the administrative problems of caring for the aged patients. While the total white female cases in the hospital in this age group has not been tabulated this year, in 1956 there were 1230 white females over 65 years of age being cared for in this hospital.

Table V is a summary of the major diagnostic groupings of cases admitted to this hospital for the past 7 years.

Table V

	1957	1956	1955	1954	1953	1952	1951
Alcohol and Drugs	70	75	66	69	55	14	25
Aged	314	293	322	285	307	208	191
Functional	640	599	482	470	414	380	403
Psychoneuroses	8	35	79	122	120	75	35
Mental Deficiency	54	47	58	61	26	64	47
Epilepsy	32	41	37	29	19	28	25

Functional disorders make up the largest category of cases admitted. There seems to be no significant change in the distribution of these categories in the past 7 years except that the aged in 1953 were considerably higher than might have been anticipated. This is very likely due to a large number of aged patients being admitted on voluntary basis. Other increases seem to be in keeping with the increased state population.

Table VI is a comparative study of the furloughs and discharges for the past 7 years.

Table VI

Year	Furloughed	Ratio furloughed to treated in percent	Discharged minus psychosis	Ratio discharged to furloughed in percent
1957	2,118	34.7	746	35.2
1956	2,110	36.9	639	30.3
1955	1,814	30.9	757	41.7
1954	1,620	28.2	672	41.4
1953	1,437	26.2	614	42.7
1952	1,172	22.7	531	45.3
1951	1,126	22.6	465	41.3
1950	949	19.5	460	49.0

It will be noted that the number of furloughs has been increased remarkably in the past 7 years, being more than double in that period of time. In considering the interpretation of these data, it must be kept in mind that there are a number of patients having more than one furlough in the year, and indeed, a few had several brief furloughs. However, assuming the proportional number of repeated furloughs in 1957 for the same persons to be similar to other years, it is seen in column three (3) that the ratio of furloughs to cases treated in 1957 is about 35:100. In column five (5) the ratio of furloughed to discharged patients is decreasing remarkably in the past 7 years. This may very well express a less conservative attitude toward furloughing patients that are not as fully restored as was the case in the past years. It may reflect the increased ease of transportation of relatives and their greater willingness to accept responsibility for the care of the mentally ill in their homes. It is also possible that the tranquilizing drugs have given an added impetus to the furloughing of patients that are not as well as was formerly done.

Table VII is presented to show that percent of restored (R), and improved (I), cases discharged from the hospital for the last 15 years. These are considered as a measure of the effectively treated cases.

Table VII

Year	Total discharged	Percent restored	Percent improved	Total effective treatment	3 yr. average total effective treatment	Percent unimproved
1957	847	13.1	78.6	91.7	88.9	8.3
1956	726	11.6	76.5	88.1		11.9
1955	831	7.3	80.6	87.6		12.2
1954	677	14.6	76.2	90.8	84.2	9.2
1953	625	13.3	79.9	93.2		8.3
1952	534	7.3	78.9	86.2		13.7
1951	483	6.4	80.4	86.8	79.0	12.4
1950	470	11.7	68.5	80.2		19.8
1949	407	14.7	71.1	85.8		14.2
1948	418	9.9	71.1	81.0	81.6	19.2
1947	423	8.7	70.0	78.7		21.3
1946	387	12.8	65.5	78.3		21.6
1945	338	17.4	61.5	78.9	81.6	21.1
1944	298	17.1	63.7	80.8		19.1
1943	292	19.0	66.2	85.2		14.9

The total discharged cases have more than tripled in the past 15 years. In column five (5) the percent of discharged that were restored or improved are shown. In column six (6) the average of the discharges that were restored or improved for three year intervals is shown. It is noted that the average for the three years preceeding the use of these agencies. This brings one to the question of what effectiveness these drugs should be given. Certainly it will need further re-evaluation in the next few years.

Table VIII gives the number of cases treated, the number of discharged as restored (R), improved (I), and unimproved (U). It also expresses the ratio (percent) of each of the above categories of release from the hospital for the past 8 years.

Table VIII

Year	Cases treated	Discharged			Ratio discharged to treated in percent			Ratio of total discharged to treated in percent
		R	I	U	R	I	U	
1957	6,100	98	586	62	1.6	9.6	1.0	12.2
1956	5,927	74	589	76	1.2	9.9	1.3	12.4
1955	5,881	55	610	92	.9	10.4	1.6	12.9
1954	5,736	98	512	62	1.7	8.4	.9	11.0
1953	5,480	82	481	51	1.5	8.9	.9	11.3
1952	5,152	39	419	73	.7	8.1	1.4	10.2
1951	4,982	30	374	61	.6	7.4	1.2	9.3
1950	4,867	54	315	91	1.1	6.5	1.9	9.5

The general trend of the cases released indicates that there is not only an increase in the number of discharges, but there is an increase in the ratio of cases treated. This is accounted for by the improvement in the treatment and rehabilitation of cases. This trend is a gradual one and although the table does not carry the statistics back for more than 7 years, the tabulation for the past 15 years shows the gradual effectiveness of the treatment and discharge of patients. One of the features that the above table shows is that there has been no sudden major changes in the trend as compared to the previous years. Since the advent of tranquilizers one would hope to see a marked improvement in the number of cases discharged from the hospital. This has not been the case. It seems important to seek for the factors responsible for this improvement in other channels.

#### DISCUSSION

The overall increase of 41 in the census of the white female patients in 1957 is gratifying in the face of the overcrowded conditions of this hospital. At first glance, it might be looked upon as a great triumph in the successful treatment and rehabilitation of cases, while there is definite indication that there is a steady improvement in rehabilitation, we must not be unmindful that the number of admissions was only 11 more in 1957 than 1956 and that discharges for cases found "not psychotic" in 1957 was adequate to bring the "inpatient" census below the level of 1956. There are also 111 more patients on furloughs in 1957 than 1956. In contrast to these positive factors in holding the "inpatient" census down, is the fact that there were actually 126 more white female patients treated in 1957 than 1956. We can justly be proud that the discharge rate in 1957 is 12.2 percent of all cases treated which is about 3 percent better than in 1950.

This brings up the question of the source of effectiveness of treatment in the past several years. One might suspect that the "miracle psychiatric drugs" should hold first place. Actually, the statistics do not support such view with an enthusiastic finality. They may be a factor that has helped to keep the admission rate at a steady level, and yet the total admission of 1949 was 693 while in 1948 it was 777; in 1943 it was 449 while in 1942 it was 493. There is some likelihood that more patients are receiving psychiatric care outside the hospitals now due to availability of a greater number of psychiatrists and as a result of increased family resources.

I feel very strongly that the progressive success over the years in the rehabilitation of patients of this hospital has pivoted about the increased facilities and skilled personnel. In 1951 the total personnel for all services of this hospital included 867 attendants, 49 graduate nurses, 13 occupational therapists, 1 social worker, no psychologists, and 2 recreational therapists. Since that time there has been gradual increase in the personnel until in 1957 there are: 1142 attendants, 80 graduate nurses, 30 occupational therapists, 5 social workers, 3 psychologists, and 9 recreational therapists. In the female department the physicians have increased from 4 in 1945 to 10 in 1957. Since 1950 the attendant training program has added great skill in the ward administration. The affiliate nursing program has grown several fold and emphasis on rehabilitation has evolved with enthusiasm to a new level. The care of the physical and surgical illnesses with a fine staff of consultants in all the fields of specialties has been added since 1950. These advances guided by your keen judgement has been the chief factor in the progress of this hospital.

In view of the ever growing state population from which our patients come, we cannot become complacent with the results of 1957. There is no conclusive evidence that mental illness is decreasing in frequency and, indeed, some authorities believe it may be increasing with the strain of modern technology and social advances. We must be aware of the general economic trends and the devaluation problems as they effect our program. All of these considerations affect our needs in supplying the tools for treatment of mental patients, and in my opinion our tools are skilled personnel which means additional expense to the state.

When one becomes aware that the per capita income of Georgia is now more than \$1500.00 annually, it is most important to get each patient possible in an independent and economically productive condition. It seems good economic judgement to believe that each patient is entitled to an equivalent of the per capita income which he or she is potentially able to earn. With this increased amount in the budget for this hospital the addition of trained personnel could be obtained. We look forward to seeing this goal reached in the next appropriation.

May I express my sincere appreciation to you, and the many who have been so understanding and helpful to me during the past year.

Respectfully yours,

J. D. Combs, M. D.

Clinical Director

## OCCUPATIONAL THERAPY DEPARTMENT MILLEDGEVILLE STATE HOSPITAL

July 1, 1957

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is the Annual Report of the Occupational Therapy Department of the Milledgeville State Hospital.

The past year has been a most successful year for the Occupational Therapy Department. Many added crafts have created much interest and happiness for the patients. Especially in the field of Creative Art, definite progress has been made. Patients are taking a vital part in all the activities, and we feel proud of the fact that 30% of our group have been furloughed during the year.

New woodwork equipment has meant a great deal to the male department in the Howell Building. They have made many useful things, adding this year the following to their accomplishments: outdoor furniture, end tables, lamp stands, and magazine racks. In the Boland Building Shop, concentrated attention has been placed upon picture framing. This has proved beneficial to all patients and employees of the hospital. Many lovely picture frames have been made through the efforts of these patients and distributed to various wards.

The White Female contribution in the needle crafts has grown rapidly over the hospital. To supply the work for these patients requires twice the amount of work over last year. There is such a demand for the linen table cloths that we are not able to meet it.

We feel grateful towards the Educational Department for their participation in our program, especially Ceramics. The Student Nurses are especially helpful with the patients, trying to find ways to help in rehabilitation.

Many additions have been made to our Ceramics Department. For patients who are unable to do heavy work, this kind of therapy has rehabilitated many, enabling them to return home and engage in this type activity.

A large number of prizes were won at the Fair. Our work was most outstanding, and we were indeed proud of the numerous sales made.

Through the exhibit in Atlanta, many items have been sold through out of town orders.

We feel proud of the progress made in our department. The O. T. Aides have been most cooperative and willing to give their time and talents for the benefit of the patients and the department.

In the colored buildings, progress has definitely been made. A new shop has been built, almost ready for occupancy. The facilities of this shop are outstanding. Our colored patients do a wonderful job for our fair exhibits. Dr. Bailey and Mrs. Knowles are to be commended for their excellent leadership and interest in our work among the colored patients.

Our financial record follows in detail. However, we would like to include the total figures in this letter. They are as follows:

(1) Paid amount of invoices	\$14,933.89
(2) Total receipts for sales	17,137.78
(3) Total amount of supplies on hand	4,754.67

We wish to express our deep appreciation to Dr. Peacock and all Staff Members for their interest, help, and cooperation.

Respectfully submitted,

(Mrs.) Maude L. Boone, Supervisor  
Occupational Therapy Department.

## OCCUPATIONAL THERAPY DEPARTMENT

### Summary of Monthly Reports on Patients

Month	Year	Total	Furl.	Imp.
July	1956	900	35	409
August	1956	875	46	482
September	1956	950	31	413
October	1956	865	32	423
November	1956	1,000	100	500
December	1956	850	150	450
January	1957	800	20	396

Total			624	5,250

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Sir:

This is the Annual Report from the Recreation Department for the fiscal year, July 1, 1956, through June 30, 1957.

This year has seen an increase in the number of patients that are participating in recreation activities as furnished by this department. Each activity has shown an increase in the number of patients taking part.

The program has been as diversified as possible so that all of the patients will find and take part in some activity.

The annual barbecues for the white and colored were held on their respective days, along this line wiener roasts, picnics and fish fries were given for almost all of the patients.

This past year has seen the addition of cinemascope movies in the hospital program. At the present, two buildings have the equipment required for this type of picture. This addition has meant better movies for the patients. We have continued to increase the showing of movies on the wards. Every building has at least two ward movies per week, if not more.

This year has also seen the inauguration and continuance of two groups of Square Dancers. These groups have made much progress and accomplished more than was expected.

Several groups of regressed patients have been brought to the Auditorium twice a week and it is felt that this has been a very successful program. It is planned to continue and expand this part of the program.

We have continued to have entertainment from surrounding communities given for the patients, as well as the Christmas parties.

Respectfully submitted,

Bruce R. Prosser  
Recreation Director

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is a report of the work done in the Division of Clinical Laboratories for the fiscal year July 1, 1956, through June 30, 1957.

### RESUME

#### SEROLOGICAL EXAMINATIONS:

Blood (Sera) for the Wassermann reaction .....	5,064
Blood (Sera) for the Kahn reaction .....	517
Blood (Sera) for the V. D. R. L. test .....	1,624
Cerebrospinal fluid specimens collected .....	600
Cerebrospinal fluid for the Wassermann reaction .....	600
Cerebrospinal fluid for Colloidal Gold reaction .....	600
Cerebrospinal fluid for globulin contents .....	600
Cerebrospinal fluid for cell counts .....	686

#### CLINICAL LABORATORY EXAMINATIONS:

Blood Specimens collected .....	43,128
Blood, Counts (White, Red and Differentials) .....	27,917
Blood, Hemoglobin estimation .....	10,850
Blood, Prothrombin time .....	2,004
Blood, Eosinophil counts .....	77
Blood, Hematocrits .....	1,225
Blood, Sedimentation rate .....	994
Blood, Coagulation time .....	89
Blood, Bleeding time .....	83
Blood, Reticulocyte counts .....	295
Blood, Platelet counts .....	96
Blood, Red cell fragility test .....	20
Blood, Coombs tests .....	39
Blood, Sickie cell counts .....	41
Blood, L. E. prep. ....	98
Blood, Films for malaria .....	11
Blood, Clot retraction .....	5
Blood, Indices calculations .....	86
Blood, Cyro globulin .....	7
Blood, Grouped .....	6,303
Blood, The Rh factor .....	5,287
Blood, Pints whole blood collected .....	1,693
Blood, Pints whole blood issued .....	1,479
Blood, Cross matched .....	1,479
Blood, Glucose .....	11,531
Blood, Non-protein nitrogen .....	4,692
Blood, Serum amylase .....	112
Blood, Serum bilirubin .....	417
Blood, Serum bromide .....	72
Blood, Bromsulphalein tests .....	69
Blood, Calcium .....	150
Blood, Cholesterol, total .....	310
Blood, Cholesterol, esters .....	110
Blood, Plasma CO <sub>2</sub> capacity .....	708
Blood, Serum chloride .....	655
Blood, Creatinine .....	57
Blood, Cephlin Flocculation tests .....	203
Blood, Thymol turbidity .....	159
Blood, Icterus index .....	322

Blood, Acid phosphatase .....	79
Blood, Alkaline phosphatase .....	186
Blood, Phosphorous .....	109
Blood, Uric acid .....	63
Blood, Urea nitrogen .....	43
Blood, Total protein .....	351
Blood, Albumin .....	336
Blood, Globulin .....	336
Blood, Sodium .....	235
Blood, Potassium .....	228
Blood pressure taken .....	280
Urine, Routine analysis .....	11,951
Urine, Sugar and acetone .....	7,230
Urine, Urobilinogen .....	292
Urine, Bile .....	264
Urine, Mosenthal tests .....	123
Urine, Phenolsulfonphthalein tests .....	175
Urine, Sulkowitch tests .....	31
Urine, Bence-Jones protein .....	12
Urine, Addis counts .....	1
Urine, Asheim-Zondek tests .....	77
Feces, Routine analysis .....	2,399
Feces, Occult blood .....	774
Feces, Bile .....	67
Sputum, Routine microscopic .....	70
Milk, Butterfat contents .....	48
Gastric analysis .....	335
Electrocardiograms .....	2,114
Basal Metabolic Rate .....	81
Xenopus Laevis Frog Pregnancy tests .....	4
Cerebrospinal Fluid, Sugar .....	73
Cerebrospinal Fluid, Chloride .....	58
Cerebrospinal Fluid, Protein .....	93
Cerebrospinal Fluid, Differential counts .....	35

#### BACTERIOLOGICAL EXAMINATIONS:

Milk, Bacteria counts .....	48

Paul F. Tumlin, M.D.

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is a summary of the work, achievements and general orientation of the Psychology Department for the fiscal year ending June 30, 1957.

Psychology is a scientific discipline founded on the experimental method; its contributions have been developed through the use of scientific procedures. We in the department are aware of the need for research dealing with the mentally ill individual and recognize that no scientific progress can otherwise be made. The Clinical Psychologist conceives as an important part of his job the participation in research activities and he is specifically trained in this area. Much research is being carried on in the field of Psychology. All findings are not directly applicable to our patient population since every hospital population has some unique characteristics which prevent complete generalization. It is therefore advisable to test some of the other research findings in this particular setting in order to make the most use of information available. The department has recently acquired a statistical calculating machine which has been of considerable help in carrying out research projects. This work is largely undertaken by the Psychologist on his own time. A number of research contributions have been made by this department but the need in this area is so great that at least one clinical psychologist could devote his full time to applying research to the needs of the population of this hospital.

During the past year, we have reached 211 patients in group and individual psychotherapy. As was shown in our last year's report, a high percentage of the patients who received formal therapy were furloughed. Each year this represents a large saving to the State. We consider that psychotherapy is one of the important functions of this department and we are always anxious to increase our services in order to reach more of the hospital population. Research is showing that regardless of what type of treatment the patient receives, whether it be tranquilizing drugs, insulin therapy, or electroshock therapy, that a much more favorable response to treatment programs in hospitals is obtained if psychotherapy is also included.

The Psychology Department continues to be very active in supervising ward environment programs. It has been shown that the ward

environment contributes much toward the improvement a patient makes while in the hospital. These programs aid in improving the attitudes of the patients, make varied activities available and assist in developing new interests. These programs are directed toward an integrated program of rehabilitation which is incorporated with other treatment procedures.

We also contribute to the educational program in the hospital. The department lectures to all student nurses who affiliate with the hospital, to attendants, and to lay groups, both visitors to the hospital as well as to outside groups. This contributes toward better patient care here in the hospital as well as helping indirectly in assisting in the education of the public.

Much time is spent in making diagnostic evaluations of patients. The psychologists have participated in diagnostic clinics and through the use of standardized techniques have been able to contribute toward the formulation of more accurate diagnoses.

The routine work of the department is shown below:

I.	Patients contacted	1956-57
A.	Patients evaluated with Psychological Test	902
	Rorschach	289
	Wechsler-Bellevue	553
	M.M.P.I.	648
	H.T.P.	819
	Bender-Gestalt	815
	Kent E.G.Y.	186
	Other	115
	Total tests used	3,425
B.	Psychotherapy:	
	Patients seen in individual psychotherapy	19
	Patients seen in group psychotherapy	192
	Patients given activation, music and informal therapy	2,380
	Total in Psychotherapy	2,591
	Total patients contacted	3,493
II	Reports written	1,005
III.	Teaching nurses and attendants (hours)	89
IV.	Research (Approximate hours used)	359

During the past year, John T. Rowell resigned as Chief Clinical Psychologist and I was appointed to replace him. Mr. Rowell gave impetus to a more effective Psychology Department and his efforts have been felt in many areas of hospital activity. The department now includes, in addition to the Chief Psychologist, Robert W. Wildman and Herbert E. Babb as Clinical Psychologists and Mrs. Ginn as secretary. Although many efforts have been made to fill vacancies which exist in the department, it has been extremely difficult to recruit qualified clinical psychologists into the department due to the small number available and the large demand that exists for their services. Considering the small number in the Psychology Department, we feel that substantial accomplishments have been made and we are anxious to be able to extend our services to more areas of the hospital as soon as adequate personnel is available.

Respectfully submitted,

James B. Morris,  
Chief Clinical Psychologist.

June 30, 1957

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

For the fiscal year ending June 30, 1957 the following annual report of the Nursing Education and Nursing Service Departments is submitted.

On August 1, we accepted, with regret, the resignation of Mrs. Frances M. Spivey, R. N., Director of Psychiatric Nursing Education. Mrs. Spivey was happy in her work and was doing an excellent job in the educational program but had to tender her resignation when her husband's business took them to another city. The vacancy was filled immediately when Mrs. Gertrude H. Youngblood, R. N., a Clinical Instructor for more than six years, was promoted to the position.

As Educational Director, Mrs. Youngblood has been very active. In August she attended a conference on Clinical Education, sponsored by the Georgia league for Nursing, held at the Medical College of Georgia in Augusta. On January 25, Mrs. Youngblood and the Director of Nursing attended a State Wide Faculty meeting held in Atlanta. In March, Mrs. Youngblood was in Atlanta to attend a State Wide Curriculum meeting and also the Annual Convention of the Georgia League for Nursing.

In August a maternity leave of absence was granted Mrs. Ouida A. Couch, R. N., Clinical Instructor, who returned to her position June 16. Mrs. Mildred D. Broome, R. N., filled this position during Mrs. Couch's absence. Mrs. Broome has been granted a year of maternity leave beginning June 16.

In October, with your kind permission, we were privileged to have brought to our campus an in-service education program for graduate nurses, made available through, and in cooperation with, the School of Nursing of the Medical College of Georgia in Augusta. We were most fortunate in having sent to us as instructor, Miss Alda L. Ditchfield, Associate Professor of Nursing, who taught two nursing education courses, each of which carried three quarter hours of college credit. Eleven graduate nurses from our hospital staff, five from Macon Hospital, one from V. A. Hospital in Dublin, one from Lynwood Hospital in Augusta, and one from Allen's Invalid Home took advantage of this opportunity. They were all enthusiastic about these courses and expressed their sincere appreciation and a hope that other courses might be offered in the future.

In November the Director of Nursing, one Clinical Instructor, and a Graduate Charge Nurse attended the Annual Convention of the Georgia State Nurses Association, held in Valdosta.

In December we were contacted by Miss Kathleen Black, Director, Mental Health and Psychiatric Nursing Advisory Service, concerning acting as hostess for a Psychiatric Nursing Consultation Conference which was held at our hospital January 30, 31, and February 1. We had with us as leader and moderator, Miss Eleanor Frany, Psychiatric Nursing Consultant from the National League for Nursing in New York City. Attending were the Directors and Faculty representations from the Schools of Nursing under contract for Psychiatric Affiliation as well as our own staff members. The purpose of this conference was to review the philosophies, aims, and objectives of both the sending schools and affiliate school and to bring about greater understanding of problems relating to affiliation, and to foster the feeling that psychiatry is an integral part of the nursing curriculum, the responsibility of both schools.

In evaluating the results of the conference, it was felt that much benefit could be derived from it, and a suggestion was made to have a follow-up conference at a later date. Fall of 1957 was suggested as a possible time for this conference but replies to inquiries sent each Director of Nursing indicated that although they were interested, previously planned schedules seemed too heavy to permit more than one conference of this nature this year.

In March four Clinical Instructors and the Assistant Director of Nursing made a visit to the three Atlanta Hospital Schools of Nursing whose students affiliate here. This visit was thoroughly enjoyed and was not only profitable from the experiences afforded but also a most desirable means of establishing rapport and understanding between the faculty of the affiliating agency and sending schools. We are hoping to visit the other schools in the near future.

On June 2, Mrs. Maidana K. Nunn, R. N., a Clinical Instructor, received the degree of Bachelor of Arts from the Georgia State College for Women in Milledgeville. Mrs. Nunn has persistently and diligently pursued her education since joining our nursing staff in September, 1952, upon graduation from the Macon Hospital School of Nursing. She deserves much credit for her effort and achievement. We are justly proud to have her in the educational department. By assistance from you and Judge Kemper, Mrs. Nunn is being granted a year of educational leave with scholarship in September to continue her education towards the Bachelor of Science in Nursing Education.

Only very minor changes have been made in the psychiatric affiliation course. Since we have the nice large library in the Education Building, we have, as a means of encouraging the students to

study more, assigned each student two hours of library work one night each week. During the past year ninety-five new volumes have been added to the library. To help with extra duties entailed there, we have detailed an employee to work in the library until such time as a regular librarian position can be established.

We still have contracts with seven Georgia Schools of Nursing which sent our program during this fiscal year 242 students, all of whom were given the Psychiatric Achievement Test upon completing the course.

These schools and students are listed below:

Georgia Baptist Hospital	Atlanta	108
Georgia Southwestern College	Americus	6
Grady Memorial Hospital	Atlanta	20
Macon City Hospital	Macon	26
Medical Center (formerly Columbus City)	Columbus	30
Piedmont Hospital	Atlanta	38
Warren A. Candler	Savannah	14

In addition to the students from these schools of nursing, six graduate nurses have taken advantage of the course in Psychiatry. We are well pleased to note that having students and graduate nurses here for psychiatric affiliation is paying off in additional professional personnel, as more nurses are deciding to work in this field. Within this fiscal year, five graduate nurses, who have had the course in Psychiatry here, have returned and are employed on our nursing staff.

In November certification exercises were held for 79 white and 48 colored employees who had completed the psychiatric aide course. In the fall of 1957 we expect to have approximately 167 employees to receive certificates. We are gradually progressing in catching up with the large back log of attendants who have worked for a number of years without any formal training before our present aide program was begun. As a whole, the course of instruction is very well accepted by the employees; however, we are expecting even better results when we can train the new workers as they are employed.

The past year has, as usual, been a very busy one. Medical and Surgical wards have operated efficiently and effectively under very heavy work loads. Admitted to hospital wards for treatment during the past year were the following number of employees and their dependents:

White Female Employees .....	427
White Male Employees .....	319
White Female Dependents .....	331

White Male Dependents .....	96
Colored Female Employees .....	65
Colored Male Employees .....	30
Colored Female Dependents .....	75
Colored Male Dependents .....	23

One of the major problems confronting us in nursing service is that of the greatly increased number of bed patients in the institution. Reports from the reception wards indicate that a large percentage of patients received are bed patients. These, together with the large number of our aging patient population already in this category, have created a very real problem in all of the buildings. In an effort to help solve this problem, we are asking that the positions on one general ward in Boone, Allen, Arnall, and Freeman Buildings be re-allocated as sick wards. If we are given budget approval of additional funds, we can take care of many of these bed patients being housed on general wards where both facilities and personnel are inadequate to provide for them properly.

At this point I would like to express appreciation for the fine spirit of cooperation and loyalty which has been very evident among those making up our nursing service personnel. A good working morale has been manifested as the nurses have worked long and tiresome hours with extra duties that were automatically imposed by increased patient load as our institution grew daily. There have been few complaints and it is felt that credit should be given all for jobs well done.

We keep hoping that ample funds can be appropriated soon for sufficient additional personnel to permit reducing the hours of duty. This, we know, will not only result in greater efficiency on the part of the employees but also will be a real boost to their general morale.

There were only a small number of new positions approved for nursing service during the past year. These were as follows:

White Female Service .....	2
White Male Service .....	3
Colored Female Service .....	0
Colored Male Service .....	0

Retiring from nursing service during the year were the following:

White Female Employees .....	2
White Male Employees .....	1
Colored Female Employees .....	3

Colored Male Employees .....	3
(1 TB retirement)	

There are 1,366 positions allocated to nursing service. These are broken down into the various classifications as follows:

Director of Nursing .....	1
Assistant to Director of Nursing .....	3
Director of Psychiatric Nursing Education .....	1
Psychiatric Clinical Instructors .....	6
Building Supervisors, R. N. ....	15
Surgical Supervisors, R.N. ....	3
Surgical Ward Supervisors, R.N. ....	2
Surgical Nurses, R.N. ....	4
Graduate Charge Nurses, R.N. ....	23
Staff Nurse, R.N. ....	22
Building Supervisors, Attendant, Female .....	6
Supervisor Attendant, Male .....	2
Assistant Supervisors, Attendant Male .....	5
Building Supervisors, Attendant Male .....	7
Surgical Aids .....	2
Charge Attendant .....	358
Attendant .....	757
O. T. Aide (Needlecraft) .....	26
O. T. Aide (Woodwork) .....	3
X-Ray Technician and Trainee .....	6
Beauticians .....	8
Matron, Nurses' Home .....	5
Bus Driver .....	7
Maid (TB service) .....	6
Clerical Workers .....	12
Students (Psychiatric Affiliates) .....	78

On behalf of Nursing Education and Nursing Service, I would like to express our genuine appreciation for the consideration and professional care we have received from the medical staff, and for the gracious and cooperative manner in which those assigned to teaching duties in the Psychiatric Affiliation and Psychiatric Aide programs have always responded.

For your kindness, patience and understanding, I am always grateful.

Respectfully submitted,  
(Mrs.) Myra S. Bonner, R. N.  
Director of Nursing

## ANNUAL REPORT OF THE BEAUTY SHOPS

## WHITE FEMALE DEPARTMENT

Fiscal Year July 1, 1956 - June 30, 1957

Chief Beautician

July 1, 1957

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

Report of the Social Service Department for fiscal year from July 1, 1956 through June 30, 1957, is herewith submitted.

The method of obtaining case histories of patients on admission remains the same as reported in previous years; that is, relatives are interviewed at time of admission of patient, if contact with them can be made. When interview is not possible, the next-of-kin, or a representative, is requested to come for personal interview. If none of family can come or if no next-of-kin is recorded, a questionnaire is mailed to next-of-kin or to the County Department of Public Welfare, who make appropriate contact and return completed questionnaire.

During fiscal year, case histories were obtained as follows:

Histories from interviews .....	1,889
Histories by questionnaire .....	1,737

Note: All case histories of negro patients are obtained by questionnaire, and these are included in the 1,737 cases above reported.

All medical references obtained both by interview and by questionnaire are contacted for clinical reports. These references are: attending physicians, hospitals, governmental agencies, et cetera.

In event of conflicting information in a history, special investigation is made by Chief Medical Social Worker. She also makes such investigations where information has not been otherwise obtainable and patient is being considered for diagnosis or furlough.

The Chief Medical Social Worker has cooperated with local chapter of Alcoholics Anonymous by furnishing a daily list of alcoholics who have been released.

The Chief Medical Social Worker is subject to call as public and/or family relations counselor in cases of personal problems. These are termed "service cases" and are included in that classification summarized as follows:

There were 1,760 service cases during the year, in the matter of social security benefits, other claims, family relationships, insurance, matters of estate, compensations, pensions, restoration of civil rights, et cetera., and requested conferences with patients, both in Hospital and on furlough.

The Chief Medical Social Worker also personally handled:

Service cases representing furloughed patients, et cetera .....	1,760
Placements of patients (Job placement and others) .....	54
Transfers to out-of-State institutions .....	38
Out of town supervisory visits .....	90
Special investigations on instruction of Superintendent .....	8
Arrangements for eyeglasses .....	156

Special Services handled by Chief Medical Social Worker:

- (a) Obtaining State Medical Aid and arranging for admission to University Hospital, Augusta, for cases requiring special treatment there.
- (b) Assistance to clinics in Atlanta, August, and Savannah in matter of rehabilitation programs for alcohol addicts who have been patients here.
- (c) Arrangements made for transfer of out-of-State patients.

Supervision of patients on job-placement is maintained by Chief Medical Social Worker with some assistance from other agencies.

Excellent cooperation continues between the Division of Vocational Rehabilitation and Milledgeville State Hospital, under original plan; that is, all feasible cases are referred by the Medical Staff to Social Service Department for referral to the local Counselor of Division of Vocational Rehabilitation, with all pertinent information, the Counsellor assisting with rehabilitation services. Six cases were so placed during this fiscal year.

The State Department of Public Health, through its County Nurses, continues its valuable assistance by means of the "Pilot Project".

The Counties participating now number twenty-two. The County Nurses report progress or problems of furloughed patients, also they respond with special reports to us on request. It is expected that other Counties will be added to this effective project.

Pilot Project contacts, including clinical abstracts,  
and service cases ..... 1,398

During the year twenty (20) babies were born to patients in this hospital, for whom suitable placement plans were made or are in process of completion, one case remaining in process. Some were placed with relatives; other in foster homes. County Departments of Public Welfare and/or child Welfare Consultants render assistance where their help is indicated.

Complete cooperation continues between the Hospital and the County Department of Public Welfare in exchange of information in cases of patients and former patients, particularly as related to their various relief programs or other forms of help to patients and/or their families. This is a major part of this Department's daily work and includes reciprocal information to other institutions and agencies over the country.

Interest in Christmas cheer for all patients continues to grow, as reflected in the following summary:

Contributions of cash and gifts, nice gifts, for the so-called "forgotten" patients were made by individuals, business firms, civic and fraternal organizations, Georgia Association of Mental Health, Inc., Beta Sigma Phi business women's sorority of Atlanta, Vienna Public School (a regular contributor in large quantity), and practically all Church denominations in addition to the extensive contribution of United Church Women of Georgia as a unit.

Total report:

Gift donors ..... 831

Cash donors ..... 459

Total donors ..... 1,290

Number of gifts: ..... Too many thousands to attempt  
an estimate.

Cash contributions ..... \$5,016.05

Of the total cash gifts, the sum of \$935.00 was designated by seventeen donors for Television Sets. A committee of the Hospital Staff made the purchase of gifts and television sets with \$5,016.05.

The annual Christmas parties, elaborate and with presents, were given by the Baptist, Methodist, Episcopal, Presbyterian, Church of God, Catholic, Christian denominations and the Jewish congregations for their members.

Ladies of the local churches brought the appointments and were the hostesses. The Church of Latter Day Saints, newly established in Milledgeville, this year participated in this program. In all Church activities, the Chief Medical Social Worker arranges dates and assists.

Since 1949, a magnificent Christmas contribution has come from Miss Laura Watson, a shut-in of Atlanta, who works all year reconditioning thousands of cards for patients to send, getting them to us well in advance of Christmas. Stationer-friends furnish her high grade, fitted envelopes. Her project this year covered the following supply:

Christmas Greeting Cards .....	15,000
Handmade "Picture Booklets" for bed patients to enjoy .....	6,000
Picture Scrapbooks, which are works of art. ....	150

This undertaking has reached such proportions that Druid Hills Baptist Church, Atlanta, and the Pilot Clubs over the State have volunteered to help her. The patients (those on closed wards particularly who can't shop) now depend on "Miss Laura" for her unfailing supply of cards to send and are most appreciative. The Chief Medical Social Worker furnishes annual estimates, and on receipt allocates the stocks of cards to the various wards in December and appropriately distributes the Scrapbooks and Booklets.

The Presbyterian and Catholic Churches have given their annual summer picnics, and the Episcopal Church has set a midsummer date for their picnic.

Easter Cards and gifts were received by patients from their Churches -- this Department assisting with verification of list, et cetera.

Eight Day Rooms have this year been completely furnished by United Church Women of Georgia with handsome, modern lounge furniture with extra matching chairs; the draperies are of like quality in harmonizing color-tones. The furnishings include card table sets of standard make, good pictures, lamps, tables, radios, smoking stands, television sets -- all combining in a most attractive, homelike effect to the benefit and delight of the patients. While United Church Women

take the lead in this, their special project, contributions in varying amounts are received from individuals and civic groups, notably the Columbus Federation of Women's Clubs; these cash gifts no doubt result from influence by United Church Women. A Day Room in Rivers Building (tuberculosis unit) is completely furnished by the Columbus Church Women, complete with Television by Columbus Pilot Club, and is dedicated as "The Columbus Room". This program over the institution progresses, and the Chief Medical Social Worker plans with the United Church committeewomen, consults with Ward Supervisors, and selects the Day Rooms to be furnished according to greatest need for this benefit, as far as can be arranged. Total day rooms now furnished -- 10.

Georgia Association for Mental Health, Inc., Atlanta, and United Church Women of Georgia continue Television as a primary project. Several relatives of patients have given standard, new sets. Many wards are yet to be supplied, therefore the need is stressed. Donations in any amount are received and unrestricted cash gifts are deposited in the Television Fund. Total sets in hospital to date - 150.

Varied and continuous contributions, handled through this Department, have come from individuals, clubs, churches, United Church Women over the State, et cetera., the gifts comprising presents and friendship cards for "forgotten" patients, musical recordings, material for handcraft, bulbs for seasonal planting, toys for children also strollers, et cetera., and good literature and books for Patients' Lending Library, also for ward distribution. Miss Laura Watson supplies birthday and other greeting cards for patients to send. Clean, modern clothing is recieved.

- (a) The Churches give ward parties for shut-ins.
- (b) United Church Women enlist the cooperation of talented individuals, college groups and other organizations and bring fine entertainment to our auditorium, including again this year Atlanta Symphony Orchestra and Third Army Band, in addition to best professional and amateur talent in Variety Shows.
- (c) The Junior Women's Club of Milledgeville continue their special program of bi-monthly ward parties for children able to benefit.

In the above interests and activities, the Chief Medical Social Worker handles the correspondence and assists with arrangements.

Patients' Benefit Fund (Rehabilitation) for indigent patients. This is a year-round interest of the Churches, and is the No. 1 project of St. Philip's Cathedral (Episcopal), Atlanta, whose St. Lydia Chapter

initiated the funds in 1949. The following purposes are served, the funds being administered by Chief Medical Social Worker:

- (a) Rehabilitation: Suitable, adequate clothing for people returning to employment, and maintenance to tide them over until earning.
- (b) Appropriate, adequate clothing for those going out into job replacement.
- (c) General (for patients in hospital):Hearing aids and other corrective appliances, material for dentures, et cetera. Optical examinations and eyeglasses, also repairs to eyeglasses and other appliances.

Floriculture Material: Garden Clubs over the State have made large gifts of plants. Atlanta Day Lily Gardens continue to furnish truck loads of select bulbs, all of which are welcome. Athens Garden Club sends choice plantings in season, this institution being their special interest. Chief Medical Social Worker maintains correspondence with donors and cooperates with Horticulturist.

Veterans Administration: Soldiers' serial numbers are obtained for the V. A. Contact Representative, with whom this Department cooperates in miscellaneous matters affecting ex-soldiers, soldiers and their dependents where mental illness is involved. Also, reports are furnished V. A. Hospitals on request.

Social Security: This year 2,106 clinical abstracts have been furnished in support of applications for freeze of benefits of patients while hospitalized here. The service to Social Security has further expanded as result to lowering the age of retirement for women to sixty-two years, also because of lowering age for eligibility for disability benefits; this earlier availability of funds to patients and former patients brings into cooperation the County Welfare Departments in many cases in planning for former patients and those under retirement age who might adjust well at home under supervision.

In conclusion, this Department continues as the Hospital's liaison with various institutions and organizations, groups and individuals in and out of State, with Juvenile Courts, Family Service Societies, et cetera.

Respectfully submitted,  
(Mrs.) Claire S. Callaway  
Chief Medical Social Worker

## MILLEDGEVILLE STATE HOSPITAL

## LIBRARY DEPARTMENT

July 1, 1957

Dr. T. G. Peacock, Superintendent  
 Milledgeville State Hospital  
 Milledgeville, Georgia

Dear Dr. Peacock:

The following is the Annual Report of the Patients Library for the fiscal year ending June 30, 1957.

Additional shelves are in the process of being added, in order to take care of all of the books which we have acquired. Magazine racks are also being installed.

Through the efforts of civic organizations of our State, we have been abundantly supplied with magazines, which have been enjoyed by many of the patients. The same organizations have also donated many books, increasing our books on hand from 10,415 as of June, 1956, to 14,034, as of June, 1957.

The Jaycees, Women's Clubs, United Church Women, Mental Health Department, and private individuals have contributed to our growth and welfare. Subscriptions to several magazines have been included in this project.

We are most happy to report that we will have the use of a carryall for distribution of magazines and books to the various buildings during the coming year. Thereby, more patients will be able to read the material provided here for their enjoyment.

The expenses incurred during the past year consists of the following:

(1) Supplies — Gaylord Brothers .....	\$52.45
(2) Reader's Digest Association .....	4.88
(3) Milledgeville Builders Supply .....	4.00
Total Expenses .....	\$61.33

We wish to express our deepest appreciation to you and the entire staff for the interest manifested in our Library.

Respectfully submitted,

(Mrs.) Frankie S. Simpson  
 Librarian

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

I herewith submit the report for the Dental Department for the period from July 1, 1956, through June 30, 1957.

The year's work has been successfully accomplished through the combined, conscientious efforts of the staff to meet the dental needs of the patients at the hospital. However, this success has been somewhat lessened by the serious shortage of dentists we have experienced during the past fiscal year. We were unable at any time to obtain a complete staff.

The Dental Director continues to lecture and show slides to the attendants enrolled in the psychiatric and training courses.

One of our dentists, in cooperation with a staff physician, has conducted a research project to determine the effect, if any, of a new medication in counteracting the effects of Dilantin Sodium on the gingivae of some epileptic patients. Though all of the data has been complied, the conclusions have not been established at this time.

A clinical suggestion submitted to Dental Digest Magazine by a dentist on our staff was accepted and is to be published soon.

We were pleased to be represented at the Hinman Dental Clinic in Atlanta in March by one dentist and the Dental Director.

There are at present five dentists, three oral hygienists, two laboratory technicians and two laboratory assistants, one of whom is a patient.

The Dental Department has performed 34,227 operations and treatments and 9,100 laboratory operations during the year.

I wish to thank you for your continued support and cooperation.

Respectfully submitted,

J. B. Herndon, D. D. S.

Director of Dental Services

Judge Alan Kemper, Director  
 State Department of Public Welfare  
 State Office Building  
 Atlanta 3, Georgia

Dear Judge Kemper:

As part of the Annual Report of the Milledgeville State Hospital for the fiscal year July 1, 1956 - June 30, 1957, the following reports and recommendations are submitted on the part of the Administrative Department.

The over-all cost of maintaining a patient for the fiscal year was \$895.75 or a per diem cost of \$2.45. The net cost to the State for maintaining a patient, exclusive of outlay, profits of productive units, and donated surplus commodities was \$854.38 per annum or \$2.34 per diem.

You will find outlined below a statement showing funds allocated for the ten year period ending June 30, 1957.

YEAR ENDED	MAINTENANCE	OUTLAY	TOTAL
6-30-48	\$ 3,052,574.35	\$ 899,082.25	\$ 3,951,656.60
6-30-49	3,656,817.69	880,826.83	4,537,644.52
6-30-50	4,788,343.22	706,303.06	5,494,646.28
6-30-51	5,259,800.80	879,750.00	6,139,550.80
6-30-52	6,380,849.44	2,135,025.00	8,515,874.44
6-30-53	7,926,413.17	1,825,803.84	9,752,217.01
6-30-54	7,517,070.07	271,159.88	7,788,229.95
6-30-55	8,593,548.52	261,367.41	8,854,915.93
6-30-56	10,297,130.00	672,936.57	10,970,066.57
6-30-57	8,995,670.00	421,500.00	9,417,170.00.

During this fiscal year the law was amended so as to provide social security coverage for employees of the Hospital. Current employees were allowed to accept or reject this coverage, but all future employees will be required to accept social security coverage.

During the year two garbage cooking trucks were purchased and we are presently cooking all garbage used for feeding pigs. We estimate that we produce enough edible garbage to feed out approximately 2,000 pigs and we are now building up our herd to maintain this number on hand at all times.

One of the dormitories at the Colony Farm was completed and equipment was bought. Patients will be moved into this dormitory within the near future. The other dormitory should be occupied within the next few months. When these dormitories are occupied, we will tear down the existing dormitories and landscape the grounds.

Funds have been provided for a Colony Farm prison building which will house approximately 350 prisoners to be used in the various positions where patients are presently being used unsatisfactorily.

Plans have been drawn and the contract awarded to The Jordan Company for the construction of the new laundry for which funds were previously approved. The Jordan Company expects to complete this building on or about October 1, 1957. The equipment for this laundry has been purchased and is scheduled for shipment from the factory on September 25, 1957.

The contract for repairs and renovations of a portion of the primary electrical distribution system was awarded to Croft-Mullins Electric Company and the work has been completed.

The contract was awarded to Piedmont Products Company for the repairs at the Steam Plant and this work is presently under construction.

Maintenance charge for lodging for all white female employees was discontinued, effective May 1, 1957.

The following recommendations are submitted for your consideration:

1. That funds for the construction of a sewage disposal system be allocated as early as possible. At the present time raw sewage is dumped in the river.
2. That funds be provided for the construction of additional housing facilities to house those patients presently occupying the following substandard buildings: 28th Ward, 38th Ward, M Ward, 10th Ward, 14th Ward, Colony No. 2 (State Farm), Dupree, Old Colored Building Kitchen.
3. That the General Assembly set a goal of providing funds for Maintenance operations at the Milledgeville State Hospital of a minimum of \$3.00 per patient day instead of the present \$2.34 allocated or used at the present time.
4. That the Hospital, or proper State Authority, be authorized to purchase additional lands to produce feed, forage, and other crops to be used by human and animal population.
5. That Milledgeville State Hospital be authorized to set up a pilot herd of beef cattle in order to determine the cost of producing beef at the Institution, in comparison with that purchased outside. It is also recommended that milk production, when funds are made available, be increased to a minimum of 2,000 gallons per day.

6. That the Director request the Governor to ask the Highway Department to make a comprehensive survey of the grounds of the Milledgeville State Hospital and consider additional paved roads and sidewalks, in order that lands for planting shrubbery to beautify the grounds can begin at the proper point.
7. That some legal means be provided whereby the Hospital may pay premiums on liability and property damage insurance carried by employees of the Hospital, whose principal duty includes the operation of State owned vehicles and motorized equipment.

Your attention is invited to the attached reports from various divisions of the Administrative Department.

Respectfully submitted,  
Joe Boone  
Business Administrator

Mr. Joe Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

The following is the Annual Report of the Farm and Dairy Division for the year ending June 30, 1957.

During the fiscal year the Farm and Dairy Division produced \$1,788,615.85 worth of farm and dairy products at a net cost of \$1,222,401.02, showing a net profit of \$566,214.83. The Farm and Dairy Division covers all the production units engaged in growing and processing farm products and is broken down into various units as follows: Abattoir, Cold Storage, Farm, Cannery, Broiler Project and Egg Project. Our over-all farm operation for the year showed a profit of \$217,361.15.

During the year one new dormitory was completed at the Colony Farm No. 1 and construction was begun on a second building. Each of these dormitories will house approximately 200 patients. When the second building has been completed, we will take down the existing buildings and landscape the grounds around these dormitories.

During the month of February, Mr. W. N. McHan was appointed Chief of Prison Section (Institutions). Mr McHan came to this Institution from the Board of Corrections and has had a number of years of experience in the administration of prison camps.

On April 1, 1957, Mr. John A. Smith resigned as Superintendent of Farms and Dairies to accept a responsible position with the State Department of Agriculture.

We are continuing our program of dairy herd improvement under the direction of Mr. John O'Steen, Dairy Technician. Mr. O'Steen is working with Jessie S. Sloan, D.V.M., and the State Department of Agriculture in the testing program for the eradication of Brucellosis and all infected cows, including reactors, are being slaughtered. He is also working with the Soil Conservation Service and the Extension Service on pasture improvement program and we feel that the pastures are showing marked improvement as a result of this work.

Funds have been allocated for the purchase of dairy herd replacement stock and it is our recommendation that a dairy unit, complete with milking parlor, be constructed on that land known as "The Miller Place". This land has an extremely good pasture and is clean,

so far as disease is concerned, we feel that the purchase of approximately 200 Holstein cows to be pastured at "The Miller Place", in addition to our present herd, will furnish sufficient milk for the Institution. We are continuing to use all hay and ensilage available in our dairy feeding program to reduce the amount of commercial feed purchased as much as possible.

The Egg Project is presently producing approximately 1,517 dozen eggs per day and during this fiscal year we saved the State \$93,289.61, which was the net profit for this project. The Broiler Project showed a profit of \$18,028.39 for this fiscal year.

For more complete information concerning the various operations of the Farm and Dairy Division, your attention is directed to the financial statement submitted by the Accounting Division for this year's operations.

Respectfully submitted,

W. R. Crittenden

Assistant Institutional Business Administrator

Mr Joe Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

I herewith submit my annual report for the Personnel Division at the Milledgeville State Hospital for the period from July 1, 1956, through June 30, 1957.

All our employees, who are Members of the Employees' Retirement System of Georgia, were given an opportunity to combine Federal Social Security with their State Retirement. Approximately 700 employees took advantage of this offer. All new employees are covered by Social Security combined with their State Retirement.

The charge for room rent which was deducted from the White Female Employees' salary was discontinued May 1, 1957, and those employees currently living in the Nurses' Home are billed monthly.

For the year covered in this report, we processed personnel actions as follow: 369 separations which included 282 resignations, 53 dismissals, 14 retirements and 20 deaths; 503 appointments; 177 transfers; 146 promotions; 31 demotions; 81 leaves of absence; 84 returns from leave of absence and transferred 3 employees to other State Departments.

The total number of employees on the payroll July 1, 1956, was 1991, and the total number of employees as of June 30, 1957, was 2041. There were 26 new positions created for the Hospital during this period. The personnel turnover amounted to approximately 18%.

A total of 262 Student Nurses affiliated at this Hospital during this fiscal year and these have not been included in the appointments and separations shown above.

Respectfully submitted,

W. A. Stone  
Personnel Officer

August 22, 1957

Mr. Joseph W. Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

During the past fiscal year, as in previous years since the end of World War II, the Engineering Department, primarily a maintenance organization, has been largely concerned with new construction in connection with the building program and smaller Hospital installations.

#### NEW CONSTRUCTION

A new floor was put in the bathroom at the State Farm.

Forty-four (44) linear feet of track was installed in the Sewing Room for the Cutting machine.

A platform was built for the Allen Building Store.

A long trough was built at Dupree Building to run telephone cable in.

An outside set of concrete steps and platform were built at the Rivers Building Laboratory.

A concrete floor was poured in the bottom of the trailer truck scales at the Lawrence Building.

A concrete form was built for the new scales at the warehouse. Ten (10) new presses have been installed at the Laundry. The flat work ironer has been overhauled and is now ready for operation. House was covered, small shed room built and flooring replaced in the James Moore residence at the Water Plant.

A complete bathroom was built and fixtures installed in the Dr. Word residence.

A large cold storage room was built at the Abattoir.

An elevator shaft was built and elevator installed in the Boone Building.

A concrete form was built around the pump in Walker Building boiler room.

The new Rivers Building Laboratory was completed.

All repairs of fire damage to laundry were completed except the center aisle, which cannot presently be spared.

A concrete floor was poured in the bathrooms in the Colored Recreation Hall.

A cyclone fence was erected on the colored side of the Rivers Building.

All work except air conditioning and heating in the Office, Warehouse, Plumbing and Electrical shops in the proposed Engineering section of the Lawrence Building has been completed.

A room 11 feet by 12 feet was built at the Garage.

Two bathrooms were installed in the Engineering Department's new offices.

Concrete footings and pedestals were poured for the 100,000 gallon storage tower at Colony Farm No. 1. Erection by contractor was completed.

The Plumber's Shop was moved from the west wing of Powell Building basement to basement at Lawrence Building.

The entire Powell Building basement was cleaned out and turned over to the contractor.

A concrete floor was poured in bathrooms on the 28th Colored Male Ward.

Concrete tops were poured for four (4) manholes on the underground telephone lines.

Excavation was finished and cooling tower erected at Lawrence Building for air conditioning White and Colored Sewing Rooms and the Apothecary.

A concrete floor was poured in the Machine Shop.

A concrete floor was poured for the Washington Building Occupational Therapy Shop.

### CARPENTRY, MASONRY AND PLASTERING

During the year this section built a considerable number of benches, cabinets, coffins, shipping cases, meat boxes, window screens, television cages and cabinets, curtain poles, medicine carriages, and many other items which are normally required by an institution of this type.

In addition to the above, this section is responsible for the installation of screens, wire guards, curtain poles and brackets, venetian blinds and the repair and replacement of window panes, doors, roofs, benches, et cetera.

Eighty-two (82) masonite tops were put on tables.

A new roof was put on Telephone and Post Office Buildings. All doors and windows were repaired, roof patched and shelves built in closets at the Joe Herringdine residence.

Doors were repaired and locks put on cabinets in Washington Building dining room.

Two (2) door openings were cut in the partition wall, doors were built and hung, and tile was replaced in Mr. Stone's office.

Doors were repaired on O-Ward and on M-Ward in Whittle Building. Floors on 28th and 38th Colored Wards, in Nurses' Home bath rooms, Rivers 5, Boone 8, and 10th White Male were repaired.

Wheel chairs were assembled on the Infirmary, 25th and 26th Wards. Paneling made from lumber salvaged from the Powell Building was put in Mr. Boone's office.

The cold storage room in Rivers Building was repaired.

Linoleum and tile were laid on various floors.

A broken sewer pipe was replaced at Dr. Peacock's residence.

The concrete floor in Boone Building office was repaired.

Clothes lines were put up in numerous residences.

Celotex ceiling was repaired in Boone Building Dining Room, and in Boland Building Lobby.

A trap door 18 inches by 24 inches in Holly Building was built and installed.

A partition wall nine (9) feet high and ten (10) feet long in Boone Building Beauty Shop was screened.

Three hundred (300) square feet of flooring was put down.

A fuel oil unloading pump house 12 feet by 6 inches by 10 feet by 6 inches was built at the Steam Plant.

Tool house at Washington Building was covered with tin.

Celotex was put in one room of the Superintendent's residence.

Floors were repaired on Powell 2, Dupree 14, 28th Colored Male Ward, in Dupree and Ingram Buildings, 10th White Male and 12th Colored Female in Ingram Building.

Two (2) summer houses in front yard were torn down.

Old shingles were removed, sheathing repaired, and nine (9) squares of composition were put on roof of Dr. Freeman's residence.

Cabinets were built for Jones Building, X-ray room and Green building.

Steps were repaired at the 28th Colored Ward and on M-Ward.

Roof was poured, window frames set, doors hung, and partition removed at the pump house addition.

Floor joists were repaired, 2577 linear feet of flooring was replaced, two hundred seventy (270) windows and fifty-four (54) doors were repaired and locks on all doors were fixed on male side of Dupree Building.

Doors and windows were repaired on the 3rd and 4th Colored Male Wards.

Floors was repaired in elevators in Holly and Freeman Buildings.

Cement floor on Ward 25 in Walker Building was repaired.

Floor, windows, and doors were repaired in the Colored Recreation Center.

The back porch on a residence at the State Farm was screened.

Stoops were built over doors and windows at several of the stores.

The elevator in Walker Building was floored.

Plastering was repaired in the Jones Building Cafeteria, at Dr. Taylor's residence, Jones 1, 2, and 3, in Green Building bathrooms, M-Ward, Jones 5, and 6, Allen 2, and 8, Howell 3, Allen 3, 5, and 7, bathrooms on Green 3, Boone Building Apartments.

## PLUMBING AND HEATING

Nine (9) Washing Machines were installed in various residences.

Twelve (12) Gas ranges were installed.

Nineteen (19) Commodes were installed.

Ten (10) Sinks were installed.

One (1) Lavatory was installed.

Twenty (20) Water Coolers, plus those installed in the Post Office and Telephone Exchange.

Eight (8) Hot Water heaters were installed.

Thirty-eight (38) Radiators, plus those installed in Green Building.

One (1) Hot water boiler was installed.

One (1) Return pump, heating unit, sterilizer, dishwasher and three (3) tubs were installed.

Five (5) Heaters were installed.

Four (4) Bake ovens were installed.

Sinks were repaired in Boland, Washington, West Powell, Binion Kitchens.

The new eight (8) roll flat ironer, burned in the fire, has been completely overhauled.

The hot water line at Bostick Building was renewed.

A water line was run to the Greenhouse.

Concealed faucets on all lavatories in Freeman Building were changed to standard faucets.

Water and Gas lines were run to new houses near Fort Wilkinson.

Gas line to 14th Colored Male Ward was dug up and renewed.

Hot water lines were cut out of concrete floor at Bostick Building and renewed.

One (1) new hoist was installed at the Laundry and four (4) washing machines have been completely overhauled.

Water, steam, and return lines were run to the new offices in the Lawrence Building.

Water was run and cooler connected up at Garage.

A water line was run to the Abattoir.

Regulators and gas valves were installed in Rivers Building Laboratory.

A new set of boiler tubes were installed in the Boland Building.

A new diesel pump was installed in the Pump House.

Showers were installed in residences of Dr. New and Dr. Fidler.

Concrete floors were cut and hot water lines repaired in the Bostick Building.

Water and gas lines to the new residences in Fort Wilkinson were dug, pipes laid, and covered up.

A new water line was laid to the Superintendent's residence.

Gas water heaters were installed in the residences of Mr. W. R. Crittenden and Mr. E. L. Smith.

A steam regulator was installed in the Telephone Exchange.

A water line was run to the sausage machine and sterilizer at the Abattoir.

The water line at the Bostick Building was dug up, repaired, and replaced.

Gas lines were run to the new kitchen in Powell Building.

Lines were run and tie in made to the water main for the new houses being built on Riverview.

A sterilizer was installed at the cannery.

#### WATER, SEWER, AND GRADE SECTION

The elevated steel water storage tank south of the Powell Building was drained, cleaned, repainted, and refilled. Two 12 inch leaking gate valves were replaced.

The granite stone from the entrance steps at the Powell Building was removed and stored.

A manhole 10 feet deep for sewer was built at the Bostick Building.

Two (2) underground water lines were laid to the garbage stand at Bostick Building. Concrete floors in the kitchen and boiler room were cut in effort to locate a leak under the floor.

One ten (10) inch water main and one (1) four (4) inch water main were removed from the center section of the Powell Building. An old brick sewer near the Powell Building was dug into and stoppage cleaned up. Three hundred (300) feet of it were rebuilt. A ditch averaging about 5 feet deep and 500 feet long was dug at the Bostick Building for a storm drain.

Footings were poured at the Pumping Station for an additional pump.

A survey was made of a new laundry site.

Machinery was removed from the North wing of the Laundry and reinstalled in the North Court. Steam, cold and hot water, condensate return and air lines were removed from this section and reinstalled in this court.

Eight steel trusses were erected at the Laundry.

A brick manhole was built in the sewer serving the Bostick Building.

Trench was excavated and Telephone duct installed from the manhole in front of Chief Montgomery's residence to the manhole opposite front of Bostick Building, a distance of about 750 feet. Old telephone duct was dug up at the Green Building and replaced with new duct and cable.

A detention fence was put up on the White Male side of Rivers Building, enclosing a place to be used for a recreation area. Roads leading to the fuel unloading tanks were repaired.

A section of the water main and a fire plug were dug up and changed at the Powell Building. A storm drain was also installed. Two (2) sewer manholes were built at the Bostick Building.

Two (2) manholes were built and one (1) repaired at the Ingram Building.

A water line was dug up and repaired at the Powell Building.

The water main outside of Bostick Building was repaired.

An 8 inch water main was dug up and repaired at the Boone Building.

Boiler setting No. 1, Steam Plant No. 2, was dismantled and removed.

Footings were graded and poured for the Washington Building Occupational Therapy Shop.

Excavations have been finished and footings poured at the steam plant in preparation for a new pump house.

Water connections have been tied in at Powell Building.

Nine (9) manholes were built for the telephone lines.

Uncrated and moved heavy X-ray equipment in Jones Building.

Several loads of original long leaf pine were recovered from the wrecking operations in the Powell Building.

Several loads of river sand were hauled to Washington Building.

A forty horse power motor in the pumping station was removed, repaired, and replaced.

A survey and contour map was made of the site of the proposed Colony Prison Building.

Guttering and down spout at Dr. Taylor's residence was renewed.

Twenty-three (23) grills were put in the air duct at the Rivers Building Laboratory.

New vent pipes were installed on hot water heater in the Durrence residence.

Flashing on roof of Washington Building was repaired.

Flashing was repaired or soldered on elevator shaft at Boone Building.

All dry tumblers at the Laundry and gas heaters at the Cannery were vented.

The steam table in Jones Building dining room was repaired.

Meat curing boxes at the Abattoir were lined.

The bottoms of two steel doors in Freeman Building were renewed with copper sheet metal.

A metal cover was installed in the fire place in the Veatch residence.

Four laundry dryers were vented at the Nurses' Home.

Put up down spout on the repaired section of the Laundry and made and replaced a nine (9) foot section of eaves trough for the Howell Building.

Cleaned out down spouts on the residences in Park Woods and on the drive between the Walker and Whittle Buildings.

Several sections of air duct was made for Rivers Building Laboratory.

A large washing vat at the Cannery was relined.

Two ice boxes were lined with sheet metal.

Two dry tumblers at the Superintendent's residence were vented.

Gutters and down spout at the Crittenden residence were un-stopped.

## FIRE DEPARTMENT

The Fire Department was called out approximately fifty (50) times for grass, wood, and trash fires during the year. No damages were reported.

The aerial ladder was used to fix vents on Freeman Building, to clean out the ledges on Holly Building, to repair roof on W-Ward, to wash windows at the Jones Building, and to clean roof at Binion Building.

On July 13, a call was answered to Boland Building Kitchen. False Alarm.

On July 18, a call was answered to Mr. Carl Vinson's farm. Tractor was on fire.

On February 4, the Fire Department was called to the Old Detach Building, Which had been set on fire by a patient. The building was a total loss.

There were no calls during the month of June. The regular check on fire extinguishers, stand pipe hoses, was made, et cetera.

Sprinkler systems were checked in Cabaniss, Brantley, and Whittle Buildings.

## STEAM PLANT

A steam main to serve the garbage cooker was built at the Abattoir.

One brick setting was removed from Boiler No. 1, Steam Plant No. 1. All tubes were then removed, new ones installed, and rolled in. Members of steel supporting frame were either renewed or repaired.

Valves and steam lines at Steam Plant No 1 were repaired or renewed as necessary.

Installing of presses at Laundry was completed.

Steam, air, hot and cold water lines were removed from the North Wing of Laundry, preparatory to rebuilding this fire damaged section.

All steam tunnels were repaired.

Several leaks have been repaired on the steam mains.

Steel buck stays have been put on boiler at the Steam Plant No. 1, burners have been put back and boiler is now in operation.

Steam and return lines have been run to the new Rivers Building Laboratory.

Ruptured boiler tubes were replaced twice in boiler No. 1, Steam Plant No. 2.

Buck stays, drum baffles, valves and piping, feed water lines and combustion controls were installed in boiler No. 1, Steam Plant No. 1, on which a new boiler setting had been built and boiler returned to service.

Gas delivery was interrupted from 8 a.m. November 22, to 10 a.m. December 1, during which period we fired with Bunker "C" fuel oil.

Boiler setting No. 2, Steam Plant No. 1, and boiler setting No. 3, Steam Plant No. 2, were dismantled, removed and material salvaged as much as possible.

One extractor and one air compressor has been completely overhauled and moved to the new location in the Laundry.

All tubes, about two hundred seventy-five (275), were removed and replaced with new ones in boiler No. 2, Steam Plant No. 1. All other steel as required was removed and replaced.

Seven tubes have been replaced in boiler No. 4, Steam Plant No. 2.

New tubes have been put in boiler No. 3, Steam Plant No. 2, and new furnace walls built.

Boiler No. 2, Steam Plant No. 1, has been completed and is back on the line.

Feed water pump at Plant No. 2, was overhauled.

Steam connections, by means of a short tunnel, was made to the Rivers Building Laboratory.

Boiler setting No. 2, Steam Plant No. 2, was dismantled and removed preparatory to rebuilding of boiler and setting.

Sixteen (16) tubes have been replaced in No. 4, boiler at Plant No. two (2).

All tubes have been removed, drums scaled and cleaned and everything made ready for the setting contractor on boiler No. 2, Steam Plant No. 2.

Several days and nights were spent by the maintenance men at the Steam Plant in repairing traps, steam and return lines in the tunnels. These tunnels are now entirely free of steam leaks.

Major repairs have been made on two washing machines and one extractor. The machines are now back in service in the laundry. Steam and return lines were run to a flat work ironer and it is also back in service.

## REFRIGERATION -- ICE PLANT -- AIR CONDITIONING

Refrigeration and air conditioning units at all locations are checked frequently, and placed back in operation as soon as possible after stoppage, in order to eliminate food spoilage.

Difficulty in obtaining parts for the Westinghouse refrigerator handles is becoming a serious problem.

All ice for the Institution is made at the ice plant. With the cold storage at its present location in the Warehouse, the ice making capacity has increased and no ice shortage is seen at the present time. Overhauling of the plant takes place during the winter months when the ice demand is the lowest.

Fifteen air conditioning units were installed throughout the hospital and personnel dwellings.

## WATER TREATMENT PLANT

All basins and wells are cleaned quarterly and necessary repairs are made.

The contract enlargement of the Water Plant and the addition of a 16 inch main to the Hospital Pumping Station continues to be held up because of right-of-way difficulties.

## ELECTRICAL AND TELEPHONE SECTION

Low voltage on the grounds has caused a lot of trouble to nearly all electrical equipment on the grounds. The Power Company has recently completed the installation of two (2) 4/0 parallel primary circuits, which appears to have largely corrected this trouble.

Outlets, five fans, water cooler, coca cola box, and juke box were installed and connected at the Colored Recreation Center.

Wires were run for air conditioning units in Dr. Stone's residence.

Water still and switch were installed in the Jones Building Laboratory.

Wires were run for the coca cola box, ice cream box, and lights in the Rivers Building Store.

Wires were run and all electrical fixtures were installed in the Montgomery residence.

A potato peeler was installed in the Cannery.

Six (6) motors in the Cannery were wired.

Cabaniss Building store was wired.

Outlet box was installed in Dr. Bradford's residence.

Four lights were installed in the Howell Building Occupational Therapy Shop and electric current was run to the water coolers.

Switches and light fixtures were installed in a new room at the Stembridge residence.

An outside light was installed at the new Telephone Exchange.

Electric lines were run to new houses near Fort Wilkinson.

Two boilers at Steam Plant No. 1, were wired.

Wires were run and flat work ironer was installed in the Laundry.

Line was run and switches installed for the new elevator at Boone Building.

Line was run and ten (10) heater fans installed in the Cannery.

Power poles were set at the Rivers Building Laboratory.

Four (4) telephone poles were set at the Rivers Building.

New telephone cable was pulled into the Green Building, replacing cable that was too small.

Twelve (12) new telephones were installed in various places over the hospital.

A transformer was installed at the 10th White Male Ward.

Wires were run, switch installed, and electric hot water heater installed in Boone Building Beauty Shop.

Wires were run and permanent electrical cut ins made to Powell Building.

Wires were run, switches installed, and all motors connected in Rivers Building Laboratory.

Two sewing machines were installed in the White Sewing Room.

Telephone cable at Ingram Building was dug up and repaired.

A broken power line was repaired at River View.

Old telephone cable was dug up and replaced at Green Building.

Wires were run and transformer connected at the new Rivers Laboratory.

The boiler at Steam Plant No. 2, was wired.

Wires were pulled and lights installed in Plumbers' Shop in Lawrence Building.

Electric current was run to three (3) water coolers in Freeman Building.

Line was run, switch and outlets installed in the Cold Storage.

Wire was run, switches installed and fans connected up in Ingram Kitchen, and Jones 6.

Outlets and switches were installed in the new quarters of the Engineering Department in the Lawrence Building.

Poles were set and new wires run to the shop at Colony Farm.

Switches were installed and motors wired at the Cannery.

An extractor at the Laundry was wired.

Switches were installed and bread wrapping machine at Bakery wired.

2950 linear feet of lead-covered underground telephone cable was put in.

#### MACHINE SHOP

This section, consisting, of one man, is responsible for all machine work. He also does repair on wireguards, sewing machines, scales, food cutters, food carts, ice crushers, wheelbarrows, chairs, suction machines, welding machines, and any other task deemed necessary. Welding and brazing is done whenever necessary.

#### PAINT SHOP

This section is responsible for the refinishing and painting of such items as coffins, bedside tables, cabinets, chairs, television stands, beds, desk, tables, chest of drawers, et cetera.

The painting of the Interior and Exterior of all residences and buildings of the institution is done by the employees in this section.

#### SANITARY DEPARTMENT

The following is a report of the Sanitary Department for the fiscal year beginning July 1, 1956, and ending June 30, 1957.

The following approximate quantities of chemicals were used:  
Flies, mosquitoes, water bugs, roaches, ants, fleas, et cetera:

5,000 Gallons Mineral Spirits  
51,000 feet Fly Cord.  
10,000 lbs. Fly Flakes.

385 Gallons Mixture of Pyrethrins and Piperonyl Butoxide  
 275 Gallons of 25% D.D.T.  
 110 Gallons 36% Chlordane Concentrate.  
 110 Gallons 75% Chlordane Concentrate  
 200 lbs. 10% Chlordane Powder.

Mice and Fleas:

1,000 lbs. 50% D. D. T. Powder.

Wharf Rats (Norveigus) and Roof Rats (Ratus Ratus)

160 lbs. Warfarin Concentrate.

3,000 lbs. Corn Meal, Sweet Feed, Etc.

200 lbs. Cyanagas.

Termites:

114 Gallons Fuel Oil No. 2.

12 Gallons Anti Rot.

Disinfecting and Deodorizing

900 Gallons Pine Oil Disinfectant.

All insects and rodents are less numerous than at anytime in the past.

The over-all sanitary condition of the Institution is fairly good; however, there are still improvements that should be made. We have added two new trucks, equipped with bodies, with units installed for cooking garbage; also another such body installed on old chassis for stand-by. All garbage that is used to feed hogs is being cooked.

Fly cord has proved to be very effective in the control of flies, where used on inside of buildings.

Note: Chemicals for making spray have been reduced considerable since we have been using fly cord in buildings where agreeable with the building physicians and supervisors.

### LUBRICATION

The Engineering Department has a full time oiler whose main duty is the oiling and greasing of electrical motors and equipment in locations not manned by Engineering Department employees. During his rounds, the oiler reports to the Chief Engineer any leaks, worn out and missing V-belts, burnt out motors, that he finds.

### CONCLUSION

In conclusion, it should be stated that personnel of the electrical and plumbing department are on duty during the week ends and holidays. A stand-by man at the Wood Shop works on Saturday afternoon and holidays. For night calls, two plumbers have Hospital phones. When they cannot be contacted, the Chief Engineer or Office Manager locate the proper employees to perform the emergency at hand

Respectfully submitted,

Roger W. Stembridge  
 Chief Engineer.

## MILLEDGEVILLE STATE HOSPITAL ANNUAL REPORT

Mr. Joe Boone, Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

The Department of Public Welfare allotted to the Milledgeville State Hospital in the year ended June 30, 1957, \$8,995,670.00 for maintenance operations and \$421,500.00 for outlay expenditures making a total allotment of \$9,417,170.00 of State Appropriation Funds.

This \$9,417,170.00 was supplemented by \$489,377.31 in donated commodities and \$75,253.12 in cash income from sales, rents, pay patients and other sources, making a total receipt of \$9,981,800.43.

In addition to above receipts, the Productive Units supplied consumable commodities valued at \$2,002,652.47. By deducting operating cost of \$1,377,247.80 leaves \$625,404.67 net savings to the State. U.S.D.A. daily market report, The National Provisioner, and other acceptable market reports were used to establish sales prices at the time of delivery.

The average daily population of the Hospital for the year ended June 30, 1957 was 11,828 and the daily per capita cost based on maintenance expenditures of \$10,595,037.45 was \$2.45. By deducting donated commodities valued at \$489,377.31 from total expenditures, a net daily per capita cost of \$2.34 to the State is shown as follows:

Total Expenditures	\$11,383,487.79	\$962.41	\$2.6366
Less Outlay	163,045.67	13.78	.0377
Net Maintenance	\$11,220,442.12	\$948.63	\$2.5989
Less: Net Savings --Productive Units	625,404.67	52.88	.1448
Net Cost Maintenance Expenditures	\$10,595,037.45	\$895.75	\$2.4541
Less Donated Commodities	489,377.31	41.37	.1133
Net cost to State	\$10,105,660.14	\$854.38	\$2.3408

Maintenance expenditures for major repairs and alterations amounted to \$1,032,246.06 consisting of Boiler Settings - \$68,215.00, Enlargement of the Electrical System - \$29,295.00 and Repairs to the T. O. Powell Building - \$940,736.06. These funds were made available during the fiscal year ended June 30, 1956.

Outlay expenditures for this fiscal period amounted to \$163,045.67 as shown by detail listing:

Kemper Building	\$ 25,000.00
Laundry Building	12,879.70
Personnel Dwellings	41,923.31
T. B. Laboratory	5,066.46
Greenhouse	6,869.11
Dormitory, Colony Farm	2,877.65
New Dormitory, Colony Farm	58,869.57
Colony Farm Prison Building	9,559.87
	<hr/>
	\$163,045.67

Outlay funds made available for building and improvements already under construction and new projects were designated as follows:

Personnel Dwellings	\$ 34,000.00
Dormitories, Colony Farm	2,500.00
New Dormitory, Colony Farm	65,000.00
Greenhouse	10,000.00
Steam Plant Addition	160,000.00
Colony Farm Prison Building	150,000.00
	<hr/>
	\$421,500.00

Physical inventories taken June 30, 1957 were in satisfactory agreement with control records of the Accounting Division. Inventories decreased \$1,441.53 from \$1,051,404.05 June 30, 1956 to \$1,049,962.52 June 30, 1957. Comparative balances of inventory accounts for these two periods reflect value of commodities stored for future use in the various storerooms and increases and decreases during this fiscal period.

INVENTORIES	1956	1957	DIFFERENCE
Livestock for slaughter	\$ 16,469.69	\$ 1,214.27	\$15,255.42 -
Packing House Products	6,638.84	9,917.84	3,279.00 +
Cold storage products	59,344.44	70,127.33	10,782.89 +
Forage supplies - Dairy	8,889.43	26,094.69	17,205.26 +
Forage Supplies - Farm	184,727.63	188,965.55	4,237.92 +
Forage Supplies - Egg Project	23,378.07	19,280.89	4,097.20 -
Forage Supplies - Broiler Project	8,889.43	4,378.75	4,510.68 -
Cannery - Fruits and Vegetables	49,106.46	25,833.13	23,273.33 -
Coal and Coke	4,651.27	4,680.00	28.73 +
Engineering Supplies and Materials	77,589.47	88,089.58	10,500.11 +
Dry Goods, Clothing, Food Supplies	481,249.53	436,259.78	44,989.75 -
Sewing Rooms - Materials in Manufacture	15,924.73	13,294.79	2,629.94 -
Drugs, Medicine, Surgical Supplies, Etc.	114,545.06	161,825.92	47,280.86 +
	\$1,051,404.05	\$1,049,962.52	\$ 1,441.53-

Patients deposits fund increased \$22,680.48 from \$162,977.80 at June 30, 1956 to \$185,658.28 June 30, 1957.

Your attention is invited to detail reports, as indexed, which contain information and statistics not repeated here.

Respectfully Submitted,

MILLEDGEVILLE STATE HOSPITAL

T. C. Brantley,

Judge Alan Kemper, Director  
State Department of Public Welfare  
State Office Building  
Atlanta 3, Georgia

Subject: 115th Annual Report

Dear Judge Kemper:

In accordance with custom and as required by statute, the annual report of the Milledgeville State Hospital for year ending June 30, 1958, is respectfully submitted.

An overall picture for the year reveals that under your judicious leadership the hospital continued to make notable progress. We were harrassed by the same frustrations as in previous years -- viz., overcrowding, lack of sufficient medical personnel, the admission of nonpsychotic alcoholics who consumed so much of the time of the staff, the plea for admission of mentally defective youngsters, and the reception of many elderly citizens who had become too much of a problem to be coped with at home and whose relatives were financially unable to place them in nursing homes. On the brighter side of the picture, we had a net decrease in patients -- 55 less than last year -- which I believe has occurred only once before in the history of the institution. In 1938-1939 patients were received only as vacancies occurred and many who were regarded as harmless and inoffensive were returned to their relatives or remanded to their respective counties, resulting in a net decrease of 310 as of June 30, 1939.

Extensive renovation of the century old Powell Building was completed during the year. The center section is devoted to medical administrative offices and apartments for medical personnel, and the wings are to be utilized as reception wards for white males and white females. The building has been referred to as the most beautiful public building in the state, other than the State Capitol, and the exterior remains unchanged.

I am indeed grateful to all divisions of the medical and business departments for their untiring zeal and diligence in the performance of duty. To you and your official staff, who have so willingly come to our aid when we needed help, to Governor Griffin and the General Assembly for their interest in the hospital and for the increased appropriation go our heartfelt thanks. Expressions of gratitude are also due the many organizations and public spirited individuals for their interest and help throughout the year. The overwhelming response to our annual plea for Christmas gifts is an indication of the public's intense interest in the hospital. To each individual and

organization who participated in this noble charity, at Christmas and throughout the year, go the sincere thanks of the patients and personnel.

## GENERAL STATISTICS OF MOVEMENT OF POPULATION

The daily average population was 11,748 as compared with 11,828 last year. There was a net decrease of 55, compared with an increase of 8 last year and 143 the previous year. We received 3,740 new patients, as compared with 3,519 last year. Of the 2,341 discharged 934 were recorded as restored or without psychosis, 1,488 as improved, and only 119 as unimproved.

## TREATMENT OF PATIENTS

In my estimation our general hospital section, under the supervision of Dr. Wallace M. Gibson as director, renders medical and surgical service second to none in the State. We were fortunate in having Dr. E. B. Saye return as pathologist and in securing the services of Dr. R. J. McCandliss as radiologist. The position of bacteriologist in the Rivers (tuberculosis) Building was created in February 1958 and filled by Mr. Arthur F. DiSalvo.

Dr. R. W. Bradford has continued to do yeoman service in the dual capacity of clinical director of the white male division and assistant superintendent. Dr. L. A. Bailey, clinical director of the colored division, has also done double duty by giving medical care to the physically sick in that division and assisting in surgery at times. Dr. Joe D. Combs, in addition to his duties as clinical director of the white female division, does much of the teaching of affiliate nurses and conducts many clinics for visitors.

An atmosphere of sadness pervaded the hospital during the Christmas season because of the critical illness of Dr. T. C. Clodfelter and Dr. George H. Green. Dr. Clodfelter, who was a member of the medical staff for 21 years, passed away on December 22nd. Dr. Green, for 45 years a member of the dental staff prior to his retirement in 1955, and a former director of the department, passed away on January 2nd.

Undoubtedly the use of tranquilizers has been a significant factor in the decreased population and if we only had sufficient physicians, nurses, and psychiatric aides to explore the full possibilities of drug therapy, supplemented with intensive psychotherapy and selective occupational and recreational therapy, the results

would be abundantly more gratifying. When 35 to 40 doctors, including the administrative, surgical, medical, and psychiatric staff, have almost 12,000 patients to care for, personnel to supervise, numerous interviews with relatives of patients, clinics to attend, a multitude of letters to answer and progress notes to make, it is understandable that they have woefully little time to devote to the individual. Yet, by a genial greeting, a snatch of cheerful conversation, a handshake, a pat on the back, many are able to convey to their patients the fact that they do have a personal interest in their welfare. We are in desperate need of about 35 additional doctors who have had experience along psychiatric lines, or who have an aptitude for this specialty and would be willing to undergo practical training here and perhaps accept scholarships from the hospital for training in an accredited hospital. We have one doctor on a psychiatric scholarship at the present time. Not many young psychiatrically minded physicians are willing to accept a position here because of the comparatively small salaries paid. The requirements are so high that it is impractical to attempt to have a hospital the size of this one accredited for psychiatric training of physicians. The problem has been discussed by various groups, medical and otherwise, but no logical solution has been offered. It seems to me the best proposition is that of giving a one year scholarship in return for two years of service afterward; but in order to attract desirable applicants it is going to be necessary to offer added inducements in the form of higher salaries and adequate housing facilities.

The dental department, although understaffed, has cared for all emergencies and has done much restorative work, as evidenced by the report attached. It is hoped that additional dentists may be added to the staff during the early part of the next fiscal year.

There is an urgent need for increased personnel in the graduate nursing section, as well as in the male and female attendant service—both white and colored—in order to render efficient care for the patients and the service which the public expects and demands. Many attendants are taking advantage of the psychiatric aide courses which are offered by the hospital. The Milledgeville State Hospital is unique in that many of the present nurses and attendants are the third and fourth generations to be so employed; they have seen it weather the storms of adversity, have watched its growth and improvement, have known many of the long-time residents since childhood, and this experience has evoked a personal interest in the institution which is warm and sincere and causes them to regard their jobs as something more than a mere means of earning a livelihood.

The social service department has been relieved of some of the duties formerly imposed upon it, by the coordinator of recreational,

music, and religious activities assuming some of the tasks. The work has not been actually lessened though, because of additional counties being added to the "Pilot Project" which seeks to help furloughed patients through visits and interest of the county health nurses.

The work of the pharmacist and his staff has been increased greatly because of the many new drugs on the market and the large number of prescriptions filled.

The attached reports of the heads of the occupational therapy, and the recreation, music and religious activity departments disclose the types and amounts of work done by each, and instead of elaborating on them I am giving a brief history of the development and expansion of the departments.

Prior to 1911 occupational therapy consisted of household chores, work in the laundry and sewing rooms, farming and dairying; recreational activities were limited to weekly dances, religious services conducted twice weekly by local pastors, baseball and simple games; music therapy was practically non-existent with the exception of pianos on several wards; groups of amateurs would occasionally stage a play, the local theatre manager would have a special showing of movies, and other contributions from volunteers were magazines and books.

There was a marked upswing in occupational, recreational, and music therapy in 1911 when Dr. N. P. Walker, assistant physician and later assistant superintendent and clinical director, became interested in this phase of treatment for the more disturbed and destructive patients. Miss Alice V. Cross (later Mrs. N. P. Walker), the superintendent of nurses, sent one of her students, Miss Alice Vaughn, to Chicago for a six weeks' course in handicrafts and calisthenics. The officers of the hospital received the sanction of the Board of Trustees to raise funds by public subscription for buying instruments and employing an instructor for a brass band to be organized among the officers and attendants. By 1912 the band was well organized and concerts were given two or three times weekly on the lawn or in the recreation hall. Basketry, various types of needlework, broom and mattress making, and shoe repairing were added occupational pursuits. A motion picture outfit was installed but was not very satisfactory. A negro building completed in 1919 contained an amusement hall. About that time Dr. Walker initiated the setting aside of certain rooms in the white female department for reading, music, and various handicrafts. These rooms were equipped with comfortable furniture and attractive draperies and special nurses were employed to encourage the patients to participate in the activities. In 1920 the former band leader was re-employed and concerts, which

were discontinued during the war years, were resumed. By an Act of the Trustees in 1921 Miss Amy Oxford, a graduate of the hospital school of nursing, was appointed as director of the occupational therapy department. She organized the department, with three aides, and extended art and craft work among the white and colored females. In 1922 a tin and repair shop and an arts and crafts building was erected from reclaimed material. The building is still in use in Yarbrough Park and is known as "The Log Cabin". About this time two hundred or more white male patients were being given long hikes daily when the weather permitted. More satisfactory motion picture equipment had been installed and in 1924 arrangements were made with the Atlanta Film Board of Trade to furnish films gratis. Dr. Walker continued his program of turning "portico rooms" for destructive and untidy patients into "activity rooms". Patients suffering from dementia praecox of from 7 to 18 years' duration were assigned to the rooms, under the supervision of special nurses who provided habit training, recreation, and occupation. A record kept of items previously destroyed by these patients and a comparative one after the establishment of the program revealed that the saving in clothing and laundry more than paid the salaries of special nurses. A tragic occurrence took place in 1925 when Miss Oxford was killed by a patient as she walked across the campus.

At the request of Dr. Walker, Dr. Y. H. Yarbrough had taken the white male occupational therapy program under his supervision and in 1921 a rather barren area was graded and developed into an attractive park, all work being done by attendants and patients. In a project to raise funds for building and equipping a shop, registered hogs were raised and sold. In 1926 a woodwork shop was constructed and equipped, and by 1929 was making a creditable showing in furniture making. Occupational therapy rooms had been provided in the Whittle and Cabaniss Buildings for white males, and three rooms in the Powell Building for white females. In January 1932 a resolution passed by the Board of Control (successor to the Board of Trustees) provided that funds derived from the sale of products of the occupational therapy department and profits from commissaries operated on the grounds should be retained by the superintendent and expended for the benefit of patients. Several radios, beauty parlor equipment, and baseball and volley ball outfits were purchased. In 1932 the fund provided Christmas gifts for 1,723 patients who would not have been remembered otherwise. In February 1932 Miss Frances Rogers, a graduate of the Philadelphia School of Occupational Therapy, was placed in charge of the department, which consisted of 11 shops. Mrs. Helen Longino had been employed to take charge of music activities and a fine chorus of male and female voices was developed and patients took part in concerts, minstrels and pageants. The melodrama "Heaven Bound" was twice presented by a chorus of colored patients and employees and was so greatly enjoyed that it

was repeated at the amusement hall for white patients.

The Publication of a weekly bulletin "The Builder" and a monthly magazine "Cheerio", with patients as editors and contributors, was begun in the early 30's and "The Builder" is still a prominent patients production. Miss Rogers left the employ of the hospital in the late 30's and was replaced by Mrs. Mary Parker, a registered occupational therapist, who held the position until January 1945. It was Mrs. Parker and Mrs. Claire S. Callaway, the medical social worker, both members of the local Presbyterian Church, who first interested the women of the church in staging a Christmas party for patients of that faith. It was so successful that the local church appealed to Presbyterians state-wide to participate, other denominations in the community followed suit, finally resulting in elaborate parties each year with gifts and refreshments for numerous patients. Even this generosity did not reach all forgotten patients and in 1948, with the permission of the governing board of the hospital, a printed appeal was sent out to the public soliciting Christmas gifts and funds for forgotten patients. The results have been most gratifying, for not only do we now receive sufficient presents for every patient to have one or more, but generous donations provide televisions and other luxuries. During the last two years the Mental Health Association has taken over the collection of gifts, as well as aiding in solicitations, and with the help of the United Church Women and other organizations they wrap the gifts beautifully and place a removable list of contents on the outside of the package. Civic organizations have collected and sent to the patients used books and magazines, and have subscribed to numerous magazines and periodicals. The United Church Women have taken as a project furnishing sitting rooms and equipping them with televisions. Veterans' service clubs provide entertainment and recreational equipment for the Veterans' wing of the hospital.

A handsome recreation building and auditorium was begun in 1947 and dedicated on February 9, 1949. It will seat 2500 patients and is used for church services, movies, dances, basketball, and many other activities. It is equipped with a grand piano and an electric organ.

The recreational therapy department was formally organized in 1949 with a director and seven technologists and aides. Until that time all recreational activities had been conducted by the occupational therapy and nursing personnel, and as of this date the departments are closely allied and mutually assist each other. The recreation department became responsible for music therapy and each year classical cantatas were presented at Easter and Christmas, under the directions of a talented patient who had exceptional musical training and ability. Beautiful handmade invitations to the events were the work of another artistic patient. A glee club was organized

and an effort made to reorganize the band, but with little success because of the lack of trained personnel.

In 1951 Mrs. Maude Boone, who had been an occupational therapy aide for a number of years, was placed in charge of the department, and she has exercised unusual leadership and efficiency in the discharge of her duties. Dr. J. D. Combs, Clinical Director of the white female division, has offered her material assistance in innovating a variety of crafts, including weaving, leather work, and ceramics. Dr. Yarbrough has continued to enthusiastically support the program in the white male division and added projects there are furniture repairing, upholstering, and picture framing. In 1953 a white female aide who received much of her early training under the late Dr. N. P. Walker was re-employed and placed in the Boland Building, and an aide who had received excellent training in other state hospitals, and a recreation aide were assigned to the colored female division.

Throughout the years the occupational and recreational departments, with the help of the social service, psychology, and nursing departments have reached out to more and more patients, by going to the wards with activities for the mentally regressed and physically disabled who could not attend functions at the auditorium and therapy shops. The program has been self sustaining, except for the salaries of personnel, and all materials have been paid for from funds derived from sales and profits from the commissaries. It was during the middle 40's that a resolution of the governing board of the hospital designated the superintendent, the clinical director, the superintendent of nurses, and the steward or business manager as trustees of the fund, which was named the "Patients' Benefit Fund".

In July 1957 we were fortunate in having the position of coordinator of music, recreational and religious activities created and obtaining the services of Mr. Melvin R. George to fill it. Mr. George has a magnetic personality and although his experience with the mentally ill had been confined to his contacts in presenting volunteer programs here, he quickly established rapport with the patients, personnel, and the public, and is doing excellent work. Band instruments have been bought and he is reorganizing the band with patients taking an active part. He meets with the ministers who act as chaplains, and has relieved the social service department of many tasks it had cheerfully assumed because there was no one else to do the work.

I have been asked how these departments have managed to offer so much toward the rehabilitation of the mentally ill, and I think the answer lies in the fact that the personnel has a genuine interest in the patients as individuals and that each department is willing to work with the other for the good of the patients and the hospital, without thoughts of self-exaltation.

The reports of the divisions of the Business Department are made a part of my report, and they require no further comment from me.

## RECOMMENDATIONS

Some of the recommendations made in the last report have been carried out, but those which have not are considered urgent.

### CONSTRUCTION

Medical and surgical unit for the colored division.

Recreation hall for colored division.

Additional houses and apartments for personnel.

Dormitory type building, with adequate dietary facilities, to relieve overcrowding in the white female division.

Dormitory type building to replace detached wooden structures occupied by white male patients.

1000 bed dormitory building to replace Dupree Building.

### PERSONNEL

35 additional physicians.

Increased nursing and attendant personnel to give better care to patients in the present wards, and to man proposed new buildings.

Additional employees for dietary department so that patients will not be required to work in kitchens and dining halls.

Increased salaries for professional personnel, so that additional well qualified persons may be employed.

An 8 hour day for all personnel when finances permit.

### MISCELLANEOUS

Provisions for state facilities elsewhere for alcohol and drug addicts, mentally defective children who are not regarded as trainable, and for juvenile delinquents.

Respectfully submitted,

T. G. Peacock, M.D.  
Superintendent

POWELL BUILDING

Respectfully submitted,

(Mrs.) Mary H. Cook  
Registrar

July 1, 1958

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Doctor Peacock:

The following pages contain the report of the Medical Department for the fiscal year beginning July 1, 1957 and ending June 30, 1958.

During the year three thousand, seven hundred and forty (3,740) patients were admitted. Of these, two thousand, eight hundred and fifty-five (2,855) were first admissions and eight hundred and eighty-five (885) were readmissions to this institution or from some other mental hospital. Thirty-seven (37) patients were admitted by order of the court and fifty-three (53) were transferred from Georgia State Prison at Reidsville and one thousand, seven hundred and seventy-eight (1,778) returned from furlough.

A total of three thousand, nine hundred and sixty-five (3,965) patients were furloughed and four hundred and sixty-three (463) were discharged as not insane, making a total of four thousand, four hundred and twenty-eight (4,428) released from the hospital. Of the number furloughed four hundred and seventy-one (471) were recorded as restored; three thousand, two hundred and twenty-nine (3,229) as improved and two hundred and sixty-five (265) as unimproved.

One thousand, one hundred and forty-five (1,145) patients died during the year. Arteriosclerosis was the leading cause of death, one hundred and sixty-seven (167) patients being reported as having died with this disease. Pneumonia ranked second with one hundred and thirty (130) and chronic myocarditis third with one hundred and twenty-seven (127).

There was a decrease of fifty-five (55) in the population for the year.

We continue to make extensive use of electric shock therapy with good results. Three thousand and ninety-four (3,094) patients were treated and twenty-five thousand and ninety-six (25,096) treatments were given. Two hundred and forty-three (243) patients were reported as having been restored; two thousand, four hundred and four (2,404) were improved and four hundred and forty-seven (447) as unimproved.

The extensive use of tranquilizing drugs has reduced our electric shock therapy treatments considerably. With these drugs six thousand, two hundred and forty-eight (6,248) patients were treated. Of this number two hundred and ninety-seven (297) were reported as having been restored; four thousand, three hundred and eighty-two (4,382) were improved and one thousand, five hundred and sixty-nine (1,569) as unimproved.

Several physicians have been added to our staff in the past year and we are glad to have them. We commend our medical staff and hope it will continue to increase in order that we may be able to give patients more individual psychiatric care.

I wish to express my appreciation to you, Doctor Peacock, and members of the staff for their continued cooperation.

Respectfully submitted,

R. W. Bradford, M.D.  
Assistant Superintendent

## SURGERY AND TREATMENTS

Amputation of fingers and distal phalanx of thumb .....	1
Amputation and plastic repair of finger .....	5
Amputation of toes .....	2
Anoplasty secondary to previous hemorrhoidectomy and partial sphincterotomy .....	1
Aortic node dissection .....	1
Appendectomy .....	16
Aspiration of cystic mass .....	1
Bilateral mid-thigh amputation .....	1
Bilateral orchidectomy .....	2
Biopsy of cervix .....	5
Biopsy of liver .....	1
Biopsy of patella .....	1
Biopsy of skin lesion .....	6
Bronchoscopy .....	1
Cesarean section .....	1
Cholecystectomy .....	3
Cholecystectomy, choledochography and biopsy of liver .....	1
Cholecystectomy and choledochotomy .....	3
Cholecystectomy, choledochotomy and duodenostomy .....	1
Cholecystojejunostomy, and entero-enterostomy .....	1
Circumcision .....	41
Closed reduction and Kirschner wire to humerus .....	1
Complete colectomy .....	1
Cordotomy .....	1
Correction of contracture and full thickness skin graft to denuded areas .....	3
Correction of ptosis of eyelid .....	1
Craniotomy .....	1
Crutchfield tongs to skull with skeletal traction to cervical vertebra .....	1
Curettement of bone tumor and graft from iliac crest to left tibia .....	1
Curettement of osteomyelitis .....	3
Cystogram .....	1
Cystoscopy .....	42
Cystoscopy, biopsy of cervix and bladder wall .....	1
Cystoscopy and biopsy of lesion from bladder wall .....	3
Cystoscopy and fulguration of vesicle neck .....	1
Cystoscopy, litholapaxy and biopsy of bladder wall .....	1
Cystoscopy and prostatic biopsy .....	3
Cystoscopy and removal of multiple stones from bladder .....	1
Cystoscopy and retrograde pyelogram .....	10
Cystoscopy, transurethral resection and bilateral orchidectomy .....	1
Dilation and curettage .....	6
Dilation and curettage and biopsy of cervix .....	17
Dilation and curettage, biopsy of cervix and removal of endocervical polyp ..	1
Dilation and curettage, conization of cervix and sigmoidoscopy .....	1
Debridement and repair of lacerations, face .....	1
Debridement and repair of multiple lacerations and compound fractures .....	1
Debridement and secondary closure of abdominal wound .....	1
Debridement of laceration and pedicle graft from abdomen to thumb .....	1
Decompression of compound depressed fracture of skull .....	1
Detachment of pedicle graft from abdomen .....	1
Drainage of hematomas of pelvis .....	1
Enucleation of eye .....	1
Esophagoscopy and biopsy of esophageal mucosa .....	1
Esophagoscopy and removal of foreign bodies from esophagus .....	1
Evacuation of hematoma and repair of laceration of galea .....	1
Excision of basal cell, cancer .....	2
Excision of biopsy of node, neck .....	3
Excision biopsy of scalene node .....	2
Excision of branchial cleft cyst .....	1
Excision of chalazion .....	1
Excision of endometrial cyst, bilateral salpingo-oophorectomy, appendectomy .....	1
Excision of lesion from buccal mucosa .....	2
Excision of lesion from lip .....	2

Excision of lesion from sole of foot .....	1
Excision of lipoma .....	1
Excision of mass from breast .....	4
Excision of moles .....	7
Excision of rectal fistula .....	1
Excision of scar tissue and pedicle graft to leg .....	1
Excision of scar tissue and plastic repair, penis .....	1
Excision of sebaceous cysts .....	14
Excision of skin lesions .....	30
Excision of skin lesion and plastic repair .....	1
Exploration of lower one-third of ureters and biopsy of superior ramus of pubic bone .....	1
Exploratory laparotomy and appendectomy .....	3
Exploratory laparotomy, cholecystectomy, choledochography, choledochotomy, duodenostomy, sphincterotomy and biopsy of liver .....	1
Exploratory laparotomy, choledocholithotomy and releasing of adhesions .....	1
Exploratory laparotomy, choledochostomy and biopsy from region of gallbladder .....	1
Exploratory laparotomy, evacuation of blood from abdominal cavity and transverse colostomy .....	1
Exploratory laparotomy, releasing of intestinal obstruction and cholecystostomy .....	1
Exploratory laparotomy, releasing of multiple adhesions, closure of multiple hernia sacs and resection of portion of small intestine .....	1
External fixation of mandible with Roger-Anderson pins .....	1
Extraction of teeth .....	2
Full thickness skin graft to denuded areas on chest and right leg .....	1
Gastrotomy .....	3
Graft of 5th profunda tendon, using sublimis tendon .....	1
Hemithyroidectomy .....	2
Hemorrhoidectomy .....	7
Hemorrhoidectomy, excision of rectal fissure and partial sphincterotomy .....	1
Hemorrhoidectomy and excision of rectal fistula .....	1
Hemorrhoidectomy and removal of lipoma .....	1
Hemorrhoidectomy and sphincterotomy .....	1
Hemorrhoidectomy and sigmoidoscopy .....	2
Herniorrhaphy .....	22
Herniorrhaphy, bilateral .....	1
Herniorrhaphy and circumcision .....	2
Herniorrhaphy and orchiopexy .....	1
Herniorrhaphy and resection of segment of small intestine .....	1
Incision and cauterization of post-operative pilonidal cyst .....	1
Incision and curetting of post-operative pilonidal cyst .....	1
Incision and drainage of abscess .....	1
Incision and drainage of abscess of jaw, extraction of teeth and biopsy of alveolus .....	1
Incision and drainage of ischiorectal abscess .....	1
Incision and drainage of palmar fascia abscess .....	5
Inguinal node dissection .....	1
Insertion of prosthetic femoral head .....	2
Insertion of radium needles to cervix .....	7
Insertion of radium needles to fundus of uterus .....	2
Internal urethrotomy .....	1
Kirschner wires and skeletal traction to metacarpals .....	1
Laparotomy .....	1
Litholapaxy .....	1
Litholapaxy and biopsy of bladder wall .....	1
Lumbar sympathectomy .....	1
Lumbar sympathectomy and amputation of toes .....	1
Lumbosacral laminectomy .....	1
Meatotomy .....	2
Mid-thigh amputation of leg .....	12
Multiple ligation and stripping of saphenous vein .....	4
Needling of eye .....	2

Nephrectomy .....	2
Nephrolithotomy .....	1
Oophorectomy, bilateral, resection of segment of sigmoid colon and sigmoid colostomy .....	1
Oophorectomy, left .....	1
Open reduction of fracture and epiphyseal separation of radius .....	1
Open reduction and internal fixation of ankle with SMO bone screws .....	2
Open reduction and internal fixation of femur with Austin-Moore pins .....	2
Open reduction and internal fixation of femur with Lorenzo screws .....	6
Open reduction and internal fixation of femur with Richards adjustable nail and plate .....	1
Open reduction and internal fixation of femur with Rush pin .....	1
Open reduction and internal fixation of femur with Smith-Petersen nail and intertrochanteric bone plate .....	30
Open reduction of humerus .....	1
Open reduction and internal fixation of humerus with Rush pin .....	4
Open reduction and internal fixation of nonunion fracture of tibia with Rush pin .....	1
Open reduction and internal fixation of olecranon with SMO bone screw .....	3
Open reduction and internal fixation of patella with Kirschner wires .....	1
Open reduction and internal fixation of radius with Rush pin .....	2
Open reduction and internal fixation of supracondylar fracture of humerus with SMO bone screws .....	1
Open reduction and internal fixation of tibia with Rush pin .....	2
Open reduction and internal fixation of tibia and fibula with SMO bone screws .....	2
Orchidectomy .....	1
Orchidectomy and removal of mass from scrotum .....	1
Orchiopexy, 2nd stage .....	1
Osteotomy and Kirschner wire with skeletal traction, finger .....	1
Panhysterectomy .....	1
Panhysterectomy and appendectomy .....	6
Panhysterectomy, bilateral salpingectomy, right oophorectomy and appendectomy .....	1
Panhysterectomy, left oophorectomy and releasing of multiple adhesions .....	1
Panhysterectomy, repair of cystocele, rectocele and urethrocele, appendectomy and repair of umbilical hernie .....	1
Panhysterectomy and right salpingo-oophorectomy .....	2
Panhysterectomy, salpingectomy and appendectomy .....	1
Panhysterosalpingo-oophorectomy and appendectomy .....	10
Panhysterosalpingo-oophorectomy, radical, and partial colpectomy .....	2
Perineal prostatomy .....	1
Perineal prostatectomy and vas section .....	1
Pinch skin graft to denuded area on leg .....	1
Prostatic biopsy .....	3
Pyelolithotomy .....	1
Radical mastectomy .....	2
Radical mastectomy and skin graft to denuded area .....	5
Radical mastoidectomy .....	1
Reconstruction of vesicle neck .....	1
Reduction of compound fracture and repair of lacerations .....	1
Removal of bullet from knee .....	1
Removal of bullet from scrotum .....	1
Removal of cataract .....	7
Removal of fingernail .....	1
Removal of foreign body from ear .....	1
Removal of fragments of patella and removal of screws from ankle .....	1
Removal of isthmus of thyroid .....	1
Removal of Lorenzo screw and insertion of prosthetic femoral head .....	1
Removal of mass from breast .....	3
Removal of nasal polyps .....	2
Removal of ovarian cyst and appendectomy .....	1
Removal of pilonidal cyst .....	2
Removal of portion of patella .....	1
Removal of products of conception from cervical os .....	2
Removal of pterygium .....	2
Removal of rectal fissure and polyp .....	1

Removal of Rush pin .....	3
Removal of secondary cataract and optical iridectomy .....	1
Removal of Smith-Petersen nail .....	1
Removal of Smith-Petersen nail and insertion of prosthetic femoral head ....	2
Removal of Smith-Petersen nail and intertrochanteric bone plate .....	1
Removal of stones from gallbladder and cholecystotomy .....	1
Removal of tattoo .....	2
Removal of toenail .....	4
Removal of urethral carbuncle .....	1
Repair of cystocele, rectocele and perineorrhaphy .....	1
Repair of cystocele, rectocele and urethrocele .....	2
Repair of cystocele and urethrocele .....	1
Repair of epigastric hernia .....	1
Repair of femoral and interstitial hernia .....	1
Repair of flexor tendon, arm .....	1
Repair of incisional hernia .....	1
Repair of lacerations .....	6
Repair of lacerations on lip and hand, closed reduction and fixation of humerus .....	1
Repair of laceration, tongue .....	1
Repair of rectocele, perineorrhaphy and repair of ventral hernia .....	1
Repair of Richter's hernia and appendectomy .....	1
Repair of sliding hernia .....	1
Repair of sliding hernia, hydrocele and appendectomy .....	1
Repair of stab wound, chest .....	1
Repair of varicocele and circumcision .....	1
Repair of ventral hernia .....	1
Revision of pedicle graft .....	1
Revision of thyroid scar .....	1
Salpingo-oophorectomy, left, and appendectomy .....	1
Sandpapering of scars .....	1
Secondary closure of operative wound .....	3
Secondary herniorrhaphy .....	1
Sigmoidoscopy .....	26
Skin graft to denuded areas .....	4
Splenectomy and subtotal pancreatectomy .....	1
Submucous resection .....	2
Submucous resection and nasoplasty .....	1
Subtotal gastrectomy .....	4
Suprapubic cystostomy .....	2
Suprapubic prostatectomy and vas section .....	2
Suspension of sigmoid colon and appendectomy .....	1
Syme amputation .....	1
Tonsillectomy .....	6
Tonsillectomy and adenoidectomy .....	9
Tonsillectomy and partial uvulectomy .....	1
Tracheotomy, gastrotomy and biopsy from oropharynx .....	2

## OCCUPATIONAL THERAPY DEPARTMENT MILLEDGEVILLE STATE HOSPITAL

July 1, 1958

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is the Annual Report of the Occupational Therapy Department of the Milledgeville State Hospital for the year ending June 30, 1958.

The past year has been most successful for this department. The White Female contribution in the needle crafts has increased in all of the shops. Craft work in the Whittle Building with the White Male patients has progressed very nicely.

A large number of prizes were won at the Southeastern Fair in Atlanta and also at the Fair in Macon. Our work was most outstanding and we were indeed proud of the numerous sales made. Through these exhibits, many items have been sold through out of town orders.

One new shop has been added in the Dupree Building for Colored Female patients; nearing completion is another new shop in the Washington Building, which we hope to have under full operation at an early date. The colored patients have responded very nicely to handwork of many varieties.

We feel grateful to the Educational Department for their participation in our program, especially Ceramics. The Student Nurses are especially helpful with the patients, trying to find ways to help in rehabilitation.

Publication of The Builder, a weekly news bulletin, has continued throughout the year with special editions at Christmas, Easter and other holidays. Many orders of mimeograph work are done by patients of The Builder staff for other departments of the hospital.

We feel justly proud of the progress made in our department. The O. T. Aides have been most cooperative and willing to give of their time and talents for the benefit of the patients and the department.

There is attached hereto a list of paid invoices for the year 1957-58, that totaled \$13,493.38. Our receipts from sales were \$16,812.25, thus showing a net profit of \$3,418.87 over the cost of materials.

Inventory of materials on hand shows a value of \$2,794.65.

We wish to express our deep appreciation to Dr. Peacock, Mrs. Bonner and all Staff Members for their interest, help and cooperation.

Respectfully submitted,

(Mrs.) Maude L. Boone, Supervisor  
Occupational Therapy Department

Dr. T. G. Peacock  
 Superintendent,  
 Milledgeville State Hospital  
 Milledgeville, Georgia

Dear Dr. Peacock:

As Co-ordinator of Religious, Recreational and Music Therapy Activities, I submit the following report as of July 1, 1958.

### *RELIGIOUS THERAPY*

The beginning of this fiscal year found departments evaluating the contribution that religious activities made to the hospital patient personnel. It was agreed after serious consultation that the revision of the entire program was essential if Religious Therapy was to provide the therapy it is capable of providing.

As a result of this consultation, the chaplains conduct a monthly meeting in which the various problems that have arisen, along with other items relative to their chaplaincy, are discussed. From the monthly meetings has come a more organized type of religious activity, with the Sunday School being conducted almost entirely by patient personnel each Sunday morning at 9:30 and Chapel Services being conducted by the chaplains and the Co-ordinator of Religious Activities at 2:30 on Sunday afternoons. Seven local ministers have served for periods of fifteen days until all seven have served and then repeat their schedule throughout the year. A Chapel Choir, in new choir robes, assists in conducting a formal type of service, singing choral responses, call to worship, religious hymns and on other occasions furnish special solos and music for the worship services.

When patients or families have requested personal interviews with the Minister, Rabbi, or Priest, the Co-ordinator has worked with the family, contacting the doctor in charge, and arranging a suitable time for the interviews.

As Co-Ordinator of Religious Activities, I have assumed the responsibility of working with the United Church Women in the furnishing and maintaining of more comfortable day rooms. To date, fourteen day rooms in various buildings have been completely furnished by this organization. Mrs. L. L. Austin of Atlanta, Georgia is the Chairman of the Day Room Committee of this state organization. The total amount raised and spent for these day rooms is approximately \$14,000.00.

Beyond this, the United Church Women have been active in special projects, donating hi-fidelity records, record players, contributions of a silver tea service, and an endless amount of magazines,

books, et cetera. The United Church Women of Georgia are to be commended for their unselfish, tireless and sacrificial labor. Their contributions have added greatly to the comfort of thousands of patients. The beautiful day rooms stand as testimony to the work of these dedicated women.

Special programs have been part of our activity and we have assisted in arranging for various organizations, groups, and individuals to present special programs for the patients during the year. These have been attended by a large number of patients and have been appreciated by all who have been attending and have proved helpful and valuable in helping the patients keep in contact with the outside world.

Hundreds of beautifully prepared scrapbooks, magazines, books, records and music have been presented by Pilot Clubs and other organizations throughout the state. These have been placed in the Patient's Library and put on the wards for the benefit of the patients. The project of the Pilot Clubs is being continued through this new year for the preparation of these beautiful scrapbooks.

Nine of the new, hi-fidelity, four-speed record players were presented to the Music Therapy Department by Mr. Julius Tyre McLendon, Sr., for use in the Music Therapy program. These have been placed on the wards for the benefit of the patients. Two other such record players were presented by Mrs. Charles Moore and Methodist women of this area. These also have contributed greatly to the pleasure and comfort of many people.

The annual Christmas festivities were enjoyed by many thousands again this year. Various denominational groups, local and statewide, made the Christmas parties a great success. Each patient received gifts or items that would be useful during the months after Christmas is over. Thousands of gifts were received and processed both in this department and in the Social Service Department. This continues to be one of the high spots in the year.

We believe there is very important work that Religious Therapy can do, and are sincerely doing our utmost to make this a successful therapy.

#### *RECREATIONAL THERAPY - WHITE DEPARTMENT*

This year has seen an increase in the number of patients that are participating in recreation activities furnished by this department. The program has been as diversified as possible so that all the patients have had an opportunity to participate in some activity. With the exception of June, July, and August, movies are being pre-

sented twice weekly in the auditorium for all patients who are able to attend. These are films which are reasonably recent. Sixteen millimeter films are shown weekly in several buildings, both male and female. Dances are conducted twice weekly in several buildings where the patients are not able to come to the auditorium to attend. The square dance group has been continued and an increase in participants has been shown. This group has put on several demonstrations. The program for regressed patients has been expanded to include more patients and excellent results have been accomplished.

Each member of the recreation staff is fully capable of conducting the recreational therapy activities on the ward level, and this they are doing more and more each week. There is a therapist assigned to each of the buildings to conduct ward activities, working in cooperation with the supervisor, doctor, nurses, and attendants, and helping in the rehabilitation program of as many patients as possible. These ward therapy programs consist of dancing, group games, organized competitive activity, et cetera. Student nurses continue to be assigned to work with the Music Therapy and Recreation Departments and this assistance has been invaluable in promoting these activities.

This department, in cooperation with other departments, went to Atlanta with a group of patients and presented a program for the Legislature. This was a very fine trip and the program was better than anyone had expected and was well received.

The annual barbecues were held for the white and colored patients on Independence Day and Labor Day, respectively. The picnics, wiener roasts, fish fries, et cetera, have been held for the patients during the past year and have been one of the most enthusiastic activities.

The Director of this Department received a Master of Science degree in Recreation from Florida State University this year.

During the past year, stage curtains and a portable platform have been obtained. They have certainly improved the stage and the looks of the auditorium tremendously.

This is a limited review of the activities of the Recreation Department. Time and space will not permit a detailed account of the various activities now being conducted and the usual activities being enlarged. We feel that recreation is an important phase of the therapeutic treatment of mentally ill people.

Respectfully submitted,

Bruce R. Prosser  
Director of Recreation  
White Department

### RECREATIONAL THERAPY – COLORED DEPARTMENT

Recreation in the colored divisions of the Milledgeville State Hospital is spread mainly through different buildings: Dupree, Ingram, Bostick, A and D Pavilions, all of which buildings come to the Washington and Holly Building where the activities are planned by the Supervisor of Recreational Activities. Since there is no auditorium built for these events, they are handicapped for personnel and adequate equipment. However, there is one person to plan and supervise the following events during the year. Choir practice is held on two mornings of each week. The religious services, Sunday School in the mornings and Chapel in the afternoons, are held in the dining room of the Washington Building each Sunday. Movies are shown in the dining rooms on two afternoons of each week for the female patients and two times each week for male patients, these on male wards being shown in the evenings. These are 35 millimeter films. Eleven of the 16 millimeter films are shown weekly in the day rooms for patients that are not able to take part in outside activities. The talent shows, variety shows or minstrels are held occasionally for these patients. One day each week is set aside for picnics when the weather permits. Special parties are given during the winter months in the buildings. Four dances are given each week during the winter months. One dance each week is held during the spring and summer months. Softball, badminton, volleyball and other outdoor games are enjoyed in the afternoons when there is time or when the movie and dance schedule permits. During the months of June, August and October, field days are scheduled consisting of races and contests between the patients of different buildings. Bingo and other ward games and parties are given on the wards. On Labor Day a barbecue is given for all of the colored patients and employees on the hospital grounds.

Respectfully submitted,

Dewana Smith  
Recreational Aide  
Colored Department

### MUSIC THERAPY DEPARTMENT

On July 1, 1957, a new department was established at the Milledgeville State Hospital. This is known as the Music Therapy Department and is under the supervision of the Co-Ordinator of Religious, Recreational and Music Therapy Activities. This is a new therapy, and as in the case of all things new, it was necessary to prove its worth to maintain and enlarge the department. Mr. Melvin R. George was employed and became head of this department serving as Co-Ordinator of Activities.

During the year Miss Saralyn Ivey was added to the staff. Miss Ivey has her degree from the Georgia State College for Women where she majored in music and also her master's degree from Columbia University, New York City, New York. Her addition to the staff was a valuable addition.

The following is a list of the expenditures of the Music Therapy Department for the year of July 1, 1957, through June 30, 1958.

24 band instruments were purchased at the cost of ..... \$2,140.00

1 Baritone	\$ 150.00
6 Clarinets	470.00
2 Cornets	160.00
1 pair Cymbals and handles	35.00
1 Bass Drum and beater	50.00
2 Alto Horns	325.00
1 Sousaphone (used)	150.00
4 Trombones	320.00
6 Trumpets (Conn)	480.00

11 string band instruments were purchased at the cost of .. \$ 890.00

1 Banjo, 5 string Harmony	\$ 37.00
1 String Base	275.00
4 Guitars, Kay	368.00
1 Mandolin with case	55.50
2 Ukeleles with cases	45.50
2 Violins, Kriml	109.00

Accessories purchased for these instruments ..... \$ 26.12

Other instruments purchased:

13 Harmonicas (which were purchased for list)	\$ 27.53
25 Song flutes	\$ 18.75

Christmas, Easter Cantatas and Operetta Books .....	\$ 184.77
Music and Instructions .....	\$ 160.02
Records and Albums for Music Therapy Department .....	\$ 146.40
1 Geloso Tape Recorder and Recording Tape .....	\$ 174.99
1 Royal Typewriter for use in office .....	\$ 215.00

Total Expenditures for fiscal year ..... \$3,973.56

Music Appreciation classes are being conducted in eight buildings at this time; three male buildings and five female buildings.

Music Appreciation is a period of listening to classical and semi-classical music and is attended by groups of from ten to eighty patients. The periods last from forty-five minutes to one and one-half hours. Music Therapy groups are organized in nine buildings, and these activities are presented to stimulate regressed and inactive patients to activity and to create interest, relaxation, et cetera.

Weekly dances with student nurses are provided for the male receiving wards and the Veteran's Building. Study in dance techniques is a new organization that has been put into use and is proving effective. Smaller specialized therapy groups are being developed. A string band is one of the most popular organizations, composed of patients in the hospital. There are twelve participants playing guitars, violins, mandolins, et cetera, at this time. This group presents special programs in different buildings for birthday parties, ward dances, special activities, et cetera. They have recently started playing for the dances in the auditorium. This, we feel, has been invaluable in helping many patients in the process of rehabilitation.

Another organization that is in its infancy but making rapid growth is a brass concert band composed of trumpets, clarinets, cornets, trombones, et cetera. This group numbers approximately twenty-two at the present time, and we feel that before long this will be an outstanding organization, also. Patients without previous instrument experience are learning these instruments and enjoying them tremendously.

The Chapel Choir under the direction of the Co-Ordinator, presented a music program before the Legislature of the State of Georgia, in cooperation with the Recreation and Occupational Therapy Department. This was one of the most enjoyable experiences that most of the patients had ever experienced. We hope that this is the beginning of other activities outside the hospital itself.

At Christmas time the Chapel Choir presented a Christmas cantata and then at Easter repeated the same activity, presenting an Easter cantata both for the patient personnel and for the Hardwick Methodist Church congregation.

The Music Therapy Department is now in the midst of rehearsal for an operetta presented entirely with patients. We feel this is going to prove to be a valuable experience.

We feel that this is the beginning of a long and effective service to the people, to the government, and the people of the State of Georgia. Serving to the best of our ability with the native talents inherent in each of us, we feel that there is a great deal to be ac-

complished and real value in Music Therapy. The activities listed are, again, just a fragment of the work that is being done.

Respectfully submitted,  
Melvin R. George  
Co-Ordinator of Religious,  
Recreational and Music Activities

## PATIENTS' LIBRARY

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is the Annual Report of the Patients' Library for the year ending June 30, 1958.

We have had a most successful year. Through the efforts of civic and religious organizations, we have been furnished magazines and books which the patients have greatly enjoyed. Subscriptions to several magazines have also been donated.

As of June 30, 1957, we had 14,034 books. As of June 30, 1958, we have on hand 15,641—an increase of 1,607.

At an early date, we plan the addition of a reading room in the library. Partitions are to be moved that will give added space, which will not only improve the appearance of the Library but will give better working conditions for the personnel and be most helpful and enjoyable for the patients.

The following is a detail of the expenses incurred for the year:

(1) Supplies—Gaylord Brothers .....	\$ 31.20
(2) Supplies—Cokesbury Book Store .....	85.02
(3) Fans—General Electric Supply Co. ....	72.00
(4) Fluorescent Ceiling Lights .....	90.00
(5) Readers Digest Condensed Books .....	4.88
Total Expenses .....	\$283.10

We wish to express our appreciation to Dr. Peacock, Mrs. Bonner and the entire staff for their interest, help and cooperation.

Respectfully submitted,  
(Mrs.) Frankie S. Simpson  
Librarian

Robert J. McCandliss, M.D.  
Roentgenologist

July 1, 1958

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

Most of this past year this department has existed with a critical shortage of personnel. During the first quarter this department's personnel decreased to two senior psychologists. Only in the last part of the last quarter were we successful in filling some key positions. The close of this fiscal year finds the department with one chief psychologist, three senior psychologists, one psychological counselor, and one graduate student who is here for the summer.

Because of the lack of personnel, it was necessary to curtail the services for the greater part of this past year. In spite of the limitations, this department did meet its obligations with the four main functions which are: psychological evaluations, psychotherapy, research, and teaching.

The greatest expenditure of time was directed toward psychological evaluations. A total of 611 patients were seen for psychological evaluations and a total of 3,307 tests were used in making these evaluations. These figures represent essentially the efforts of two psychologists. The number of tests used in making psychological evaluations has been increased in order to intensify the sensitivity and increase the validity of the psychological evaluations.

During the past year, we have reached 134 patients in group and individual psychotherapy. As was shown in previous reports, a high percentage of the patients who received formal therapy are furloughed. Each year this represents a large saving to the State. We consider psychotherapy as an important function of this department and are always anxious to increase our services in order to reach more of our hospital population.

This department has initiated a new type of therapy for this hospital. A secretarial training course has been started for patients in the Green Building. This program has been very limited due to the small amount of equipment available. These patients have been carefully selected for their innate ability to learn, but with little regard to the severity of their mental illness. The benefits from this class have far exceeded our expectations. One striking example was a young girl, who for all practical purposes was mute. After attending classes for three weeks, she began to talk in class and this soon carried over to her overall hospital adjustment. At the present time, this girl has reached a higher level of adjustment than at any other time since her admission some two years ago.

This class is being taught by Mr. Frank Gunn and Mrs. Helen Ginn. Mr. Gunn, who is assigned to the department as a psychological counselor, teaches shorthand and typing eight hours a week. Mrs. Ginn, Psychology Department's secretary, teaches Business English two hours a week. It is hoped that in the near future the facilities of this school may be extended to reach more of the hospital. With little additional expenditure of time, many more patients could benefit from this type of therapy and training.

Our participation in activation and informal types of therapy have been curtailed during the past year. Part of this has been offset by the creation of a Music Therapy Department. Previously, we were very active with music therapy but no longer participate in this field. We wish to commend the Music Therapy Department on the programs that they conduct and we certainly feel that their efforts contribute to our achievements.

This department has continued to contribute to the educational program in the hospital through lectures to student nurses and attendants. Research projects are being conducted and most of the efforts are being made on the individual's own time.

The routine work of the department is shown below:

I.	Patients contacted	1957-58
A.	Patients evaluated with Psychological tests	611
	Rorschach	380
	Wechsler-Bellevue	551
	M.M.P.I.	462
	T.A.T.	167
	H.T.P.	507
	Bender-Gestalt	504
	Word Association	192
	W.G.S.	182
	Sentence Completion	87
	Other	275
	Total tests used	3,307
B.	Psychotherapy:	
	Patients seen in individual psychotherapy	29
	Patients seen in group psychotherapy	105
	Patients given activation and informal therapy	2,075

	Total in Psychotherapy .....	2,209
	Total patients contacted .....	2,820
II.	Reports written .....	674
III.	Teaching nurses and attendants (hours) ..	120
IV.	Research (Approximate hours used) .....	200

We wish to express our appreciation to Dr. Peacock and all Staff Members for their interest, help, and cooperation.

Respectfully submitted,

James B. Morris,  
Chief Clinical Psychologist

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The report of the Affiliated School of Nursing and Nursing Service for the fiscal year ending June 30, 1958 is submitted as follows.

Only minor changes have taken place in the affiliate program during the past year. One Clinical Instructor was granted a year of educational leave with scholarship in September to continue her education toward the Bachelor of Science in Nursing Education. She will receive this degree in September of this year.

The annual faculty meeting was held in April with forty-one members attending, including nineteen from the affiliating schools and Miss Genevive Phillips, R. N., Educational Supervisor of the State Board of Examiners of Nurses for Georgia. This was a very profitable meeting and many favorable comments concerning our program were made by the visitors.

Some new equipment for the Educational Department has been purchased, including a mimeograph machine, typewriter, projector and screen for showing films and pedestal fans. Eighty-two books have been added to the library.

During the year 246 student nurses completed the affiliation course in Psychiatric Nursing. These were from the following Schools of Nursing:

Georgia Baptist Hospital	Atlanta	105
The Piedmont Hospital	Atlanta	32
Grady Memorial Hospital	Atlanta	50
Macon Hospital	Macon	22
The Medical Center	Columbus	3
Georgia Southwestern College	Americus	14
Warren A. Candler Hospital	Savannah	20

In addition to these student nurses, eighteen graduate nurses from South Carolina Baptist Hospital in Columbia completed the course.

Several nurses from our staff attended the Georgia State Nurses Association Annual Convention in Savannah in the fall. We were pleased to have awarded to our hospital a certificate showing that 100% of our nursing staff held membership in the Georgia State Nurses Association.

We have continued with the Attendant Psychiatric Aide Course and have received very good response. In November exercises were held for 91 white and 63 colored attendants who were granted Psychiatric Aide Certificates.

In the Jones Building we have been very busy taking care of a large number of medical and surgical cases. Admitted to the hospital wards for treatment during the past year were the following number of employees and their dependents:

White Female Employees .....	545
White Male Employees .....	436
Colored Female Employees .....	73
Colored Male Employees .....	19
White Female Dependents .....	452
White Male Dependents .....	140
Colored Female Dependents .....	94
Colored Male Dependents .....	12

In July patients on the Infirmary, First and Second wards of the Powell Building were moved to two pavilions prepared to house them while the wings of the Powell Building were being renovated.

During the past year we were granted funds to reallocate one ward each in Boone, Arnall and Freeman Buildings from general to sick wards. This was done to help take care of the ever increasing number of bed patients in each building.

The problem of overcrowding is growing daily. Several times during the year, in order to relieve the reception wards of some of their excessive numbers, we have had to resort to adding additional beds in each building to wards already too crowded for minimum comfort and safety.

We are very proud of the new Occupational Therapy room that has been added to the Washington Building and also the renovation of the colored chapel in Dupree Building which is now used for Occupational Therapy and a classroom for the Colored Psychiatric Aides.

We were glad to have the following new positions approved for nursing service during the past year:

White Female Service .....	11
White Male Service .....	4
Colored Female Service .....	2
Colored Male Service .....	6

Retiring from nursing service during the year were the following:

White Female Service .....	6
White Male Service .....	5

Colored Female Service .....	1
Colored Male Service .....	2

I feel that excellent nursing care has been given and the co-operation of the nurses and attendants has been gratifying. Their devotion to duty and loyalty to the institution has been outstanding.

The following is a report of employees on duty in Nursing Service Department:

Director of Nursing .....	1
Assistant to Director of Nursing .....	3
Director of Psychiatric Nursing Education .....	1
Psychiatric Clinical Instructor .....	6
Building Supervisor, R. N. ....	15
Surgical Supervisor, R. N. ....	3
Surgical Ward Supervisor, R. N. ....	2
Surgical Nurse, R. N. ....	4
Nurse Anesthetist, R. N. ....	1
Graduate Charge Nurse, R. N. ....	23
Staff Nurse, R. N. ....	21
Building Supervisor Attendant Service, Female ..	6
Supervisor Attendant Service, Male .....	2
Assistant Supervisor Attendant Service, Male ....	6
Building Supervisor, Male .....	7
Surgical Aide .....	2
Charge Attendant .....	357
Attendant .....	774
O. T. Aide, Needlecraft .....	27
O. T. Aide, Woodwork .....	4
X-Ray Technician .....	6
Beautician .....	8
Matron Nurses' Home .....	5
Bus Driver .....	8
Maid (T. B. Service) .....	6
Clerical Worker .....	11
Students (Psychiatric Affiliates) .....	78
Total .....	1,386

We are very grateful to the medical staff for services rendered to the employees and their families and for the splendid cooperation given us in the educational programs of our hospital.

For your kind and understanding manner and your willingness to help whenever needed, I am most appreciative.

Respectfully submitted,

(Mrs.) Myra S. Bonner, R.N.  
Director of Nursing

July 1, 1958

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

Report of the Social Service Department for fiscal year from July 1, 1957, to June 30, 1958, is submitted as follows.

Case histories on patients are obtained by the same method as in previous years; that is, relatives are interviewed at time of admission of patient, if contact with them can be made. If contact can't then be made, the next-of-kin or a representative is requested to come for personal interview. If all efforts for personal interview are unsuccessful, a questionnaire is mailed to next-of-kin or to County Department of Public Welfare, who make appropriate contact and return completed questionnaire.

During fiscal year, case histories were obtained as follows:

Histories from interviews ..... 2,000

Histories from questionnaire ..... 1,734

NOTE: All case histories of negro patients are obtained by questionnaire, and these are included in the 1,734 cases above reported.

All medical references obtained both by interview and by questionnaire are contacted for clinical reports. These references are: attending physicians, hospital, governmental agencies, et cetera.

The Chief Medical Social Worker is subject to call as public and/or family relations counselor in cases of personal problems. These are termed "service cases," and are included in that classification as follows.

There were 1,473 service cases during the year, in the matter of social security benefits, other claims, family relationship, insurance, matters of estate, compensations, pensions, restoration of civil rights, et cetera, and requested conferences with patients, both in Hospital and on furlough.

The Chief Medical Social Worker also personally handled:

Placements of patients (Job placement and others) .....	63
Transfers to out-of-State institutions .....	49
Special investigations on instruction of Superintendent .....	3
Arrangements for eyeglasses .....	127

Special Services handled by Chief Medical Social Worker:

- (a) Obtaining State Medical Aid and arranging for admission to University Hospital, Augusta, for cases requiring special treatment there.
- (b) Assistance to Clinics in Atlanta, Augusta and Savannah in matter of rehabilitation programs for alcohol addicts who have been patients here.
- (c) Arrangements made for transfer of out-of-State patients.

Supervision of patients on job placement is maintained by Chief Medical Social Worker with some assistance from other agencies.

Excellent cooperation continues between the Division of Vocational Rehabilitation and Milledgeville State Hospital, under original plan; that is, all feasible cases are referred by the Medical Staff to Social Service Department for referral to the local Counselor of Division of Vocational Rehabilitation with all pertinent information, the Counselor assisting with rehabilitation services. Five cases were so placed during this fiscal year.

The State Department of Public Health, through its County Nurses, continues its valuable assistance by means of the "Pilot Project." Thirty-two (32) counties now participate, representing an increase of ten counties this fiscal year. The County Nurses report progress of problems of furloughed patients, also they respond with special reports to us on request. It is expected that other counties will be added to this effective project.

Pilot Project contacts, including clinical abstracts and service cases .....	1,870.
--	--------

During the year, twenty-three (23) babies were born to patients in this Hospital, for whom suitable placement plans were made, or are in process of completion. Some were placed with relatives, others in

foster homes. County Departments of Public Welfare and/or Child Welfare Consultants render assistance where their help is indicated.

Interest in Christmas cheer continues quite active, as reflected in the following summary:

Contributions of cash and attractive gifts for the so-called "forgotten" patients were made by individuals, business, civic and fraternal organizations, Georgia Association for Mental Health, Inc., Beta Sigma Phi business women's sorority of Atlanta, Vienna Public School, and practically all Church denominations in addition to the usual, extensive contribution of United Church Women of Georgia as a unit.

Total report:

Gift donors .....	606
Cash donors .....	487
Donors to Television Fund .....	7
Total donors .....	1,100
Cash contributions .....	\$6,040.03
Number of gifts .....	Too many thousands to attempt an estimate - all of first quality, and most of them were gift wrapped.

The annual Christmas parties, with beautiful gifts not included in above total, were given by the Methodist, Baptist, Episcopal, Presbyterian, Church of Latter Day Saints, Church of God, Christian denominations, the Catholic Church and Jewish congregations for their members here. The ladies of the local churches planned interesting programs, brought the appointments and were the hostesses. In all Church activities, the Chief Medical Social Worker arranges dates and assists.

Since 1949, Christmas Greeting Cards ready for mailing out, also handmade "picture booklets" and picture scrapbooks have been sent by Miss Laura Watson, the "Christmas Card Lady," of Atlanta, well in advance of Christmas. The totals this year were:

Christmas Cards in envelopes .....	15,400
Birthday and Get Well Cards .....	1,235
Picture booklets .....	3,200
Scrapbooks .....	203

Miss Watson reconditions beautiful, expensive cards, and the new and high quality envelopes to fit the several styles are always furnished by Col. James N. Keelin, of Atlanta, and Mr. Philip Shulhafer, Vice President, Montag Brothers, Inc., Atlanta. The past two years, a number of boxes of new cards have been given Miss Watson to send us on this project. Dr. Louis D. Newton, Pastor of Druid Hills Baptist Church, Atlanta, makes personal delivery of the many cartons each year for Miss Watson in early December. This Christmas project has grown to such extent that her Sunday School Class and other groups and individuals, as follows, have come to her aid:

Mrs. DeJournette Bulk, Atlanta, is Chairman of Scrapbook project for the Peachtree Pilot Club and of the State Association of Pilot Clubs.

T. E. L. Class, Druid Hills Baptist Church, Atlanta, helps make "picture booklets" and recondition cards.

Miss Watson, personally, works throughout the year on the Christmas cards, get well and birthday cards for patients to send in the fresh, fitted envelopes as above mentioned.

Day Room Project: This work is now under the supervision of the Coordinator of Religious and Recreational Activities.

Television: The Georgia Association for Mental Health, Inc., Atlanta, and United Church Women of Georgia continue television as a primary project. Standard, new sets are given occasionally by relatives of patients. Donations in any amount are received, and unrestricted contributions are deposited in the Television Fund.

Varied and continuous contributions, handled through this Department, have come from individuals, clubs, churches, United Church Women over the State, et cetera the gifts comprising presents and friendship cards to "forgotten" patients, musical recordings, material for handcraft, bulbs for seasonal planting, toys for children, also strollers, et cetera, and good literature and books for Patients' Lending Library, also for ward distribution. Clean, modern clothing is received.

Patients' Benefit Fund (Rehabilitation) for Indigent Patients: This is a year around interest of the Churches, and is the No. 1 Project of St. Philip's Cathedral (Episcopal), Atlanta, whose St. Lydia Chapter initiated the Fund in 1949. The following purposes

are served, the fund being administered by the Chief Medical Social Worker:

- (a) Rehabilitation: Suitable, adequate clothing for patients returning to employment, and maintenance to tide them over until earning.
- (b) Appropriate, adequate clothing for those going out into job placement.

Veterans Administration: Soldiers' serial numbers are obtained for the V. A. Contact Representative, with whom this Department cooperates in miscellaneous matters affecting ex-soldiers, soldiers and their dependents where mental illness is involved. Also, reports are furnished V. A. Hospitals on request.

Social Security: This year, 243 clinical abstracts have been furnished in support of applications for freeze of benefits of patients while hospitalized here. Note: Last year's total of 2,106 abstracts represents the general survey of the institution in order to set up the files. 243 is the total for current year.

Respectfully submitted,

(Mrs.) Claire S. Callaway,  
Chief Medical Social Worker

July 10, 1958

Dr. T. G. Peacock, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. Peacock:

The following is a report of the activities of the Dental Clinic for the fiscal year ending June 30, 1958.

The Dental Department lost a conscientious and capable leader in the death of Dr. John B. Herndon, our past Director of Dental Services. It was largely through his diligent efforts that the policies and the extent of services that we now have were established. He also coordinated with other members of the staff and Welfare Department officials in founding the Tharpe Dental Clinic. The personnel of the Dental Clinic, members of the staff, other personnel of the hospital, and patients will long remember and miss his cooperative attitude and understanding of human problems. In the words of Dr. Rayford W. Tharpe, "Dr. J. B. Herndon has gone to reap the rewards of a life well spent. The service he rendered his fellow man on earth was always unselfish, idealistic, and one devoted to the welfare of humanity. The work that he performed and the memories he left behind will never fade from our minds and hearts. Our institution, state, and the dental profession has lost a great leader."

Our beloved Dr. George H. Green died on January 2, 1958. Although he had retired on February 1, 1955, his continued presence at the hospital was a constant reminder of his outstanding accomplishments. His achievements speak for themselves. In 1910, he became a member of the staff of this hospital and served continuously for forty-five years. During most of this period he was the only dentist at the hospital. He served as a member of the faculty of the School of Nursing at the hospital which was later discontinued. At the time of his death he was a Life Member of the American Dental Association and of the Georgia Dental Association. On September 14, 1956, at a joint meeting of the Central District Dental Society and the Georgia Dental Association, a bronze plaque was presented to Dr. Peacock to be placed in the entrance of the Dental Clinic in honor of Dr. Green for his forty-five years of service to this institution. This honor was bestowed upon him by Dr. William Weichselbaum, Jr., President of the Georgia Dental Association at that time, during the ceremony arranged by Dr. J. W. Yarbrough in accord with action voted by the executive council of the Georgia Dental Association. The dental profession and this institution have lost a great dentist and a gentleman. His passing marked the end of an era of dental services at this hospital.

The primary work of the Dental Clinic staff is to restore lost or diseased dentitions. In addition to this, much emphasis has been placed on prevention of dental decay and arrestment of periodontoclasia. Chair side hygienic instruction by the staff has added greatly to the patients' ability to take better care of their teeth and dental appliances.

At the present time we have three dental hygienists on our staff. During the past year they performed a total of 7,637 operations and treatments, which includes cleaning and scaling of teeth and gum treatments. The scaling of teeth, their most important duty, is a great deterrent to periodontoclasia, a disease of the gums commonly known as pyorrhea. This is especially important in view of the fact that more than half of the teeth that are extracted are lost to this disease.

There are six dentists on our staff and two additional ones are to report in the near future. One laboratory technician and one laboratory assistant are employed, and an additional technician is expected to be obtained within a month. During the year a total of 35,724 operations and treatments were performed in the Dental Clinic, 28,087 having been performed by the dentists. An additional 10,040 laboratory operations and procedures were accomplished.

The past Dental Director and a member of our hygienic staff have lectured and shown slides to the attendants enrolled in the psychiatric and training courses. A contribution was made to public education when this hygienist lectured to the students at the Boys' Training School.

The dentists, hygienists, and assistants have been encouraged to join their respective organizations and to attend their meetings regularly. The clinic was well represented at the annual Hinman midwinter clinic in Atlanta in March.

The dentists, in conjunction with the dental technician, are diligently striving to make the best dental appliances possible. The importance of this cannot be over stressed. Representatives of a dental manufacturing company have given laboratory demonstrations on denture processing and construction. Similar demonstrations are being planned for a future date.

It has been suggested by the Dental Consultant that we obtain the part time services of a qualified oral surgeon. This would enable us to render more complete service to our patients and at the same time serve as part of our educational program for the staff of the Dental Clinic. In the past, such a program was maintained.

We feel that much progress has been made during the past year, and I wish to express my appreciation to you and to the members of the staff for your continued cooperation.

Respectfully submitted,

Robert C. Watson, D.D.S.  
Director of Dental Services

Judge Alan Kemper, Director  
 State Department of Public Welfare  
 State Office Building  
 Atlanta 3, Georgia

Dear Judge Kemper:

As part of the Annual Report of the Milledgeville State Hospital for the fiscal year July 1, 1957 - June 30, 1958, the following reports and recommendations are submitted on the part of the Administrative Department.

The over-all cost of maintaining a patient for the fiscal year was \$955.64 or a per diem cost of \$2.62. The net cost to the State for maintaining a patient, exclusive of outlay, profits of productive units, and donated surplus commodities was \$897.77 per annum or \$2.46 per diem.

You will find outlined below a statement showing funds allocated for the ten year period ending June 30, 1958.

YEAR ENDED	MAINTENANCE	OUTLAY	TOTAL
6-30-49	\$ 3,656,817.69	\$ 880,826.83	\$ 4,537,644.52
6-30-50	4,788,343.22	706,303.06	5,494,646.28
6-30-51	5,259,800.80	879,750.00	6,139,550.80
6-30-52	6,380,849.44	2,135,025.00	8,515,874.44
6-30-53	7,926,413.17	1,825,803.84	9,752,217.01
6-30-54	7,517,070.07	271,159.88	7,788,229.95
6-30-55	8,593,548.52	261,367.41	8,854,915.93
6-30-56	10,297,130.00	672,936.57	10,970,066.57
6-30-57	8,995,670.00	421,500.00	9,417,170.00
6-30-58	9,934,600.00		9,934,600.00

The second dormitory at the Colony Farm has been completed and occupied. We have torn down existing dormitories and landscaped the grounds.

The Colony Farm Prison Building is in the process of construction and should be occupied within the next fiscal year.

We have redesigned an existing building and are presently using it to house approximately 80 colored women that are being used in the cannery and laundry. We feel that these women are doing an excellent job.

The new laundry was completed, equipment installed and operations commenced. The addition of the new laundry enables us to furnish more and better finished laundry than we have ever been able

to furnish before. We are now pressing and finishing men's pants and shirts which were formerly returned to the wards rough dried.

The contracts for the enlargement of the water plant and the addition of a 16" main to the hospital pumping station have been completed and are now in use. Expansion of plant necessitated by increase in Hospital population and buildings.

During the year a change has been made in the maintenance schedule to charge different rates for housing based on the number of rooms in each housing unit. We feel that this is a much more equitable system than formerly used where employees occupying State houses were charged the same rate regardless of the size of the house.

We are presently engaging in a new project to try to better protect our linen supplies. We are purchasing various shades of dye and, insofar as possible, are assigning a different shade to each building. We feel that this will enable us to do a more satisfactory job in checking and sorting laundry, and we will be better able to safeguard these properties with these various shades which are not being sold on the commercial linen market.

Funds in the amount of \$35,000.00 have been approved for constructing and equipping a modern feed mill to manufacture poultry, dairy and hog feed. After this mill is completed, we will be able to use the by-products from the abattoir and a considerable quantity of grain grown on Institution farms, and we feel that this will result in considerable savings for the Institution. This mill should be in operation by the first of January.

The following recommendations are submitted for your consideration:

1. That funds for the construction of a sewage disposal system be allocated as early as possible. At the present time raw sewage is dumped in the river.
2. That funds be provided for the construction of additional housing facilities to house those patients presently occupying the following substandard buildings: 28th Ward, 38th Ward, 10th Ward, 14th Ward, Colony No. 2 (State Farm), Dupree, Old Colored Building Kitchen.
3. That the General Assembly set a goal of providing funds for maintenance operations at the Milledgeville State Hospital of a minimum of \$3.00 per patient day instead of the present \$2.46 allocated or used at the present time.

4. That the Hospital, or proper State Authority, be authorized to purchase additional lands to produce feed, forage, and other crops to be used by human and animal population.

5. That Milledgeville State Hospital be authorized to set up a pilot herd of beef cattle in order to determine the cost of producing beef at the Institution in comparison with that purchased outside. It is also recommended that milk production, when funds are made available, be increased to a minimum of 2,000 gallons per day.

6. That the Director request the Governor to ask the Highway Department to make a comprehensive survey of the grounds of the Milledgeville State Hospital and consider additional paved roads and sidewalks, in order that lands for planting shrubbery to beautify the grounds can begin at the proper point.

7. That some legal means be provided whereby the Hospital may pay premiums on liability and property damage insurance carried by employees of the Hospital whose principal duty includes the operation of State owned vehicles and motorized equipment.

Your attention is invited to the attached reports from various divisions of the Administrative Department.

Respectfully submitted,

Joe Boone  
Business Administrator

July 1, 1958

Mr. Joe Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

The following is the Annual Report of the Farm and Dairy Division for the fiscal year ending June 30, 1958.

During the fiscal year, the Farm and Dairy Division produced \$1,896,679.90 worth of farm and dairy products at a net cost of \$1,384,218.98, showing a net profit of \$512,460.92. The Farm and Dairy Division covers all the production units engaged in growing and processing farm products and is broken down into various units as follows - Abattoir, Cold Storage, Farm, Cannery, Broiler Project and Egg Project. Our over-all farm operation for the year showed a profit of \$177,343.09.

Upon completion of the second dormitory at the Colony Farm No. 1, the existing buildings were torn down and the grounds have been landscaped.

Our program of dairy herd improvement has continued under the able direction of Mr. John O'Steen, Dairy Supervisor. 120 cows were slaughtered because of brucellosis, sterility and low production. The brucellosis eradication program is about completed. Since reactors to the brucellosis test have been removed from our herds, the conception rate has increased from a nonreturn of 63% in 1956 to 70% in 1957. Two things have contributed to the good conception rate; namely, ridding the herds of brucellosis and use of frozen semen.

In May of this year, we purchased a herd (83 cows and 30 bred heifers) of registered Holsteins from Mr. J. C. Cloniger, Spring Lake Farm, York, South Carolina at a cost of \$47,562.50. This herd was the second highest producing herd in South Carolina with an average production of 12,270 pounds (4 gallons) of milk per cow and the herd has been certified as brucellosis free. We will use this herd as a basis to build registered herds for the Institution. Bred cows and heifers will freshen in July through November.

At the present time the dairy herds at the State Farm consist mainly of young cows and heifers. We are milking 150 artificially sired heifers. We have 210 bred heifers which will freshen this fall and 195 calves.

Funds have been allocated for the construction of a modern dairy at the State Farm. This unit will consist of 4 lane type stalls built into the milking parlor and the milk will go directly from the cow to a bulk tank.

Mr. O'Steen has recommended that we convert to pipe line milking in the near future. Handling of milk in bulk tanks will eliminate costly milk can replacements and increase the efficiency and sanitation of the milking operation. We hope that this can be accomplished within the near future.

Egg production has increased approximately 60 dozen eggs per day during this fiscal year. The Broiler Project has furnished all broilers used by the Hospital.

For more complete information concerning the various operations of the Farm and Dairy Division, your attention is directed to the financial statement submitted by the Accounting Division for this year's operation.

Respectfully submitted,

W. R. Crittenden  
Assistant Business Administrator

July 1, 1958

Mr. Joe Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

I herewith submit my annual report for the Personnel Division at the Milledgeville State Hospital for the period from July 1, 1957, through June 30, 1958.

The State Personnel Board approved an upward reallocation of one pay grade for most of the classes at Milledgeville State Hospital effective July 1, 1957. Only those employees whose salary was below the entrance step of the grade were adjusted. The physicians were further upgraded January 1, 1958, another pay grade.

The State Personnel Board revised the rule for determining the value of maintenance furnished our employees effective January 1, 1958. We now charge for the maintenance furnished the individual rather than a flat rate for a certain class.

The General Assembly passed an Employees' Suggestion and Faithful Service Awards Act and Milledgeville State Hospital had 18 employees to qualify for forty or more years of service during this fiscal year.

For the year covered in this report, there were 269 separations which included 176 resignations, 50 dismissals, 31 retirements and 12 deaths; 427 appointments; 124 transfers; 111 promotions; 29 demotions; 86 leaves of absence and 48 returns from leave of absence.

The total number of employees on the payroll July 1, 1957, was 2041 and the total number of employees as of June 30, 1958, was 2127. There were 65 new positions created for the Hospital during this period. The personnel turnover amounted to approximately 13%.

A total of 269 Student Nurses affiliated at this Hospital during this fiscal year and these have not been included in the appointments and separations shown above.

Respectfully submitted,

W. A. Stone  
Personnel Officer

July 1, 1958

Mr. Joseph W. Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

During the past fiscal year, as in previous years since the end of World War II, the Engineering Department, primarily a maintenance organization, has been largely concerned with new construction in connection with the building program and smaller Hospital installations.

#### NEW CONSTRUCTION

Work has been completed on the Washington Building O. T. Shop, Colored Pavilions, tool house at Bostick Building, and the incinerator at the Rivers Laboratory. Patched wood floor, repaired all windows, repaired ceiling, poured concrete floor in bath and shower bath at A and B Pavilions. Completely screened Pavilion C. Replaced all doors, screen doors, and locks.

Completely overhauled 28th Ward. Repaired windows and thirty-eight (38) screens, patched walls and ceiling, repaired all doors, hung three (3) double lattice doors, put hasp and staples on three (3) doors, put flush bolts on two (2) doors, built new set of back steps.

A brick retaining wall 80 ft. long and 3 ft. high was built at the Jones Building.

Back porch was boarded up, three (3) double window frames, and six (6) single frames were cut on Pavilion B.

Work has been completed on the construction of the new boiler plant at Colony Farm No. 1.

A smoke stack 40 ft. high with fire brick inside and red brick outside was built at the Colony Farm.

The 38th Pavilion has been completely overhauled, inside and out.

A tool house was built at the W. T. Berry residence.

The Williams' house has been completely overhauled. Floors were sanded; tile put in bathrooms, kitchen, and breakfast rooms, all plastering patched; kitchen cabinets and sinks covered; and cornice boards made and put up.

A shelter for soiled linen was built at Holly Building.

A small loading platform was built at Bostick Building Kitchen.

A brick partition wall was built in bathroom in Lawrence Building.

A pair of new brick steps were built at Arnall Building.

A storage house, 8' x 8', was built at Miss Maddox's apartment.

A pair of steps was built at the Lundy residence.

Forms were set in bathroom floor at Arnall Building basement.

Supply room was built at Butcher Pen.

Car porch was built for Dr. Peacock in back yard of Center Building.

### CARPENTRY, MASONRY, AND PLASTERING

During the fiscal year this section built a large number of tables, cabinets and cabinet doors, quilting frames, coffins, shipping cases, cornice boards, curtain rods and brackets, and many other items required by an institution of this size and type.

In addition to the above, this section is responsible for the installation of screen windows and doors, window fans, venetian blinds, wire guards, et cetera. It is also responsible for the repair and replacement of items such as window panes, screen windows and doors, wheel chairs, and steps.

Numerous pictures, window shades, venetian blinds, mirrors, day room gates, clothes lines were hung.

Plywood was put on two (2) lattice doors at West Wing, 2nd Floor, Center Building.

Twenty-four (24) wireguards and one lattice door were made and hung at Center Building.

Covered roof, 18' x 30', at Twin Building.

Front and back porch screen doors were repaired at Burrell residence.

Wireguards were repaired on Holly 4, Freeman 4, and Rivers 6.

Hangers were put up, three (3) screen windows were hung, and two (2) basement screens were repaired at Dr. Peacock's residence.

Re-screened three (3) doors and patched screen wire on porch at Dr. Johnson's residence.

Removed one (1) door, covered louvers of fan, and put up five (5) radiant lights at Rivers Laboratory.

Repaired screen porch at Dr. Martinez's residence.

Re-screened back and front porch at Mr. Depourcq's residence.

Put new wire, springs, and hooks in fourteen (14) screen doors at Bostick Building.

Put new screen wire on door at Dr. Taylor's residence.

Patched celotex in Mrs. Cook's office at Center Building.

Cut posts and put up seventy (70) ft. of fence for child's play pen.

Repaired two (2) porches for leaks at Dr. Bradford's residence.

Air conditioners were installed in the following residences: Wildman, Sarma, Escamilla, McCandliss, Fidler, and Bruce Prosser.

Air conditioners were installed in the Jones X-ray Room.

Ceiling on Dupree 12 was repaired.

Shelves were taken down and doors repaired in the residence of Dr. Chance.

Two (2) doors were put up, new window sash put in, and all doors and windows checked and repaired in the residence of Dr. Stone.

Masonite tops were put on several tables in Jones Building Kitchen.

A lattice partition wall, 8' x 25', was built in the Garage.

Screen doors in the Vann residence were repaired.

Screen porch in the Grisham residence was repaired.

Plastering was repaired on Allen 5; Washington 1, 2, 3, 4, 5, and 6; and Rivers 3.

Screen doors were repaired on Dupree 10.

Tile floors on Rivers 7 and 9 were repaired.

Wireguards on Jones 2 were repaired.

The celotex ceiling in Boone Building Dining Room was repaired.

The stock room in Lawrence Building was plastered.

The wireguards on Holly 4 were rebuilt and installed.

A new pair of steps were built at the Electricians' Shop.

The celotex in Mrs. Calloway's office was repaired and mirror was hung.

Old cracked plastering was removed and places patched on Green 2.

Twenty (20) tables were covered with masonite.

Screens were repaired in Walker Building.

The concrete floor in shower room at Green Building was repaired.

The freight elevator in Arnall Building was refloored.

Air conditioner was removed at Dr. Williams' residence.

Repaired and set forms for coping behind sand pile.

Took out twenty (20) screens to be washed and put back at Howell Kitchen.

Put new floor in elevator and new top on table at Freeman Building Kitchen.

Two hundred ninety (290) saws were filed.

#### PLUMBING AND HEATING

270 ft. of roof flashing were made and installed.

6 Lavatories were installed, using about 92 ft. of pipe.

2 Gas Ranges were installed, using approximately 147 ft. of pipe.

7 Water Heaters were installed, using about 42 ft. of pipe.

5 Sinks were installed, using about 107 ft. of pipe.

2 Unit heaters were installed, using about 168 ft. of pipe.

13 Water Coolers were installed, using about 130 ft. of pipe.

1 Dishwasher was installed.

2 Developing Machines were installed.

14 Commodes were installed, using about 92 ft. of pipe.

2 Washing Machines were installed, using about 49 ft. of pipe.

10 Radiators were installed, using about 219 ft. of pipe.

7 Gas Heaters were installed, using about 64 ft. of pipe.

2 Furnace Heaters were installed, using about 168 ft. of pipe.

3 Bathtubs were installed.

3 Coffee urns were installed, using about 21 ft. of pipe.

3 Sterilizers were installed, using about 21 ft. of pipe.

A water line was renewed at the State Farm Dairy, using 85 ft. 1½" pipe and 21 ft. of ½" pipe.

Three complete bathrooms and one shower room were installed in the Colored Pavilions. The water lines were renewed, using 345 ft. of ¾" pipe, 296 ft. 1" pipe, 168 ft. of ½" pipe, 21 ft. 2" pipe, 63 ft. 1½" pipe, and 42 ft. of 1¼" pipe.

A new shower, water cooler, one (1) commode and one (1) lavatory using 42 ft. of 1½" pipe, 20 ft. of 1" pipe were installed on the 28th White Female Ward.

Water line was tied in at new garage, using 21 ft. of ¾" pipe.

A 2½" water line was run to Ingram Building, using 700 ft. of 2½" pipe.

Two (2) water lines were run to servant's rest room at Dr. Taylor's residence, using 210 ft. of ½" pipe.

A gas line was run to the Washington Building Laboratory, using 168 ft. of 1" pipe.

Two (2) new bake ovens were installed in Howell Building kitchen.

Water coolers were installed in 28th and 38th Wards.

The water line at State Farm Dairy was renewed, using 100 ft. of 1" pipe.

The water line to the electrician's basement was renewed, using 126 ft. of ¾" pipe.

A water line, using 168 ft. of 1½" pipe, 105 ft. of 2" pipe and 60 ft. of 3" pipe, was run to the new dormitory at Colony Farm.

The new water tower was connected with the existing pump line at the Colony Farm.

Return pumps were installed in the Jones Building.

Plumbing was installed in a bathroom at 38th Ward, using 65 ft. of pipe.

The hot water line to the Green Building garbage pit was renewed, using 40 ft. of ½" pipe.

Plumbing fixtures were installed in two bathrooms in the Colored Pavilions.

A hot water line at Holly Building was renewed, using 65 ft. of ¾" pipe.

Two ceiling heaters and an air line were installed in the new filling station, using 105 ft. of 1" pipe.

Line was run and gas heater installed in Apartment No. 1 near Howell Building.

A hot water line was run to the carpenter's shop, using 325 ft. of 1" pipe.

Several lavatories were converted from push-button to plain faucets.

A hot water line was run to the new dormitory at Colony Farm No. 1, using 168 ft. of 1½" pipe, 105 ft. of 2" and 60 ft. of 3" pipe.

The water line to the electrician's shop was renewed, using 126 ft. of pipe.

A water line at the State Farm Dairy was renewed, using 100 ft. of 1" pipe.

A line was run and water cooler installed on the 38th White Female Ward.

A new water line was run to the dry kiln, using 21 ft. of 1" pipe.

New return pumps were installed in Lawrence Building, using 21 ft. of 2" pipe.

Two bathrooms have been installed in Pavilions D and E, using 21 ft. of 1½" pipe, 42 ft. ½" pipe, and 25 ft. of 4" soil pipe.

New steam line was run and hot water boiler and pressure reducing valve installed in Dental Clinic.

New water coolers were installed in Boone, Green, and Freeman Buildings.

A new hot water heater was installed in Dr. Taylor's residence, using 21 ft. of ½" pipe.

Four (4) 1" angle valves were installed in Walker Building kitchen.

New steam and return lines were run to Boone Building lobby and recreation room, using 42 ft. of ½" pipe, 126 ft. of ¾", 168 ft. of 1", 210 ft. of 1¼", 462 ft. 1½" and 168 ft. of 2" pipe.

Two (2) floor drains were installed at the Abattoir, using 60 ft. of 4" pipe and 60 lb. of lead.

A water line was run from water main to the hydraulic valve at the Water Plant, using 84" of 2" pipe.

A bathroom was installed on Pavilion E, using 63 ft. ½" pipe, 42 ft. of ¾", 42 ft. 1½", 21 ft. 2" and 20 ft. of 4" soil pipe.

A dryer and washing machine were installed in the McCandliss residence.

New return pumps were installed in Washington Building.

Water coolers were installed in Dupree and Allen Buildings.

Roughed-in for bathroom at Guinea Pig Pen. Forty-three (43) ft. of ¾" pipe, 21 ft. of ½" pipe, 45 ft. of 4" soil pipe, and 10 ft. of 3" soil pipe were used.

#### WATER, SEWER, AND GRADE SECTION

A concrete floor was poured in two bathrooms in the Colored Pavilions.

A water line at the Bostick Building was dug up and renewed.

The water line was run for the residences in Fort Wilkinson.

The ditch was dug and a new 4" water line run from the main building to Key's dairy at the State Farm.

Dug ditch for water line from Ingram Building to new Prison Building site.

Dug ditch and laid in new sewer line at Lawrence Building.  
Dug out for manhole and put in sewer line at Washington Building  
O. T. Shop; also poured tops for manholes there and at Machine Shop.

Put concrete copings on top of Washington O. T. Shop.

The intake and raw water wells at the Water Plant were cleaned twice during the month.

The water main at Ingram Building was tapped and spigot installed in the yard.

Ditches were dug and new sewer lines run to the new buildings at the Colony Farm.

Manholes were built, piers built, and gas tanks set at the colony farm.

All unused kitchen equipment was picked up from the various places and stored in the old Twin Building Kitchen.

One (1) motor transport load each of alum, lime and chlorine were unloaded at the Water Plant.

Ditches were dug and hot and cold water lines installed at the Colony Farm No. 1, Carpenter shop and Planer house.

A large fuel oil unloading pump was installed at the fuel oil storage tanks.

Several hundred feet of steam tunnel to the Ingram Building has been dug up preparatory to renewing the pipe.

A broken sewer line was dug up and repaired near the Twin Building Kitchens.

The water lines to the old dormitories at Colony Farm No. 1 have been taken up and the pipe placed in stock.

A six (6) inch sewer line was run from the new boiler house at the Colony Farm No. 1 to the existing septic tank.

The water line to the 10th White Male Ward was dug up and renewed.

Repairs were made on the water main at Colony Farm No. 1.

#### SHEET METAL SHOP

This section made and repaired a considerable number of milk cans, dippers, radiators, coffee pots, metal doors, mixing bowls, bread containers, and various other items of a similar nature.

Copper expansions and roof outlets were made for New Prison Building--560 ft. of expansions and 37 outlets were used.

Two large vats for cannery were lined.

Dry tumblers were vented at the residence of Dr. McCandliss.

Gas furnaces were vented at several of the doctor's residences.

Put up air duct at Drug Store, Lawrence Building, commissary, and shoe shop.

Finished lining two (2) new ice boxes at Carpenter Shop.

Finished remodeling stainless steel table for Hospital 3.

The hot water heater at the Prison Building was vented.

Forty (40) ft. of 3" guttering and three (3) downspouts were installed on Washington Building.

Air duct was made and installed in the air conditioning unit in the Superintendent's residence.

Gutters were cleaned out at the Crittenden residence.

Two (2) ice boxes were lined at the Sheet Metal Shop.

Downspout and conductor heads were installed on the Whittle and Cabaniss Buildings.

Three (3) ice boxes were lined at the Shop.

A number of vent pipes were made and installed at the new Laundry.

### FIRE DEPARTMENT

The Fire Department was called out approximately thirty-five (35) time for grass, wood, and trash fires during the year.

Aerial ladder was used to replace flood light at Allen Building, to remove tixtures at ball park at G. M. C., to help install wire guard at Rivers 6, and to decorate Christmas trees in front of Binion and Powell Buildings.

On August 24, a call to Binion Building was answered to help stop patient break.

On October 25, the Fire Department was called to the Colony Farm; the blacksmith shop burned, caused by a tractor catching fire.

On October 24, the Fire Department answered a call to Jordan Construction Company, where a motor hoist was on fire.

On December 3, a call was answered to the Steam Plant, where oil pump was on fire.

### STEAM PLANT

Repairs were made on the steam distribution system at such times as steam could be cut off of the various sections.

Masonry and insulating work has been completed on boiler No. 4, Steam Plant No. 2.

Quite a bit of work was done at the steam plants. Boilers No. 1, 2, and 3 were turbinized and inspected by the Boiler Inspector.

The steam distribution system at the Auditorium has been completely overhauled and new PRV's installed.

Work was continued on the installation of boilers and boiler equipment at the new Steam Plant at Colony Farm No. 1.

Work was begun on a 6" water main from the southeast corner of the Lawrence Building to the new Prison Building now under construction.

Boilers at Plant No. 1 were shut down for the summer and cleaning and repairs were made.

One (1) washing machine and one (1) extractor were overhauled and are now back in operation.

Four (4) new pressure reducing valves have been installed on steam lines.

Steam Plant No. 1 boilers have been turbinized, insulated, and cased with sheet metal to economize on heat. Continuous blow-downs have also been installed.

The new laundry has been completed; all machinery has been installed and is now in operation.

#### REFRIGERATION - ICE PLANT - AIR CONDITIONING

Refrigeration and air conditioning units at all locations are checked frequently and placed back in operation as soon as possible after stoppage in order to eliminate food spoilage.

All ice for the Institution is made at the Ice Plant. With the cold storage at its present location in the Warehouse, the ice-making capacity has increased and no ice shortage is seen at the present time. Overhauling of the plant takes place during the winter months when the ice demand is the lowest.

Approximately twenty (20) air conditioning units were installed throughout the hospital and in personnel dwellings.

#### WATER TREATMENT PLANT

All basins and wells are cleaned quarterly and necessary repairs are made.

The contract enlargement of the Water Plant and the addition of a 16" main to the Hospital Pumping Station have been completed.

#### ELECTRICAL AND TELEPHONE SECTION

Lines were run and transformers hung and cut-in made for the E. M. Ennis residence.

Switches were installed for fans at Ice Plant.

Three (3) electric fans were connected in the Boone Dining Room and four (4) were installed in the Holly Building Recreation Room.

Dug holes and set twenty (20) 25 ft. telephone poles on line to Colony Farm.

Cut out right-of-way on telephone line to Colony Farm.

Ran new telephone cable from Ingram Building to Colony Farm.

Wires were run and air conditioning units installed in the residences of Dr. Gibson, Dr. Martinez, Dr. Brown, the Shoe Shop, Outpatient Clinic, and Dr. Lindsey's apartment.

Put up conduit, pulled wires, and connected two compressors in the laundry.

Wires were run and two return pumps installed in the new Laundry.

Wires were run and outlets and switches installed in the Crittenden residence.

Poles were set, transformers put up, and wires run to the new Laundry.

Twelve (12) fluorescent lights were installed in the Rivers O. T. Shop.

An electric mixer was installed in Ingram Building Kitchen.

Two floor furnaces were installed in the Huff residence at Colony Farm.

Poles were set, wires run, and cut-in made to the Colony Boiler Room.

Flood lights were installed at the unloading pump house at Steam Plant.

Poles were set, wires run, and switches and lights installed in the Garage.

The transformer station at new laundry was wired and cut-in made.

Wires were run and cut-in made to the new O. T. Shop in Washington Building.

Wires were run, cut-in made and forty-two (42) fluorescent lights installed in Rivers Building developing room.

Wires were run for additional lights on Jones 3.

An outside light and air conditioner were installed in the Dental Clinic.

Switches and air conditioning unit were installed in Dr. Monroe's residence.

Wires were run and six dryers installed in the new laundry.

Conduit was installed and five water coolers hooked up at the new laundry. A panel board was put in and lights installed.

Electrical outlets were installed and three television sets installed in Bostick Building.

Two switches were installed in Whittle Building boiler room and return pumps were connected.

Transformers were set and wires run to the new Prison Building.

Wires were run and light fixtures installed in the new Rivers Laboratory.

Fourteen (14) fluorescent lights were installed in various buildings.

Wires were run and cut-in made to the Blacksmith Shop at Colony No. 1.

Twenty-four (24) fluorescent lights were installed in various buildings.

Fluorescent lights were installed in Allen, Arnall, and Freeman Beauty Shops.

An exhaust fan was installed in the Whittle Building boiler room.

Underground cable was run and several outlets installed in the Engineer's Office in Lawrence Building.

Lines were run and boilers wired up at the Colony Boiler Room.

A line was run and switch installed for a washing machine at the Kramer residence.

A radio was installed on Allen 2.

Line was run, switch installed and air conditioner connected up at Dr. Freeman's residence.

### MACHINE SHOP

This section, consisting of one man, is responsible for all the machine work. He also does repair on wireguards, sewing machines, scales, food cutters, food carts, ice crushers, wheelbarrows, chairs, suction machine, and welding machines, and any other task deemed necessary. Welding and brazing is done whenever necessary.

### PAINT SHOP

This section is responsible for the refinishing and painting of such items as coffins, bedside tables, cabinets, chairs, television stands, beds, desks, medicine boxes, et cetera.

The painting of all buildings and residences is done by the employees of this section.

### SANITARY DEPARTMENT

The Sanitary Department has been transferred to another division of the Hospital.

### LUBRICATION

The Engineering Department has a full time oiler whose main duty is the oiling and greasing of electrical motors and equipment in locations not manned by Engineering Department employees. During his rounds, the oiler reports to the Chief Engineer any leaks, worn-out and missing V-belts, burnt out motors, et cetera that he finds.

### CONCLUSION

In conclusion, it should be stated that personnel of the electrical and plumbing department are on duty during the week ends and holidays. A standby man at the Wood Shop works on Saturday afternoon and holidays. For night calls, two plumbers have Hospital phones. When they cannot be contacted, the Chief Engineer or Office Manager locate the proper employees to perform the emergency at hand.

Respectfully submitted,

Roger W. Stembridge  
Chief Engineer

July 1, 1958

Mr. Joe Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

The following is a report of the Sanitary Department for the fiscal year beginning July 1, 1957, and ending June 30, 1958.

The following approximate quantities of chemicals were used:

Flies, mosquitoes, water bugs, roaches, ants, fleas, et cetera:

7,256 Gal. Mineral Spirits  
110 Gal. Hilcosec  
10,000 Lbs. Fly Flakes  
110 Gal. Mixture of Pyrethrins and Piperonyl Butoxide  
220 Gal. 25% D. D. T. Concentrate  
385 Gal. 36% Chlordane Concentrate  
200 Lbs. 10% Chlordane Powder

Mice and Fleas:

1,000 Lbs. 50% D. D. T. Powder

Wharf Rats (*Norveigus*) and Roof Rats (*Ratus Ratus*):

150 Lbs. Warfarin Concentrate  
2,850 Lbs. Corn meal, sweet feed, et cetera  
200 Lbs. Cyanogas

Termites:

265 Gal. No. 2 Fuel Oil  
26 Gal. Anti-Rot

Disinfecting and Deodorizing:

1,100 Gal. Pine Oil Disinfectant  
55 Gal. Pine Oil

The overall sanitary condition of the Institution is fairly good. All garbage that is used to feed hogs is being cooked.

All insects and rodents are under good control with the exception of roaches, commonly called water bugs.

We should like to make the following recommendations:

- (A) All tables with cracks to be covered with masonite or replaced with solid top tables.
- (B) All unscreened inhabited buildings to be thoroughly screened.
- (C) Build sewage disposal plants when funds are available.

Respectfully submitted,

Irvin B. Vann, Sr.  
Chief of Sanitation

## MILLEDGEVILLE STATE HOSPITAL ANNUAL REPORT

July 1, 1958

Mr. Joe Boone  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Boone:

Official fiscal accounting records of the Milledgeville State Hospital are on a cash receipt and disbursement basis as prescribed by the State Auditor and are maintained by the State Department of Public Welfare, Atlanta, Georgia. Budgetary control records for the Hospital as prescribed by the Budget Bureau are maintained by the State Department of Public Welfare, also.

Although budgetary control records for the Hospital are maintained by the State Department of Public Welfare, it is necessary and required that budget control records be maintained at the Hospital to adequately control expenditures of approved budget items. At the close of each quarter, it is the practice of the Accounting Division to reconcile Budget Control records of the Hospital with those kept by the Welfare Department.

Fiscal accounting records formerly maintained at the Hospital were eliminated effective January 1, 1944, and a cost accounting and inventory control system installed. This system was designed to reflect cost on a consumptive basis by cost activities, provision being made for bringing into the records at the Hospital full information as to revenue and miscellaneous income collections, also, payments by the State Office. Detailed operating procedure as outlined in Accounts and Finance Manual prescribed for the Hospital by the Department of Public Welfare has been strictly followed throughout the year.

Available funds on June 30, 1958, amounted to \$1,220,456.41. After providing necessary reserve for accounts payable and special allocations, the fiscal year ended with a cash surplus of \$223,954.60. Detail as follows:

	OUTLAY OPERATIONS	EXTRAORDINARY OPERATIONS	MAINTENANCE OPERATIONS	TOTAL
Available Funds (June 30, 1958)	\$405,949.63	\$141,438.65	\$673,068.13	\$1,220,456.41
Deduct:				
Unpaid Obligations	74,130.00	6,045.28	449,113.53	529,228.81
Special Allocations	331,819.63	135,393.37		467,213.00
	\$ 00	\$ 00	\$223,954.60	\$ 223,954.60

#### OUTLAY ALLOCATIONS – June 30, 1958

Colony Farm Prison Building	\$ 13,620.18
Feed Mill	32,742.43
Greenhouse	1,171.61
Laundry	74,847.76
New Dormitory Colony Farm	269.06
Personnel Dwellings	10,550.54
Water Main	38,618.05
Steam Plant Addition	160,000.00
Total	\$331,819.63

The Department of Public Welfare allotted to the Milledgeville State Hospital in the year ended June 30, 1958, \$9,934,600.00. This amount was supplemented by \$150,492.78 in cash income from sales rents, pay patients, and other sources and \$679,886.78 in donated commodities, making a total receipts of \$10,764,979.56. Services rendered the Veterans' Home for January, February, and March, 1958, in the amount of \$51,559.20 is included in cash income of \$150,492.78.

In addition to the above receipts, Productive Units supplied consumable commodities valued at \$2,090,963.02. By deducting operating cost of \$1,534,190.04 gives a net savings to the State of \$556,772.98. Current Market reports were used to establish sales prices of commodities produced.

There were no budget approved funds for outlay operations during this fiscal year. Outlay expenditures as shown below were made from allocations prior to June 30, 1957.

#### PROJECTS

Laundry Building	\$266,792.60
Water System	219,951.64
Personnel Dwellings	5,582.79
T. B. Laboratory	150.99
Greenhouse	1,963.69

Colony Farm Dormitory	20.50
New Dormitory — Colony Farm	4,492.38
Colony Farm — Prison Building	124,352.22
Feed Mill	2,260.45
Land — Rights of Way	10,141.26
Total	\$635,708.52

The average daily population at the Hospital for the year was 11,748 a decrease of 80 for the previous year, June 30, 1957. Daily per capita cost based on maintenance expenditures of \$11,226,883.57 was \$2.62. By deducting Donated Commodities valued at \$679,866.86 from total expenditures, a net daily per capita cost of \$2.46 to the State is shown as follows:

Total Expenditures	\$12,419,365.07	\$1,057.15	\$2.90
Total Outlay Expenditures	635,708.52	54.11	.15
Net Maintenance	\$11,783,656.55	\$1,003.04	\$2.75
Less Net Savings			
Productive Units	556,772.98	47.40	.13
	\$11,226,883.57	\$ 955.64	\$2.62
Less Donated Commodities	679,866.86	57.87	.16
Net Cost to State	\$10,547,016.71	\$ 897.77	\$2.46

Net profits of productive units are as follows:

Abattoir — Packing house, Meat Products	\$ 130,752.84
Farm — Vegetables, Fruits, Forage, Etc.	177,343.09
Dairy — Dairy Products	50,384.51
Broiler Project — Broilers and Fryers	16,176.58
Egg Project — Eggs and Poultry	100,916.92
Cannery — Canned Fruits and Vegetables	15,784.83
Bakery — Bread, Rolls, Cakes	65,414.21
Total	\$ 556,772.98

Tabulated below are expenditures by services on consumptive basis. Details are shown in statement of expenditures.

Professional Services, Medical and Surgical	\$ 1,113,688.43
Professional Services, Nursing	3,015,214.01
Professional Services, Special	255,432.91
Dietary	3,612,446.77
Housekeeping and Clothing	900,591.78
Property Maintenance	1,524,670.27
Power Plant	583,647.33
Administration	747,965.05
Lands — Building and Equipment	635,708.52
Total Expenditures	\$12,389,365.07

Patient's personal deposits increased \$36,793.77; from \$185,658.28 July 1, 1957 to \$222,452.05, June 30, 1958.

Accounts Receivables at the end of this fiscal period amounted to \$53,967.28. Collections in July, 1958, amounted to \$53,838.88, leaving \$128.40 unpaid.

The Engineering Department inventory was put on I. B. M. cards during the year. This provides a detailed control of all warehouse items for this department.

Physical inventories June 30, 1958, were in satisfactory agreement with control records of the Accounting Division. Adjustments were minor which signifies efficiency and good co-operation in receipt and issue procedure established for proper inventory control.

Over-all inventories increased \$1,817.34; from \$1,049,962.52, June 30, 1957, to \$1,051,779.86, June 30, 1958. Detailed fluctuation is as follows:

INVENTORIES	1957	1958	DIFFERENCE
Livestock For Slaughter	\$ 1,214.27	\$ 32,472.51	\$31,258.24 +
Packing House Products	9,917.84	6,844.07	3,073.77 -
Cold Storage Products	70,127.33	130,830.93	60,703.60 +
Forage Supplies - Dairy	26,094.69	23,496.55	2,598.14 -
Forage & Fertilizer - Farm	188,965.55	89,955.92	99,009.63 -
Forage Supplies - Egg Project	19,280.89	20,904.79	1,623.90 +
Forage Supplies - Broiler Project	4,378.75	6,439.50	2,060.75 +
Cannery - Fruits & Vegetables	25,833.13	18,134.74	7,698.39 -
Coal and Coke	4,680.00	4,599.00	81.00 -
Engineering Supplies	88,089.58	92,908.02	4,818.44 +
Dry Goods, Clothing, Food, Etc.	436,259.78	431,744.29	4,515.49 -
Sewing Room - Materials in Mfg.	13,294.79	13,584.99	290.20 +
Drugs, Medicine, Surgical Supplies	161,825.92	179,864.55	18,038.63 +
	\$1,049,962.52	\$1,051,779.86	\$ 1,817.34 +

Appreciation is expressed to all personnel involved for their co-operation and assistance given the Accounting Division during this fiscal period.

Respectfully Submitted,

T. C. Brantley,  
Accounts Executive II

ANNUAL REPORT

of the

Milledgeville State Hospital

at

Milledgeville, Georgia

FOR THE YEAR ENDING JUNE 30, 1959

## MILLEDGEVILLE STATE HOSPITAL ANNUAL REPORT

JUNE 30, 1959

Mr. W. R. Crittenden  
Assistant Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Crittenden:

On April 24, 1959, by Administrative Order, Alan Kemper, Director of State Department of Public Welfare, with approval of the Governor, transferred management of Milledgeville State Hospital from Department of Public Welfare to Department of Public Health. The Director of Division of Business Administration of the Welfare Department was officially appointed Fiscal Agent of Department of Public Health temporarily to continue uninterrupted accounting through fiscal year ending June 30, 1959. Transition of records was affected after books were closed.

Fiscal accounting records maintained by the Hospital are on a cost accounting and inventory control system. This system reflects cost on a consumptive basis by activities, provisions being made to bring into the records full information as to revenue, miscellaneous income collections, and payments by the State Office.

The Department of Public Welfare allotted to the Hospital in the year ended June 30, 1959, \$10,468,678.54. This amount was supplemented by \$240,603.83 from institutional income, making total receipts for the year \$10,709,282.37.

The \$10,709,282.37 income together with \$1,220,456.41, balance on hand at the beginning of the fiscal year, made a total of \$11,929,738.78 available.

## ANALYSIS OF AVAILABLE FUNDS FOR PERIOD

	MAINTENANCE	IMPROVEMENT	TOTAL
Cash on Hand, 6/30/58	\$ 814,506.78	\$405,949.63	\$ 1,220,456.41
Revenue State Funds	10,052,350.00	\$ 416,328.54	\$10,468,678.54
Institutional Income Accrued	240,603.83		,240,603.83
Prior Year Income Received	52,331.36		52,331.36
Total Available Cash Funds	\$ 11,159,791.97	\$822,278.17	\$11,982,070.74
Less Cash on Hand, 6/30/59	758,738.96	600,799.31	1,359,538.27
Total Cash Expenditures	\$10,401,053.01	\$221,478.86	\$ 10,622,531.87

In addition to allotment of \$10,468,678.54 and institutional income of \$240,603.83, the Hospital received \$588,569.99 in donated commodities, making a total receipts of \$11,297,852.36.

## DETAIL DONATED COMMODITIES

Butter	\$ 215,447.60
Cabbage	1,077.50
Cheese	120,874.40
Corn Meal	30,138.18
Flour	87,633.92
Powered Skim Milk	97,384.59
Rice	36,013.80
Total	\$ 588,569.99

Hospital Productive Units supplied consumable commodities valued at \$2,520,073.66. Operating Cost amounted to \$1,684,966.96, leaving a net saving to the State of \$835,106.70. Current market prices were used to establish sales prices of commodities produced. The feed mill was put into operation March 1, 1959. Operations consist of mixing dairy and poultry feed and milling meal and grits for table use.

## NET PROFIT OF PRODUCTIVE UNITS

Detail Statements of Income and Expenditures, per diem and cost by services together with Schedules of Production and Profit and Loss Statements of Productive Units are submitted for your review. Productive Units have been under your direct control; therefore, comments on physical operations are omitted.

#### PATIENTS DEPOSITS FUND

On June 30, 1959, there were approximately seven thousand five hundred patients' personal deposits in this Fund, totaling \$251,595.64. During the year \$266,528.00 was received for deposit and \$237,384.41 withdrawn, leaving a net increase of \$29,143.59 over year ended June 30, 1958.

#### ACCOUNTS RECEIVABLE

Accounts Receivable on June 30, 1959, amounted to \$1,461.74, of which \$1,333.34 was collected in July, leaving an unpaid balance of \$128.40. The \$128.40 represents six unpaid accounts of long standing. Correspondence pressing collection of these accounts with individuals involved and Attorney General's office is in files of Business Administrator's office at the Hospital.

EMPLOYEE RATIO	1958	1959
Daily Average Patient Population	11,748	11,897
Number Employees on June 30	2,156	2,201
Ratio of Employees to Population	1 to 5.45	1 to 5.41

Respectfully submitted,

T.C. Brantley,

Dr. John H. Venable, Director  
State Department of Public Health  
12 Capitol Square  
Atlanta 3, Georgia

SUBJECT: 117th, Annual Report  
Milledgeville State Hospital

Dear Doctor Venable:

Complying with custom and statute, the annual report of the Milledgeville State Hospital for the fiscal year ending June 30, 1960, is respectfully submitted.

This reporting period marks the first full year that the hospital has operated under the State Department of Public Health. We are grateful to you for the changes of an administrative and organizational nature which you instituted during the interim period from April 27 to September 20, 1959, when you were superintendent of the hospital. The passage of time since you became Director of the State Health Department has emphasized the wisdom and effectiveness of these changes.

Due to the active support manifested by Governor Ernest Vandiver in an adequate program of mental health for the State of Georgia, as well as the sympathetic and understanding leadership which you have exhibited in the program, personnel and patients of the hospital, some significant advances have been made during the past year.

Without question, among the most important of these advances have been in the field of education. The establishment of a Department of Education at the hospital has long been a basic need of the institution. The new Career Psychiatric Residency Training Program of the Georgia Department of Public Health, in cooperation with the Emory University School of Medicine and the Medical College of Georgia, will eventually supply an increasing number of Staff Psychiatrists who will be committed to serve at least two years in Georgia institutions, in addition to the training period of three years in residency.

This program will supplement the existing training programs now in operation at the hospital in the fields of Psychiatric Nursing and Psychiatric Aide Training, and will go a long way toward meeting the

deplorable need for trained personnel now existing at the Milledgeville State Hospital.

As soon as possible this program should be expanded to include the field of Clinical Psychology, another area in which an appalling shortage of trained personnel exists.

A great many of the inadequacies of this institution could be met with an adequate budget. Some of these things are personnel shortages, need for new equipment and buildings as well as renovation of existing facilities, an adequate sewage disposal system, additional rolling stock so that an adequate 24 hour transport system can be established, additional staff quarters for professional personnel, an outdated intake system at the Water Works which now provides an inadequate water supply for the hospital and a more complete food sanitation program.

The hospital is now receiving \$2.74 per patient per day as compared with \$2.47 in fiscal 1959; however, this amount is far short of the national average for mental hospitals of comparable size. Some method should be found to supply this institution with an adequate rate per patient day, adjusted periodically, so that the administration would know approximately what the budget would be for at least five years, thus enabling long range plans to be made for completing specific projects from year to year.

The male and female admission services together with the intensive treatment wards are now restoring 6 out of every 10 admissions. This year there were 3810 admissions, a decrease of 38 as compared with last year. Of these, 2698 were first admissions, a decrease of 59 as compared with 1959. A total of 5188 patients were released from the hospital during this year, an increase of 400 more than last year. Daily average population was 11,872, an increase of 22 over year.

Continued use of electricshock therapy and tranquilizing drugs is having excellent results, particularly in rendering patients more amenable to treatment. Some outstanding results have been achieved in this field by members of the Milledgeville State Hospital staff.

Occupational, recreational, music and religious therapy continues to be an expanding part of the hospital treatment program. Much

of the effectiveness of these technics is minimized by lack of trained personnel. It is hoped that, during the coming year, increased funds for these departments may provide better coverage of ward programs in these fields of therapy. Research is an important part of any hospital program and is not neglected at Milledgeville. Project studies are now under way in the departments of Neurology and Clinical Psychology but are not sufficiently advanced for the results to be reported on at this time.

This hospital is fortunate in having a loyal corps of employees some of whom are the third and fourth generation of their families to serve here. Esprit de corps is, therefore, high, and is being increased by frequent ward and building staff meetings at which the free interchange of ideas between the professional staff and the employees helps to create a climate of confidence and mutual cooperation in the solution of such problems as may arise. It would be well to plan toward the eventual establishment of an eight hour day, particularly for those attendants who are on chronic wards, and sick wards. This can only be achieved by a budgetary increase for the employment of additional personnel in this area.

On the whole, the progress which the hospital is now making under a sympathetic State Administration is encouraging and the hopeful outlook for future advances is gratifying to all Georgians who are interested in obtaining for the mentally ill of this state the best facilities, care and treatment possible.

Detailed reports from every division of the Milledgeville State Hospital are included in this presentation.

The Milledgeville State Hospital patients and personnel owe a large debt of gratitude to the many organizations and individuals who have given unselfishly of their time and material gifts to bring joy and happiness into the lives of those who reside here.

The "M" Day program, sponsored by Mrs. Betty Vandiver, in cooperation with the Georgia Municipal Association, results in thousands of Christmas gifts for the patients from all over Georgia. The Georgia Mental Health Associations also conduct a campaign for Christmas gifts, so that there is not one patient in this huge institution who is forgotten at this joyous season of the year. Milledgeville churches provide Christmas parties for members of the various denominations who are in the hospital.

The United Church Women, under the leadership of Mrs. L. L. Austin, continued their efforts to supply comfortable and tastefully furnished dayrooms in the various wards of the hospital. There are 26 such rooms for which these dedicated women have supplied the furnishings, High Fidelity Record Players, and other items. The therapeutic value of this program cannot be underestimated.

The Pilot Clubs of the state have contributed many worthwhile items of equipment, particularly in the field of music therapy. A current project is the building of a fence covered with climbing roses around the old cemetery.

Mrs. T. M. Hines and members of the Milledgeville Garden Clubs continue to provide a year round program of occupational therapy, in working with the patients. There are now five such clubs organized in the hospital.

The Reverend John Hughston, Jr., pastor of Milledgeville's First Baptist Church, and Chief Of Chaplains for the hospital, together with his associates, provides religious services weekly for the patients and is on call whenever any special problems in the field of religious counseling arise.

The following individuals have been added to the medical staff during the year: Dr. Jose Benito, Staff Physician; Dr. J. G. Bohorfoush, Chief of Physical Treatment Service; Dr. Karl Baumgartel, Neurologist; Dr. Mary H. Elliott, staff physician; Dr. Blake M. Foster, staff physician; Dr. M. W. Hussein, asst. staff physician; Dr. Louis Jacobs, staff physician; Dr. James S. Lambert, staff physician; Dr. Ramon C. Larios, asst. staff physician; Dr. T. J. Mellinger, asst. staff physician; Dr. Richard L. Nutt, staff physician and Dr. W. T. Smith, Clinical Director, White Female Admission Service.

Dr. Irville H. MacKinnon was appointed Superintendent and reported for duty September 20, 1959.

Respectfully submitted,

I. H. MacKinnon, M. D.  
Superintendent

July 1, 1960

Dr. I. H. MacKinnon, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. MacKinnon:

Report showing Movement of Population for the fiscal year ending June 30, 1960 is submitted as follows:

(Mrs.) Mary H. Cook  
Registrar

July 1, 1960

Dr. I. H. MacKinnon, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Doctor MacKinnon:

The following pages contain the report of the Medical Department for the fiscal year beginning July 1, 1959 and ending June 30, 1960.

During the year three thousand, seven hundred and seventy-two (3,772) patients were admitted. Of these, two thousand, six hundred and ninety-eight (2,698) were first admissions and one thousand and seventy-four (1,074) were readmissions to this institution or from some other mental institution. Two thousand, three hundred and seventy-nine (2,379) returned from furlough.

A total of four thousand, six hundred and ninety-three (4,693) patients were furloughed and four hundred and ninety-five (495) were discharged as not insane, making a total of five thousand, one hundred and eighty-eight (5,188) released from the hospital. Of the number furloughed three hundred and fifty-seven (357) were recorded as restored; three thousand, seven hundred and ninety-nine (3,799) as improved and five hundred and forty-seven (547) as unimproved

Nine hundred and forty-one (941) patients died during the year. Arteriosclerosis was the leading cause of death, one hundred and forty-six (146) patients being reported as having died with this disease. Pneumonia ranked second with one hundred and thirty-six (136) and Chronic Myocarditis third with one hundred and four (104).

There was an increase of twenty-two (22) in the population for the year.

Three thousand, five hundred and thirty-two (3,532) patients were treated with electric shock therapy and twenty-nine thousand, three hundred and two (29,302) treatments were given. Two hundred and ninety-nine (299) patients were reported as having been restored; two thousand, five hundred and sixty (2,560) were improved and six hundred and seventy-three (673) were unimproved.

Four thousand, nine hundred and thirty-three (4,933) patients were treated with tranquilizing drugs. Of this number, one hundred and fifty-eight (158) were reported as having been restored; three thousand, three hundred and twenty-six (3,326) were improved and one thousand, four hundred and forty-nine (1,449) were unimproved.

Several physicians have been added to our staff in the past year and we are glad to have them. We commend our medical staff and hope it will continue to increase in order that we may be able to give patients more individual psychiatric care.

I wish to express my appreciation to you, Doctor MacKinnon, and members of the staff for their continued cooperation.

Respectfully submitted,

R. W. Bradford, M. D.

Assistant Superintendent

## JONES OPERATING ROOM

Abdominal hysterectomy .....	6
Abdominal hysterectomy and appendectomy .....	1
Abdominal hysterectomy, removal of ovarian cyst .....	1
Abdominal hysterectomy and repair of cystocele .....	1
Abdominal hysterectomy, appendectomy, repair of cystocele .....	1
Abdominal hysterectomy, repair of cystocele and rectocele .....	3
Abdominal hysterectomy, right salpingectomy, repair of cystocele and rectocele .....	1
Abdominal prostatectomy and vas section .....	1
Amputation, mid-thigh .....	18
Amputation of arm .....	1
Appendectomy .....	13
Arteriogram, left carotid, left temporal parietal craniotomy with excision of infiltrating sub-cortical glioma of left temporal lobe .....	1
Aspiration of fluid from knee .....	1
Bartholin cystectomy .....	1
Biopsy of mass from axilla .....	1
Biopsy of cervix .....	5
Biopsy of ear .....	1
Biopsy of esophagus .....	1
Biopsy of larynx, tracheotomy .....	1
Bilateral temporal exploratory burr holes .....	1
Bilateral oophorectomy .....	1
Biopsy of prostate (frozen section), vas secti on .....	1
Biopsy of testicle .....	1
Bronchoscopy .....	6
Biopsy of vaginal vault, urethra and meatus .....	1
Biopsy of lesion .....	5
Cervical node biopsy .....	1
Cholecystostomy .....	1
Cholecystectomy .....	7
Circumcision .....	19
Closed reduction of dislocation of shoulder .....	1
Closed thoracotomy .....	1
Closed thoracotomy right, debridement and opening of gunshot wound thigh, right .....	1
Coagulation of bleeding point and evacuation of blood clots, post transurethral resection .....	2
Colostomy .....	2
Colopexia and sigmoidectomy .....	1
Curetting of mandible .....	1
Craniotomy, left with sub-total excision of sphenoidal ridge meningioma .....	2
Cystoscopy .....	69
Cystoscopy and biopsy of prostate .....	3
Cystoscopy, removal of foreign body from bladder and excision of mass from scrotum .....	1
Cystoscopy and biopsy of bladder wall .....	2
Cystoscopy, retrograde pyelogram and manipulation of stone .....	1
Cystoscopy and retrograde pyelogram .....	5
Dilatation and curettage .....	8
Dilatation and curettage and biopsy of cervix .....	26
Dilatation and curettage of cervix and removal of endocervical polyp .....	2
Dilatation and curettage, biopsy of cervix and cauterization .....	1
Debridement of osteomyelitis, leg .....	1
Debridement and suturing of human bite .....	1
Debridement and suturing of laceration .....	1
Direct laryngoscopy .....	1
Elevation of depressed skull and removal of epidural hematoma .....	1
Embolectomy, femoral artery .....	2
Enucleation of eye .....	1
Esophagoscopy .....	1
Epididymectomy .....	1
Evacuation of scrotal hematoma .....	1

Evacuation of hematoma from post-operative hernia .....	1
Evisceration, eye .....	2
Excision of callus .....	1
Excision of ear .....	1
Excision of ear and external auditory canal .....	1
Excision biopsy of breast, left supra-clavicular, infra-clavicular and internal mammary chain .....	1
Excision of palmer fascia and plastic repair, bilateral .....	1
Excision of palmer fascia and plastic repair .....	1
Excision of multiple sebaceous cyst from scrotum .....	1
Excision of mass from posterior aspect of right hand and skin graft and amputation of 4th finger, right hand .....	1
Excision of distal tip of tibia .....	1
Excision of hemangioma .....	2
Excision of tumor .....	5
Excision of rectal fistula .....	1
Excision of lipoma .....	8
Excision biopsy of breast .....	1
Excision of wart .....	2
Excision of mass, breast .....	2
Excision of mass from breast (frozen section), radical mastectomy .....	1
Excision of lesion and skin graft .....	6
Excision of papilloma from anus .....	3
Excision of cutaneous horn .....	3
Excision of sebaceous cyst .....	12
Excision of sebaceous cyst from back and mole from thigh .....	1
Excision of cyst .....	8
Excision of sebaceous cyst from thumb and lesion from inside cheek .....	1
Excision of lesion .....	28
Excision biopsy of lesion .....	14
Excision of mole .....	4
Excision of pigmented nevi .....	1
Excision of pilonidal cyst .....	1
Excision of granuloma and removal of foreign body, leg .....	1
Exploratory laparotomy .....	2
Exploratory laparotomy, removal of ovarian tumor, removal of portion of bladder and small bowel .....	1
Exploratory laparotomy, panhysterosalpingo-oophorectomy .....	2
Exploratory laparotomy and lysis of adhesions .....	3
Exploratory laparotomy, removal of cystic duct, exploration of common duct, operative cholangiogram .....	1
Exploratory laparotomy, gastrotomy (removal of foreign body from stomach)	1
Exploratory laparotomy, removal of foreign bodies (8 pieces of wire) from small bowel .....	1
Exploratory laparotomy and resection of greater omentum .....	1
Exploratory laparotomy and repair of perforated duodenal ulcer .....	1
Exploratory laparotomy, repair of gunshot wound of liver, gallbladder, stomach, duodenum and transverse mesocolon .....	1
Exploratory laparotomy and appendectomy .....	2
Exploratory laparotomy, resection of distal ileum .....	1
Exploratory laparotomy, removal of possible tumor of pancreas .....	1
Exploratory laparotomy, enterostomy of small intestines and transverse colostomy with double loop .....	1
Exploratory laparotomy, lysis of adhesions and resection of portion of small bowels .....	1
Exploratory laparotomy, releasing of adhesions, resection of obstructed distal ileum and end to end anastomosis .....	1
Exploratory laparotomy, removal of foreign body from liver and duodenum	1
Fistulectomy and papillectomy .....	1
Gold radon implants to right ear .....	1
Gastrostomy .....	1
Gastrectomy and splenectomy .....	1
Hemorrhoidectomy .....	25

Hemorrhoidectomy and removal of mole from right buttocks .....	1
Herniorrhaphy .....	42
Herniorrhaphy and repair of hydrocele .....	2
Herniorrhaphy, bilateral .....	3
Hysterectomy, bilateral, salpingo-oophorectomy with iliac node dissection .....	1
Hemorrhoidectomy and post proctotomy .....	1
Hyfreaction of lesion .....	1
Incision and drainage of abscess .....	9
Incision and drainage of ischio-rectal abscess .....	1
Incision of furuncle .....	1
Incarcerated inguinal herniorrhaphy .....	1
Insertion of radium to cervix .....	16
Kirschner wire to thumb with skeleton traction .....	1
Laryngoscopy and bronchoscopy .....	1
Lumbar sympathectomy, bilateral .....	1
Lumbar sympathectomy and debridement of heel .....	1
Lumbar sympathectomy .....	1
Lumbar sympathectomy, right and amputation of 2nd toe, right foot .....	1
Lobectomy, lower lobe .....	1
Lobotomy, temporal .....	1
Le Fort .....	1
Lithotomy .....	1
Meatotomy .....	1
Multiple ligation and stripping of varicose veins .....	1
Multiple ligation and stripping of saphenous vein, bilateral .....	1
Needling of eye .....	1
Nephrectomy .....	1
Nephrolithotomy .....	1
Obliteration of cul-de-sac, sigmoidectomy and recto-pexy .....	1
Open reduction and internal fixation of knee with S.M.O. bone screw .....	1
Open reduction and internal fixation of patella with stainless steel wire ....	1
Open reduction of mandible, right with trans-osseous fixation .....	1
Open reduction and internal fixation of olecranon process with Rush pin ....	1
Open reduction and internal fixation of olecranon process with S.M.O. bone screw, elbow .....	1
Open reduction and internal fixation of radius with Rush pin .....	2
Open reduction and internal fixation of humerus with Rush pin .....	4
Open reduction and internal fixation of femur with Rush pin .....	2
Orchidectomy .....	2
Open reduction, removal of Rush pin and insertion of Rush pin to radius ....	1
Open reduction and internal fixation of ankle with S.M.O. bone screw .....	5
Open reduction and internal fixation of tibia and fibula with Rush pin .....	1
Open reduction and internal fixation of femur with Smith-Peterson nail .....	3
Open reduction and internal fixation of femur with Lorenzo screw .....	27
Open reduction and internal fixation of femur with Lorenzo screw and inter- trochanteric bone plate .....	1
Open reduction and internal fixation of femur with Smith-Peterson nail and intertrochanteric bone plate .....	42
Open reduction and internal fixation of femur with Smith-Peterson nail and McLaughlin bone plate .....	1
Open reduction and internal fixation of ulna and radius with Rush pin .....	1
Open reduction and internal fixation of tibia with Rush pin and internal fixation of knee with S.M.O. bone screw .....	1
Open reduction and internal fixation of tibia with S.M.O bone screw .....	2
Pan-hysterosalpingo-oophorectomy .....	4
Patellectomy .....	1
Perineal urethrostomy and transurethral resection .....	1
Perineal prostatectomy .....	1
Phlebotomy .....	1
Plastic repair of eyelid with skin graft to de nuded area .....	1
Plastic repair of nose .....	1
Plastic repair of extensor tendon, arm .....	1
Plastic repair of shoulder .....	1
Plastic repair of soft cleft palate .....	1
Plastic repair of bladder neck flap .....	1

Pneumectomy .....	1
Prostatic biopsy .....	3
Prostatic biopsy and cystoscopy .....	2
Prosthesis to head of femur .....	7
Radical mastectomy .....	4
Radical mastectomy and skin graft .....	2
Radical vulvectomy, bilateral .....	1
Radical neck dissection and mandiblectomy .....	1
Radical mastoidectomy .....	3
Recto-urethral fistulectomy with modified whitehead .....	1
Revision of gastrojejunostomy .....	1
Recto-pubic prostatectomy .....	1
Reduction of rectal prolapse .....	1
Removal of ganglion, wrist .....	1
Removal of foreign body .....	2
Removal of nasal polyp .....	1
Removal of cataract .....	7
Removal of cataract and iridectomy .....	1
Removal of posterior patella .....	2
Removal of distal fragment of patella .....	1
Removal of chalazion from upper eyelid .....	1
Removal of cyst from maxillary gland .....	1
Removal of growth from cheek .....	3
Removal of pterygium .....	2
Removal of parotid gland tumor and skin graft .....	1
Removal of screw from elbow .....	1
Removal of Moore pin from femur .....	1
Removal of Rush pin from femur .....	1
Removal of toenail .....	2
Removal of great toenail bilateral .....	1
Repair of fistuli and hemorrhoidectomy .....	1
Repair of cornea .....	1
Repair of laceration .....	6
Repair of laceration of scrotum .....	1
Removal of Smith-peterson nail and intertrochanteric bone plate from femur .....	1
Repair of prolapsed rectal mucosa and excision of fistula tract .....	1
Revision of amputation stump, leg .....	1
Repair of hydrocele .....	4
Repair of cystocele and rectocele .....	1
Repair of incisional hernia .....	2
Repair of strangulated inguinal hernia and resection of portion of small bowel .....	1
Repair of perforated esophagus .....	1
Repair of umbilical hernia .....	1
Radical groin dissection, bilateral .....	1
Removal of head of femur .....	1
Salpingo-oophorectomy .....	1
Saphenous vein ligation .....	1
Scalene node biopsy .....	1
Secondary closure of evisceration .....	1
Secondary closure of abdominal wound .....	1
Sigmoidoscopy .....	19
Sigmoidoscopy and biopsy of rectum .....	2
Sigmoidoscopy, hemorrhoidectomy and sphincterotomy .....	1
Simple mastectomy .....	4
Sigmoidectomy, recto-pexia and colopexia .....	1
Suturing of laceration .....	1
Supra-pubic cystostomy .....	2
Supra-pubic prostatectomy and herniorrhaphy, right .....	1
Suturing of multiple laceration of left arm and left leg .....	1
Submucous resection and columnella transplant .....	2
Sub-total gastrectomy .....	1
Sub-total gastrectomy with gastrojejunostomy (Hoffmeister anastomosis) .....	1
Supra-cervical hysterectomy, bilateral oophorectomy, resection of greater omentum .....	1

Suspension and resection of distal sigmoid colon .....	1
Sub-total gastrectomy with anterior gastrojejunostomy .....	1
Tonsillectomy .....	5
Tonsillectomy and adenoidectomy .....	6
Thyroidectomy .....	3
Thyroidectomy, subtotal .....	1
Thyroglossal duct cystectomy .....	1
Tooth extraction .....	2
Trachlectomy .....	1
Transurethral resection .....	5
Transurethral resection and vas section .....	6
Transurethral resection, vas section and biopsy of penis .....	1
Tracheostomy .....	2
Tracheotomy, radical neck dissection and laryngectomy .....	1
Tubal sterilization .....	1
Tubal sterilization and appendectomy .....	50
Vas section .....	83
Vaginal hysterectomy .....	1
Vaginal hysterectomy and repair of cystocele and rectocele .....	4
Vaginal hysterectomy, repair of cystocele, rectocele and urethracele .....	1
Vesicle neck resection .....	1
Vein ligation .....	8
Vagotomy and hemigastrectomy .....	1
Wide excision of portion of breast .....	1
Wide excision of lesion, right forearm and right side of neck .....	1
Total .....	930

O. B. ....	52
Cast Applied .....	365
Minor Lacerations .....	196
Major Operations .....	410
Minor Operations .....	520

OCCUPATIONAL THERAPY DEPARTMENT  
MILLEDGEVILLE STATE HOSPITAL

July 1, 1960

Dr. I. H. MacKinnon, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. MacKinnon:

The following is the Annual Report of the Occupational Therapy Department of the Milledgeville State Hospital for the year ending June 30, 1960.

The past year has been most successful for this department. There have been twenty employees added which enabled us to expand the work of Occupational Therapy to more patients. With the addition of the new employees, we are now able to give weaving to those who want to weave, woodworking to those inclined in that art.

Our budget has enlarged more this year than ever before with supplies. Equipment has been added through the Patient's Benefit Fund and also through the Health Department Fund.

There has been an Art Class added to the Occupational Therapy Department. We should contribute a great deal to Mrs. Baugh for giving her volunteer time to this class. The patients have thoroughly enjoyed this endeavor.

Also the Garden Club members have volunteered to work in that field. The progress was not only made by the Occupational Therapy Department. The cooperation of every employee of the State Hospital who has played his part has brought such success.

We want to express our thanks and appreciation to you, Dr. MacKinnon, and to Dr. W.T. Smith for the interest you both have shown in this department.

There is attached hereto a list of paid invoices for the year 1959-60 that totals \$19,636.14. Our receipts for sales were \$25,234.65, showing a net profit of \$4,598.51 over the cost of materials.

Inventory of materials on hand show a value of \$8,381.55.

Respectfully submitted,

(Mrs) Maude L. Boone, Supervisor  
Occupational Therapy Department

Dr. Irville H. MacKinnon, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. MacKinnon:

The following is the report of the Music Therapy Department for the fiscal year ending June 30, 1960.

Four therapists, together with the department head, comprise the present staff.

The brass band composed of patient musicians is still in great demand. During the year, several donations of instruments have enabled the membership of this organization to be expanded.

The string band instruments are being used by a group of patients who have been formed into a Hillbilly Band. This group is widely used throughout the hospital in furnishing music for entertainments, parties, therapy sessions and dances.

The first major production attempted by the music department was carried through successfully by the presentation of the operetta, "An Old Kentucky Garden". Completely cast with patient personnel, this operetta played to a full house on two separate occasions. Special back drops and props were purchased for this event and these have been used many times since. Lovely ante-bellum costumes were created by the sewing room specially for the operetta.

Another production of merit was the presentation of a Christmas pageant, "Wondrous Love," while the characters and scenes portrayed the Christmas story through the music.

The hospital choir joined with the choir of the Hardwick Methodist Church in an Easter Choral presentation which was given both at the hospital auditorium and at the church.

The following are the expenditures for the year:

Band materials and supplies .....	\$229.70
Records, sheet music and choral music .....	175.98
Operetta, "An Old Kentucky Garden". .....	980.05
Rhythm Instruments .....	48.50
Fellowship Hymnals .....	937.50
Five String Banjo .....	37.00
Easter Cantata .....	68.75
Minstrel Show Books .....	138.30
Back drops and Props .....	1100.00
Total .....	<u>\$ 3715.33</u>

Respectfully submitted,

Melvin R. George  
Coordinator of Religious,  
Recreational and Music Activities

Dr. Irville H. MacKinnon, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. MacKinnon:

The following is the annual report for the Recreation Department for the fiscal year ending June 30, 1960.

During the year the Recreation Department has expanded its program to provide for increased activities for the receiving wards. This has been done without depriving other patients of existing recreational program. A 16 mm. movie is shown on each ward of the Powell Building at least once a week, in addition to the regular movies shown in the auditorium. Mornings are set aside for male and female patients at the auditorium, in order that they may have the opportunity to participate in physical exercise and similar recreation.

The department has cooperated in Open House activities and, during the year, more than 3000 visitors have received guided tours through the hospital. The department also participated in "M" Day Christmas activities.

Regular activities such as dances, movies, weiner roast and fish fries have brought much favorable comment from patients.

The program is adequate, however a much better job could be done with an increase in personnel and more adequate equipment.

Improvements to the auditorium during the year included the purchase of spotlights and the addition of a number of additional seats in the bleachers.

Respectfully submitted,

Bruce R. Prosser  
Recreation Director

July 1, 1960

Dr. I. H. MacKinnon, Superintendent  
 Milledgeville State Hospital  
 Milledgeville, Georgia

Dear Dr. MacKinnon:

The following is the Annual Report of the Patients' Library for the year ending June 30, 1960.

We have had a most successful year. Through the efforts of Civic and Religious organizations, we have been furnished magazines and books which the patients have greatly enjoyed. Subscriptions to several magazines have also been donated. The library has been painted, additional bookcases added, new draperies, and air-conditioning installed, plus a comfortable and attractive reading room.

As of June 30, 1959, we had on hand 17,735 books. As of June 30, 1960, we had 19,036 books, an increase of 1,301.

We still feel the dire need of a bookmobile to enable us to make a better distribution of magazines and books to the patients.

The following is a detail of the expenses incurred for the year:

Supplies - Gaylord Brothers .....	\$12.65
Readers' Digest Condensed Books .....	10.24
	<hr/> \$22.89

We wish to express our appreciation to Dr. MacKinnon, Dr. Smith and the entire staff for their interest, help and cooperation.

Respectfully submitted,

(Mrs.) Frankie S. Simpson,  
 Librarian

Robert J. McCandliss  
ROENTGENOLOGIST

Dr. I. H. MacKinnon, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. MacKinnon:

This is the Annual Report for year beginning July 1, 1959 and ending June 30, 1960.

During the year this Department has been very under-staffed. H. F. Stewart received a State Scholarship in September and left for one year to complete his doctorate in Clinical Psychology at the University of Florida. This vacancy left only two Clinical Psychologists on duty. In October the Department was fortunate in acquiring the services of D. W. Primac, Clinical Psychologist, who has been associated with the National Institute of Mental Health in Washington, D. C.

Although grossly under-staffed, the Department was able to perform approximately fifty psychological examinations per month. Greater emphasis on treatment led to a steady increase in the number of patients treated in group and individual psychotherapy and in June this number reached 114. Many other patients were seen in brief therapeutic contacts. A number of hours each month was spent in teaching student nurses, attendants, Public Health nurses, college groups, and community organization. Some research was also carried out and one study done on the effects of a commonly used tranquilizer will soon be published in a professional journal.

There are only two groups professionally trained in emotional illness, psychiatrists and clinical psychologists, and for this reason we need many more clinical psychologists in order to have adequate treatment for the patients here in this hospital. The Public Health Department is now planning on raising the standard and salaries of clinical psychologists so that it will be more possible to recruit competent staff members for this Department. This should lead to very significant progress in the diagnostic and treatment resources of the Milledgeville State Hospital. It is hoped that our staff can be increased considerably in the coming year.

We wish to express our appreciation to the Public Health Department, Dr. MacKinnon, and other staff members who have cooperated with us and encouraged us during the past year.

Respectfully submitted,

R. W. Wildman, Ph. D.  
Chief Clinical Psychologist

July 1, 1960

Dr. I. H. MacKinnon, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. MacKinnon:

The annual report of the Nursing Department for the fiscal year beginning July 1, 1959 and ending June 30, 1960, is submitted as follows:

There has been much activity also a good many changes in the Educational Department during this period.

In July, Mrs. Gertrude Youngblood, Director of Psychiatric Education and the Assistant Director of Nursing, attended a joint meeting in Atlanta of the Board of Examiners of Nurses for Georgia, and Directors and Faculty members of Schools of Nursing having Psychiatric affiliation contracts with our hospital. A pressing issue was the matter of anticipated increase in enrollment of students, and the question of whether our hospital would be able to provide affiliation for all of these students. It was estimated that in order to accommodate the present sending schools, there would be a need to increase the number of students per quarter to 90 students by 1961, and to 125 students by 1965.

Mrs. Maidana Nunn returned to duty in September, following a six months' educational leave.

Mrs. Nunn and Mrs. Gertrude Thigpen, Psychiatric Clinical Instructors, went to Atlanta in October to review the Georgia State Board Test Pool examination.

Several of the Staff members attended the Annual Convention of the Georgia State Nurses Association held in Atlanta, November 4-7.

In January, 1960, Mrs. Gertrude Youngblood retired from the position of Director of Psychiatric Education, and Mrs. Nunn was appointed to the position of Supervising Instructor, Psychiatry. She is directing the affiliation program.

Mrs. Vivetta Kramer, R. N., B. S., joined the staff in February. She and Mrs. Nunn attended a conference on State Board Test Pool, which was held in Atlanta in February.

On February 15th, the survey visit of our Psychiatric Affiliation Program was made by Mrs. Genevieve Phillips Jones, Educational Supervisor of the Georgia State Board of Examiners of Nurses, and Miss Dana Hudson, a Board member.

In March, Mrs. Leon C. Jordan, Instructor, Psychiatric Nursing, resigned to study for Master's Degree.

In April, three Faculty members attended a Curriculum Planning Conference held at Piedmont Hospital, Atlanta.

In May, Mrs. Beatrice Tribble, R. N., A. B., joined the Staff as Instructor, Psychiatric Nursing.

Mrs. Nunn and Mrs. Thigpen attended the Convention of the American Nurses Association in Miami, Florida, May 2-7. Mrs. Nunn remained in Miami for the Practical Nurses Curriculum Planning Workshop, which followed, May 9-13.

May 23-27, Mrs. Roselyn T. Kelly, Head Nurse, Psychiatry, attended the week of Orientation program at the State Public Health Office in Atlanta.

The Georgia League of Nursing sponsored a workshop on Mental Health, in our hospital, May 26-27, with approximately forty participating. Miss Katherine Fritz, Regional Psychiatric Nursing Consultant, was moderator.

June 20-24, Mrs. Roselyn Kelly attended the American Red Cross instructor-trainer course in "The care of the Sick and Injured," taught in Dalton, Georgia. Mrs. Kelly has been selected to teach in the Intensive Psychiatric Aide Program which we are hoping to institute in the early fall.

The Faculty organization has held meetings regularly. Instead of an annual meeting of the faculty with the directors and instructors from the Nursing Schools affiliating here, it was decided that each school would make its visit individually during the year. These visits were made at the request of the schools.

During the year, 314 student nurses completed the affiliation course in Psychiatric Nursing from the following Schools of Nursing:

Georgia Baptist Hospital	Atlanta	177
Grady Memorial Hospital	Atlanta	77
Piedmont Hospital	Atlanta	41
Macon Hospital	Macon	31
The Medical Center	Columbus	17
Georgia Southwestern College	Americus	14
Warren A. Candler Hospital	Savannah	17

Forty-two new books were added to the student library during the fiscal year.

In November, certification exercises were held for the employees who had completed the Psychiatric Aide course, there being 71 white and 27 colored employees receiving their certificates. Another class will begin in January.

Twenty-four employees in Nursing Service Supervisory positions attended the course for Supervisory personnel which was taught in our hospital May 14-18. This course was taught by faculty members provided by the University of Georgia Center for Continuing Education; it has proven most helpful.

Treated in the hospital wards during the year were the following numbers of hospital employees and their dependents:

White female employees	341
White male employees	371
Colored female employees	53
Colored male employees	30
White female dependents	310
White male dependents	115
Colored female dependents	74
Colored male dependents	8

July 1, 1960

Dr. I. H. MacKinnon, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. MacKinnon:

Report of the Social Service Department for fiscal year from July 1, 1959, to July 1, 1960 is submitted as follows:

Case histories on patients are obtained by the same method as in previous years; that is, relatives are interviewed at time of admission of patient, if contact with them can be made. If contact can't then be made, the next-of-kin or a representative is requested to come for personal interview. If all efforts for personal interview are unsuccessful, a questionnaire is mailed to next-of-kin or to County Department of Public Welfare and to County Health Department, if that County is participating, which agencies contact and return completed questionnaire.

During fiscal year, case histories were obtained as follows:

Histories from interviews ..... 1,595

Histories from questionnaires ..... 1,635

NOTE: All case histories of negro patients are obtained by questionnaire. These Questionnaires are sent to the County Health Departments if that County is participating in the Mental Health Program. If that Health Department is not participating in the Mental Health Program, the Questionnaire is sent to the next of kin.

All medical and psychiatric references obtained both by interview and by questionnaire are contacted for clinical reports.

The Chief Medical Social Worker is subject to call as public and/or family relations counselor in case of personal problems. These are termed "service cases", and are included in that classification as follows.

There were 2,080 service cases during the year, in the matter of social security benefits, other claims, family relationship, insurance matters of estate, compensations, pensions, restoration of civil rights, et cetera, and requested conferences with patients, both in Hospital and on furlough.

The Social Service Department handled the following cases:

Placement of patients (Job placement and others).....	78
Transfers to out-of-State institutions .....	122
Arrangements with Optometrist for glasses for patients ....	147

The State Department of Public Health, through its County Nurses, continues its valuable assistance by means of the "Pilot Project". Sixty-two counties now participate, representing an increase of twelve counties this fiscal year. The County Nurses report progress of furloughed patients; also, they respond with special reports to us upon request.

During the year, twenty babies were born to patients in this Hospital, for whom suitable placement plans were made, or are in process of completion. Some were placed with relatives, others in foster homes. County Departments of Public Welfare and, /or Child Welfare Consultants render assistance where help is indicated.

The annual Christmas parties, with beautiful gifts to each patient of that denomination, were given by the Methodist, Baptist, Episcopal, Presbyterian, Church of Latter Day Saints, Church of God, Christian Church, Catholic Church, and Jewish congregations for their members here. The ladies of the local churches planned interesting programs, brought the refreshments and were the hostesses. In all Church activities, the Chief Medical Social Worker makes plans and assists with the parties.

Since 1949, Christmas Greeting Cards ready for mailing out, also handmade "picture booklets" and picture scrapbooks have been sent by Miss Laura Watson, the "Christmas Card Lady", of Atlanta, well in advance of Christmas.

Miss Watson reconditions beautiful, expensive cards, and the new and high quality envelopes to fit the several styles are always furnished by Col. James N. Keelin, of Atlanta, and Mr. Philip Shulhafer, Vice President, Montag Brothers, Inc., Atlanta. The past three years, a number of boxes of new cards have been given Miss Watson to send us on this project. Dr. Louis D. Newton, Pastor of Druid Hills Baptist Church, Atlanta, makes personal delivery of the many cartons each year for Miss Watson in early December. This Christmas project has grown to such extent that her Sunday School Class and other groups and individuals have come to her aid.

Patients' Benefit Fund (Rehabilitation) for Indigent Patients: This is a year around interest of the Churches, and is the No. 1 Project of St. Philip's Cathedral (Episcopal), Atlanta, whose St. Lydia Chapter initiated the Fund in 1949. The following purposes are served, the fund being administered by the Chief Medical Social Worker:

- (a) Rehabilitation: Suitable, adequate clothing for patients returning to employment, and maintenance to tide them over until earning.
- (b) Appropriate, adequate clothing for those going out into job placement.

Veterans Administration: Soldiers' serial numbers are obtained for the V. A. Contact Representative, with whom this Department cooperates in miscellaneous matters affecting ex-soldiers, soldiers and their dependents where mental illness is involved.

Social Security: This year 333 clinical abstracts have been furnished in support of applications for freeze of benefits, or cash benefits of patients, while hospitalized here.

Respectfully submitted,

(Mrs.) Claire S. Callaway  
Chief Medical Social Worker

July 1, 1960

Dr. I. H. MacKinnon  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. MacKinnon:

The following is a report of the activities of the Dental Clinic for the fiscal year ending June 30, 1960.

Within the past year much has been accomplished in our department with special emphasis toward a comprehensive dental treatment program for the patients. We have initiated a program that will insure us that every patient within the confines of the hospital will receive a simple dental examination every eight months. In this manner all oral pathological lesions are detected and treated and other vital information regarding patients is obtained. After the examinations in each building have been accomplished, and in accordance with the same schedule, all of the cooperative and semi-cooperative patients are brought to the Dental Clinic for the purpose of extracting all diseased and infected teeth. Subsequently every cooperative patient is rendered some form of prophylactic treatment. Further-more as much additional treatment as possible is rendered with special emphasis given to operative and prosthetic procedures. The policy of having a dentists' ward assignment is continued so that each dentist will be responsible for the dental needs of the patients within his assignment.

At the present time we are installing an additional operatory in the downstairs portion of the clinic which is designed to accomodate at least two dentists. This operatory is especially needed since with an anticipated full-staff we are becoming congested upstairs. While this operatory may be used for various purposes, at the present time we are planning to use it for the employees' program. Two dentists will do all employees' work except surgery in this new operatory, and in this manner the patient-employee work ratio can be carefully controlled. We are also in the process of establishing two surgery sections, one for white and one for colored dental patients.

In addition to the above, the scope of the dental program also includes the following activities which have been previously outlined: (a) Both patients and employees are provided with emergency dental service twenty-four hours daily, seven days a week. (b) Weekly visits are made to the receiving wards for the purpose of examining the teeth of each new patient admitted to the hospital. (c) Necessary dental treatment is rendered on the various wards of the hospital for the patients who are unable to come to the clinic. (d) Dental surgical treatment for the patients with active tuberculosis is performed in the operating room of the Rivers Building. (e) Annually our staff lectures to the attendants enrolled in the psychiatric and training courses with special emphasis on patient oral hygiene, recognizing dental problems, and carrying out the instructions of the Dental Department.

During the past year the dentists have performed 38,190 operations and treatments and an additional 9,344 treatments were rendered by the dental hygienists making a combined total of 47,534 operations and treatments. The dental laboratory also completed 10,353 procedures.

Although we had only three dentists on our staff for a month, we have had at least six dentists for most of the year. We are expecting to have a staff of eight dentists in the near future. We also have four hygienists, two lab technicians, one lab assistant, and seven dental assistants on our staff, one hygienist having been added this last year.

During the next year we will need the services of one or more qualified clinical consultants since Dr. Earl C. Huitt, who served us in this capacity for the past year, will no longer be with us. At the present time we need two additional dental assistants since at least two of the hygienists have been used part time in that capacity which causes our hygienic program to lag behind schedule.

Our plans for the immediate future are directed towards a continued expansion of the dental program for the patients. We are now planning to institute a hygienic program for the patients wherein there will be supervised brushing of teeth, cleaning of dentures, etc. twice daily on as many wards as possible. Plans are being made that will enable us to render a more complete clinical examination of patients

when they are admitted to the receiving wards. It would be desirable to place a dental chair, cabinet, light, and cuspidor on each receiving ward for rendering this examination and other general use. Most of this equipment can be purchased from the Georgia State Agency for Surplus Property.

Our services for the patients in regards to emergency service, needed extractions and hygienic treatment are adequate; however, we do not have sufficient staff to meet other dental needs of all the patients, with particular reference to operative and prosthetic dentistry. It is further stated that we cannot possibly render adequate dental service for all the employees and their dependants with the present staff that is assigned to this program.

I wish to express my appreciation to you and to the members of the staff for your continued cooperation.

Respectfully submitted,

Robert C. Watson, D.D.S.  
Director of Dental Services

George W. Taylor R. Ph.  
 CHIEF PHARMACIST

July, 1, 1960

Dr. I. H. MacKinnon, Superintendent  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Dr. MacKinnon:

We are submitting to you for inclusion in the annual report of the Milledgeville State Hospital reports of the various divisions of the Administrative Department for the fiscal year ending June 30, 1960.

During the year a number of organizational changes have been made in the Administrative Department. We have, in making these changes, tried to organize our property and procurement division to better protect the hospital's property and to furnish better service to the other divisions of the hospital. We plan to make certain other organizational changes to improve our building maintenance and to better utilize our employee and prison personnel. We have set up additional maintenance and repair units utilizing prisoners for making major repairs in buildings, particularly in dining rooms and kitchens. Included in these units are a motor rewinding unit and a kitchen equipment repair unit. Under hospital personnel supervision we are utilizing prisoners in these units, training them in many profitable occupations.

A comparison of personal service expense and other expense for the past several years is outlined below:

YEAR	PERSONAL SERVICE EXPENSE	OPERATING EXPENSE	TOTAL BUDGET	NUMBER PATIENTS	RATIO PERSONNEL TO TOTAL BUDGET
1954	\$4,100,350	\$3,416,720	\$ 7,517,070	11,468	54.6%
1955	4,419,611	3,523,937	7,943,548	11,701	55.6%
1956	4,610,225	4,186,805	8,797,030	11,844	52.4%
1957	4,922,458	4,073,212	8,995,670	11,852	54.7%
1958	5,385,068	4,549,532	9,934,600	11,797	54.2%
1959	5,770,493	4,281,857	10,052,350	11,922	57.4%
1960	6,355,091	4,344,909	10,700,000	11,944	59.4%

You will note from an examination of this chart that the ratio of the personnel budget to the total budget has increased by 4.8% which is not nearly adequate. A study of most mental hospital budgets would

indicate from 70% to 90% of their total budget being spent for personal services. A dangerous lack of funds also exists in our operating budget. Our total budget for 1960, excluding personal services, is only \$928,189.00 more than our budget for 1954 and a considerable amount of this increase is spent for increased cost of gas and electricity, food and other services presently being furnished. Our preventive maintenance expenditure for 1960 is no more than the corresponding budget for 1954.

Changes are being made in our over-all program and we are making progress, but not much can be done without adequate funds. From time to time we have recommended a basic rate per patient day for this institution, to be adjusted periodically. If this could be done, long range plans could be made and certain improvements scheduled from year to year. If this is not possible, some method of allocating funds should be adopted so that you could know approximately how much to expect your operating budget to be for at least five years.

We are working with the Soil Conservation Service on our farm programs. We plan to put all submarginal land in grass and to intensively cultivate those plots of land which can be irrigated.

In making your plans for the next fiscal year, consideration should be given to requesting funds for a sewage disposal system. As you know, raw sewage is now being dumped into the river and creates during certain seasons of the year a very undesirable situation. We feel that some action should be taken by the hospital even without the cooperation of the City of Milledgeville and Baldwin County.

In the short time that you have been at the hospital, we have enjoyed our association with you. We feel that progress is being made and that under your direction the hospital program will continue to make progress. We appreciate your cooperation and the cooperation of the other members of your staff.

We invite your attention to the reports submitted by the divisions of the Administrative Department.

Respectfully submitted,

W. R. Crittenden  
Institutional Business Administrator

July, 1, 1960

Mr. W. R. Crittenden  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Crittenden:

During the fiscal year July 1, 1959 - June 30, 1960, a Division of Business Management was organizationally established as a division of the Business Administration Service.

A Director, Division of Business Management was employed to supervise the Division of Business Management and is responsible for the following units:

- Post Office
- Telephone Exchange
- Laundry
- Sewing Room
- Print Shop
- Shoe Shop
- Mattress Factory
- Garage
- Dispatching Unit
- Procurement Office
- Warehouse
- Receiving Department
- Clothing Issue
- Accounting

In addition to duties performed supervising the preceding units, the Director, Division of Business Management is the Assistant Institutional Business Administrator.

This organizational structure was instituted to relieve the Institutional Business Administrator of great volumes of details and various routine operating problems so that he could be free to concentrate on more significant and important aspects of the operations of the Institution.

Following is a brief narrative report of the annual functions of the various units in the Division of Business management for the fiscal year ending June 30, 1960.

## POST OFFICE

No significant changes were made during this period in the Post Office operations. This unit continues to perform the services of collecting and distributing all of the mail for this Institution.

## TELEPHONE EXCHANGE

This unit has the responsibility of 24-hour telephone service for the Institution. Seven telephone operators operate the Exchange and one vacancy exists which was recently established. A Supervisor of Telephone Services, one Apprentice Electrician, and two white male prisoners maintain the technical boards and telephone lines. At the present time, the Exchange has 500 main stations, 150 extensions, and approximately 600 circuit miles.

## LAUNDRY

This Institution has two laundry plants: one referred to as the Old Laundry and one as the New Laundry. At the beginning of this fiscal year, the Old Laundry was being operated with 57 paid employees, 75 colored female patients, 25 colored male patients, and ten white male patients. During this period, all of the patients were removed from the Old Laundry and placed in patient care areas. It is presently operated with 31 paid employees, seven of which are used in Linen Rooms in various buildings, 20 white male prisoners, 60 colored female prisoners, two guards, and five prison matrons. No change was made in the New Laundry which is presently being operated with 40 colored female prisoners, ten white male prisoners, two guards, and three prison matrons. Patients have never been used in the New Laundry. The Old Laundry's production is approximately 135,000 pounds per week and the New Laundry's production is approximately 65,000 pounds per week. This is an increase of about ten per cent as compared with patient operation. Laundry pickup and delivery service is performed by two truck drivers and 16 male patients operating with two laundry trucks.

## SEWING ROOM

On July 1, 1959, there were two sewing rooms; referred to as "White" and the other "Colored". The White Sewing Room had 30 White female employees and the Colored Sewing Room had 13 colored female employees plus two white female supervisors. During the fiscal year ending June 30, 1960, all of the employees in both sewing rooms

except four were transferred to jobs in direct relation to patient care and white female prisoners were placed in the Sewing Room, thus eliminating the Colored Sewing Room. The present Sewing Room operation is performed with four female employees and 20 to 25 white female prisoners. For the sake of brevity, all items and quantities manufactured in the Sewing Room will not be listed, but following is a partial list of items made in the Sewing Room: Plastic mattress covers, bed ticks, pillow ticks; women's wearing apparel, such as dresses, slips, step-ins, gowns, pajamas; children's clothing; men's collars and night shirts, men's oversize clothing; linens, exclusive of sheets; operating room supplies (scrub dresses, doctors' gowns, scrub suits, kit covers, and gloce cases); underclothing and pillows for burial purposes; kitchen aprons, coffee strainers; drapes, curtains, and chair backs.

#### PRINT SHOP

No changes in the operations of the Print Shop were made during this fiscal period. A supervisor of Duplicating Service and one Vari-Typer Operator operate this unit. The Print Shop processes practically all of the printing needs for this Institution so that outside printing costs are very negligible.

#### SHOE SHOP

The Shoe Shop is operated with one Shoe Repairman and one male patient. This unit performs the work of any commercial shoe shop in repairing patients' and prisoners' shoes.

#### MATTRESS FACTORY

This unit is operated by a Mattress Shop Foreman and five or six white male patients. Surplus mattresses are used to obtain cotton that is reworked in the Mattress Factory to be used in the manufacture of mattresses. Practically all mattress that are used in patient areas are manufactured here and very few mattresses are purchased from outside sources.

#### GARAGE

The Garage is operated by an Automotive Shop Foreman and six Automotive Mechanics. Automotive maintenance for approximately 180 vehicles, various heavy equipment, and farm tractors is performed by this unit.

## DISPATCHING UNIT

At the beginning of this fiscal year, the garage was responsible for dispatching motor vehicles for use throughout the Institution. This responsibility was removed from the Garage and placed under Dispatching Unit and all truck drivers were transferred to the supervision of a Motor Transport Supervisor and two Assistant Motor Transport Supervisors. One Assistant Transport Supervisor has been established but this job has not been filled.

The ultimate goal of the Dispatching Unit is to provide motor transport service for the Institution on a 24-hour basis. This cannot be accomplished as desired because of inadequate facilities, shortage of personnel, and budgetary limitations in establishing periodical replacement of old equipment.

## PROCUREMENT OFFICE

During this period a Chief of Procurement and Property was hired and a principal stenographer was promoted to Procurement Officer. Under the supervision of the Chief of Procurement and Property, the Procurement Office, Receiving Department, Warehouse, and Clothing Issue perform routine services to this Institution. Quarterly budgets are accumulated and compiled by this unit and adjusted to come within state appropriations. All departmental requisitions are cleared and processed to the State Purchasing Department in Atlanta. All of the necessary contacts pertaining to rules and regulations with the State Purchasing Department are made by this office to insure prompt and efficient purchases and deliveries of needed items.

The three accounting clerks who were formerly assigned to the Receiving Department were transferred to this unit in an effort to centralize for a more efficient operation. Since this move was made, one of the clerks has resigned and the position may not be filled unless the volume of work requires it.

## WAREHOUSE

The Warehouse theoretically includes any items that are stored for later use by this Institution, but in actual practice lack of warehouse space and facilities prohibit a central warehouse operation. Two jobs have been created in an effort to better organize and coordinate the Warehouse operations but neither of these two jobs have been filled. One of these jobs, Chief Warehouseman, we hope to fill in

January 1961, and the other job, Property Control Officer, we would like to fill immediately if the proper applicant could be located. When these two positions are filled, better controls of stored items and adequate accounting for expendable and non-expendable property should be maintained.

During this fiscal year, minor operational changes were instituted such as daily food deliveries which have greatly helped to reduce pilferage of raw food supplies. The Engineering Warehouse was combined with the general Warehouse operation and placed under direct supervision of the Chief of Procurement and Property.

#### RECEIVING DEPARTMENT

This unit is composed of a Chief Receiving Clerk and an Assistant Receiving Clerk. It is responsible for receiving all merchandise shipped into the Institution, checking as to completeness and possible damage in transport, writing a Receiving Report and securing proper signatures and routing the merchandise to its proper destination.

#### CLOTHING ISSUE

This unit is a part of the general Warehouse and is responsible for storing and issuing all wearing apparel and bedding to the various buildings. It also issues yard goods to the Sewing Room and receives the completed garments for issue to the buildings.

The Rag House is maintained by an employee of this unit. No major changes have been made in this unit and none are anticipated in the near future.

#### ACCOUNTING

A separate report is being prepared for the Accounting Unit.

Yours very truly,

Tap M. Carey, Director  
Division of Business Management

Mr. William R. Crittenden  
Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Crittenden:

The following is the annual report of the Security Division for the year ending June 30, 1960.

During the year four (4) firemen were added to our Fire Department at the Milledgeville State Hospital. All firemen were required to wear uniforms and cap and shirt badges were purchased for them. Firemen completed a 90-hour training period which was instructed by Captain W. E. Walker of the Macon Fire Department. This training included fighting fire, prevention of fires, operation of fire equipment and care of equipment. Firemen were given examinations and three (3) were promoted to Lieutenants. New equipment was purchased for the Fire Department which included a new pumper and aerial ladder truck. A car was also purchased for Fire Chief's use.

Buildings 28 and 38 were repaired and white and colored female prisoners were placed there. The Kemper Building was completed and all white male prisoners were moved from Binion Building to this building. We now have 314 white male prisoners, 158 colored female prisoners and 103 white female prisoners available for various duties on hospitals grounds and farms. Additional guards and matrons were added to take care of the increase in prison population. All guards and matrons were required to wear uniforms and badges were purchased for them. Six (6) guards were promoted to Lieutenants.

Five (5) policemen were added to Police Department during the year, and three (3) policemen were promoted to Lieutenants. Three (3) cars were purchased for use by the Police Department.

During the year all departments under the Security Division were consolidated and upgraded from 16 to grade 18 and titles changed to Security Officers. A training period was set up for Security Officers-in-Training, which is in grade 17. After a years training period all go to title and grade of Security Officer.

Respectfully submitted,

W. N. McHan, Director  
Division of Security

## MILLEDGEVILLE STATE HOSPITAL

### ANNUAL REPORT

July, 1, 1960

Mr. W. R. Crittenden  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Crittenden:

I herewith submit a report of the work completed under the supervision of the Construction Engineer during the fiscal year ending June 30, 1960.

Five residences of brick veneer construction were completed for members of the hospital staff. One five bedroom house was under construction at the end of the year.

Sanitary garbage can wash pits were installed at many of the buildings. These pits are of brick and concrete with grease traps and hot water provided. All drains are connected to a sanitary sewer.

Two buildings were completely renovated for occupancy by female prisoners. Stainless steel equipment was installed in the dining rooms and dish washing rooms. An eight foot cyclone fence was installed around the two buildings for security reasons.

The Occupational Therapy Shop was moved from one location to another in the old Storehouse Building so that the Personnel Office could be moved from the Lawrence Building to larger quarters in this building. Extensive repairs were made and air conditioning was installed in areas occupied by the Credit Union, Patients' Benefit Fund and Personnel Office.

Refrigerated milk dispensers were installed in certain dining areas. Other improvements, such as installation of cast iron lavatories, quarry tile floors, vinyl and asphalt tile, automatic dish washers with stainless steel tables, were made in a number of the dining rooms. Like improvements will be made in all dining rooms as rapidly as possible.

Approved heating and venting systems were installed in some of old residences. We propose to continue such installations until all substandard heating systems are replaced.

Other improvements and repairs made during this fiscal year include a new roof on the Lawrence Building and Warehouse formerly used by the Engineering Department, security fence around Lawrence Building, septic tank and drain field at the feed mill, a steam heating system in telephone exchange, and security window and door guards at the laundry.

Respectfully submitted,

Robert W. McMillan, III

Construction Engineer

Mr. W. R. Crittenden,  
Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Crittenden:

Instead of listing all the new construction and maintenance performed by this Department, it is felt that touching on a few of the major projects should be sufficient.

In the new construction field, finishing the steam line to the Kemper Building was a carry over of the previous report. The largest project undertaken was the installation of sewer lines, steam, fire protection and electricity to the old 28th and 38th Colored Male Wards. These wards were readied for White Female Prisoners to be housed on the Hospital Grounds. While installing these utilities various connections were made from dwelling houses behind the Binion Building and the old 28th Colored Male Ward to install fire protection and sewage facilities for these dwellings. Previously these dwellings had septic tank facilities for their sewage disposal.

To improve the sanitation facilities the drainage field at Colony No. 1 was dried up and relaid. On the hospital grounds sewage lines for garbage wash stands were installed. Also, many old dwellings had their sewage changed from septic tanks to new or existing sewage lines. New lines were also installed on new personnel dwellings built during this fiscal year.

In keeping up the policy of providing uninterrupted water service a new 8-inch cross-feed line was installed. The main purpose of this is to render uninterrupted service to the buildings and dwellings along Vinson Highway whenever the main line to the Twin Building tower develops a break. Another feature of the line is that of balancing out the flow between the Back Yard (Powell Building) tower and the Twin Building tower. Thus, a constant pressure and volume of water is assured.

Fire protection was another important item in our program. With the installation of a new fire plug, the 8-inch line described above affords fire protection to the wooden buildings above the Ice Plant. Fire plugs were installed at the Feed Mill, the newly renovated buildings for Female Prisoners, Holly Building, and the dwellings behind the Binion Building. Two (2) new fire plugs were installed at Colony No. 1 to insure fire protection for all the buildings at this location.

A concentrated effort was made to remove air conditioning cooling towers from the roofs of the following buildings, Abattoir, Powell, and center section of the Lawrence Building. The chemicals used in the water treatment caused the roofs to leak and this condition would exist as long as these units remained on the roofs. With the removal of these towers, the roof problem created by the chemicals was solved.

Among other improvements performed during this period were the installing of two (2) gasoline tanks and pumps at No. 1 Colony Farm. The installing of separate stacks for the three (3) boilers at No. 1 Farm, and the installing of a new compressor at the recently completed compressor room for the Abattoir. All of the above improvements greatly aided the facilities at these two locations.

In the maintenance field great strides were made in the field of sanitation. Dining Rooms were painted, floors covered with vinyl tile and formica placed on table tops. All of these were accomplished in cooperation with the Medical Department who selected the colors for the work listed above, and determined priorities on which buildings and rooms should be finished first. Since funds were not available to do the entire project at one time, sufficient materials were purchased for work that could be accomplished in a quarterly period. Thus, the expense was prorated over a long period of time.

A new beginning in screen window and screen door maintenance has been initiated. Due to the great cost involved in making wooden screen windows and door frames, it was decided to use aluminum altogether and thus cut down the cost.

Even with all the new programs that were initiated during the year, it must not be forgotten that the daily work load of the various sections had to be accomplished. Namely, the light bulbs, switches, new air conditioners and fans, leaking pipes, (both hot and cold) roofs leaking, floors to be refinished, new rooms and bathrooms, new furnace pipes, work orders, reports, supplies, steam lines, steam, water, ice and refrigeration. Thus, it must be said, that the concentrated effort and devotion to duty of all the personnel in this Department should be commended.

In conclusion, it would be fitting to make recommendations for the future. The first would be the condemning again of the Dupree Building. All the wood in this building should be replaced with concrete. The building with its good walls can be restored to useful services as has been the Cabaniss, Whittle, Powell and the Brantley Building.

At this time it is recommended that water coolers be installed on all wards which do not have any. The present water fountains are obsolete and parts are unavailable to fix them.

Next, would be the overhaul of the American Ironer at the Old Laundry. This machine could be overhauled and put back into service at a figure well below the cost of a replacement.

Also recommended would be a new intake well at the Water Works Plant. We have reached the maximum capacity which the present gravity-fed water line will carry. With the presence of manganese in the water more frequent washing of the filters is necessary. Consequently as much as 20% of the water taken from the river is used at the plant and never reaches the hospital grounds.

Finally the ever present problem of sewage disposal. It is recommended a study be made by architects and the Health Department of the sewage at the Hospital with the object of installing a full treatment plant. It is felt that sooner or later this problem has to be solved and the sooner it is, then the less money it should cost.

Respectfully submitted,

Edward S. Smith  
Mechanical Engineer

## SANITATION DIVISION

July, 1, 1960

Mr. W. R. Crittenden  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Crittenden:

Due to the fact that there was a change of Sanitation Personnel during the fiscal year some of the activities that will be mentioned were carried out by my predecessor, Mr. J. P. Gibbs.

The following is a report of the activities of the Sanitation Division beginning with Mr. Gibbs' employment August, 1959 to June 30, 1960.

A survey of the food handling facilities of all kitchens and dining rooms was made to determine the status of food sanitation. As a result it was determined that the numerical rating of the Food Sanitation at the Hospital was one of the lowest in the State. Following this survey detailed recommendations were made regarding physical improvement of the kitchens and dining rooms in order to comply with Act No. 376 governing food handling. In addition, a Food Handling School was held to acquaint the personnel with better food handling practices.

As a follow up of this survey of Food Handling all or some of the following improvements have been made in eleven buildings: remodeled kitchen and dining area which included the provision of quarry tile on floors, dish washers installed, new tables and chairs provided or tables covered, new steam tables provided or repaired, coffee urns provided.

A survey was made of the Dairies and Milk Plant and a number of recommendations were made concerning improvements and modernization. In compliance with our recommendations, milk rooms have been remodeled, dairy barns repainted, pooled waste eliminated, drainage improved, toilets provided for personnel, some of the milking equipment has been replaced and instructions as to proper milking practices have been given to personnel. The quality of the milk is now improved as is indicated by much lower bacteria count upon laboratory examination.

An automatic short time high temperature pasteurization unit which reduces pasteurization time from thirty minutes to sixteen seconds has been installed at the Milk Plant.

Milk dispensers have been purchased for installation in each dining room and the milk will be pasteurized, put into special containers at the Milk Plant, transported to the dining rooms and placed in the dispenser from which it will be served to the patient. Except for the transportation this is an entirely automatic procedure which eliminates handling and pouring, thus reducing contamination and spillage and provides a much higher quality product for the patient.

The incinerators behind each building which were used for disposal of refuse have been replaced with concrete and brick garbage stands with hot water provided for proper cleaning of the garbage and refuse cans.

The edible and the non-edible garbage is still being separated and the edible garbage utilized for the feeding of hogs. The non-edible and combustible refuse is being disposed of in a sanitary land fill located just behind the Lawrence Building. This change of procedure has resulted in elimination of a smoke and odor problem from the incinerators, has reduced fly and roach breeding and is also a much shorter haul for non-burnable material, a reduction of food supply for rodents, and has provided a means of reclaiming useless land.

The roach population is considered to be at its lowest ebb in several years. We believe this can be attributed to use of a different insecticide against which the roaches have developed little resistance.

We believe that the fly situation has been improved due to elimination of fly breeding areas on the grounds such as mule stables, incinerators behind buildings, chicken and dog pens, and change of garbage and refuse practices at cannery.

All new buildings are now being treated chemically for termite protection.

By limiting the use of insecticides to crews who are trained in proper application techniques, and substituting less expensive chemicals the cost of the insect control program has been reduced by about \$2,000.00 per month.

Routine measures are being carried out for control of rodents.

The entry to meat cutting room has been screened, provisions made for hand washing facilities for the personnel and sink provided for cleaning of equipment. It has been recommended that the meat cutting room be relocated for more convenient operation.

At the Abattoir, a wall has been constructed to separate the handling of the edible products and offal. A concrete apron and ramp have been provided for the handling of refuse and a means provided for cleaning of refuse cans. Plans have also been made for the purchase of adequate equipment for the processing of poultry.

The sewer systems have been revamped at several of the buildings where liquid waste was being discharged to the surface. In one instance in which it was impossible to connect with the sewer a septic tank was installed.

Considerable time has been devoted to collection of scrap iron and junk which has resulted in improvement of the appearance of the grounds. The scrap will be sold at a later date.

When additional Sanitation Personnel are available a more detailed Environmental Sanitation and a more complete Food Sanitation program will be pursued.

Very truly yours,

A. L. Hartley  
Director of Environmental Sanitation

Mr. W. R. Crittenden  
 Institutional Business Administrator  
 Milledgeville State Hospital  
 Milledgeville, Georgia

Dear Mr. Crittenden:

The Horticultural Division of the General Business Administrative Department is composed of Greenhouse Production, Landscaping Maintenance, Landscaping Roads, Fruit Production, and Gardening, or Horticultural Therapy.

The greenhouses have a total of 8800 square feet under glass. There are twelve hot beds 100 feet long for carrying plants over the winter and for starting bedding plants early in the spring.

Because of the therapeutic value to the patients the greenhouses are operated by patients. Three men are assigned to the greenhouse for the production of cut flowers and pot plants.

During the year 39,000 Chrysanthemums were cut from one house. Twelve thousand snapdragons were cut, and 2600 pot plants were taken to the wards. All of the bedding plants for the buildings to be used in Horticultural Therapy were produced at the greenhouse.

Also connected with the greenhouse operation is a new program of working with teen-age boys. Four boys from the Howell Building are assigned to the greenhouse. They work with shrubbery propagation. During the summer they produced 1000 rooted cuttings of shrubbery, 1000 ivy plants, and 1000 rose cuttings. The teenagers work in the mornings, and there is a planned recreation program for them in the afternoon consisting of fishing, baseball, badminton, dancing and movies. Part of the recreation program is in conjunction with the other hospital activities. One charge attendant supervises both the work at the greenhouse and the recreation program. The garden clubs of Milledgeville furnish refreshments once each week for the teenagers. Also, they are given an allowance of 50 cents each week. Additional boys will be added to the program as they are recommended by their physician.

A Horticultural Therapy program has been started in connection with the greenhouse and landscaping operation. Eight garden clubs have been organized at the hospital. There are seven women's clubs and one Men's garden club. There are approximately four hundred members of the clubs. There is one chairman with from three to six assistants who meet with the patients. These gardeners are volunteer

ladies from Milledgeville. There are approximately sixty ladies who participate in the program in some way. Thirty-five of the ladies participate each week for two hours. As of June 30, 1960 the ladies had spent 3120 hours on the program. The Garden Clubs of Georgia, Inc., have sponsored the program. Refreshments, tools, seeds, plants, bulbs, etc., are furnished by the garden clubs. They have contributed \$3001.81 of which \$1555.97 has been spent. They have their treasurer and a chairman for all of the groups in addition to the chairman for each garden club at the hospital. The Garden Clubs of Milledgeville sponsored the program from January through March, 1960. The garden clubs of the hospital have planted 14,000 bedding plants and 8,000 bulbs.

The horticulturist acts as director of this activity furnishing technical horticultural information, getting beds prepared for planting and spraying.

Once each month there is a board meeting of chairmen and the horticulturist to discuss the past month's progress and the plans for the next month.

This program is well organized with competent ladies acting as chairmen of the clubs. As more qualified volunteers are available the program will be expanded.

The Maintenance Section of the Horticultural Division works primarily on grass cutting operations. Shubbery, trees, and lawns are planted by this group.

The Roads Section patches roads and repairs parking lots.

The Orchard is composed of 120 acres of peaches, 40 acres of musadine and scuppernong grapes, and 40 acres of blackberries. Also 5 acres of pears and 5 acres of apples are planted.

The peaches, blackberries, and grapes are in production. They are used for making jelly and preserves.

The orchard furnishes an ideal place for patients to visit and gather fruit.

Yours very truly,

E.T. Newsome  
Horticulturist

# MILLEDGEVILLE STATE HOSPITAL

## ANNUAL REPORT

June 30, 1960

Mr. W. R. Crittenden,  
Institutional Business Administrator  
Milledgeville State Hospital  
Milledgeville, Georgia

Dear Mr. Crittenden:

June 30, 1960, ended the first fiscal year under the management of the State Department of Public Health. Comparative Income and Expenditures Statements are on a consumptive basis as heretofore.

The State Department of Public Health allotted to the Milledgeville State Hospital \$10,700,000. The Hospital ended the fiscal year with a cash surplus of \$92,559.37.

	<u>MAINTENANCE</u>	<u>IMPROVEMENT</u>	<u>TOTAL</u>
Cash Balance, 6/30/59	\$ 758,738.96	\$ 600,799.31	\$ 1,359,538.27
Revenue State Funds	10,700,000.00		10,700,000.00
Institutional Income	<u>333,313.15</u>		<u>333,313.15</u>
Total	\$ 11,792,052.11	\$ 600,799.31	\$ 12,392,851.42
Less: Cash Expenditures	<u>10,943,539.23</u>	<u>142,018.92</u>	<u>11,385,558.15</u>
Cash Balance	\$ 848,512.88	\$ 158,780.39	\$ 1,007,293.27
Less: Accounts Payable	732,998.92	148,174.68	881,173.60
Less: Special Allocations		10,605.71	10,605.71
Less: Cash Reserve			
Patients Collections Receipts	<u>21,954.59</u>		<u>21,954.59</u>
Cash Surplus, 6/30/60	\$ <u>93,559.37</u>	\$ <u>.00</u>	\$ <u>93,559.37</u>

Of the \$333,313.15 institutional income, patients maintenance collections receipts in the amount of \$21,954.59 were transferred to the State Department of Public Health, leaving a net institutional income of \$311,358.56. Of the \$311,358.56 institutional income, \$239,919.06 was received from the Veterans Home Commission of Georgia for services rendered eligible veterans domiciled in the veterans home established at the Hospital.

In addition to cash receipts totaling \$11,011,358.56, the Hospital received commodities donated by the Federal Government valued at \$458,705.88 and had net profits from productive units in the amount of \$799,837.08, making total receipts of \$12,261,270.01 for the year.

DONATED COMMODITIES

Butter	64,684 lbs.	\$ 32,342.00
Dried Milk	488,636 lbs.	87,970.68
Dried Eggs	194,850 lbs.	181,859.40
Lard	162,792 lbs.	23,604.84
Rice	245,200 lbs.	21,969.92
Bakery Flour	1,410,700 lbs.	80,414.12
Corn Meal	642,650 lbs.	30,544.92
<u>TOTAL</u>		<u>\$ 458,705.88</u>

PRODUCTIVE UNITS

	<u>SALES</u>	<u>COST OF PRODUCTION</u>	<u>NET PROFIT</u>
Abattoir	\$ 623,167.46	\$ 485,615.11	\$ 137,552.35
Dairy	277,757.32	148,095.68	129,661.64
Farm	376,319.06	142,234.23	234,084.83
Cannery	95,173.14	46,220.38	48,952.76
